

**City of Sonora**  
**Request for Proposal**  
**Stockton/Washington Corridor – Downtown Transit & Accessibility**  
**Improvement Project**

**Response to Questions**

- 1) Will the proposal covers and section dividers count against the 35 page limit? **No**
- 2) Is the Design Engineering Consultant for this project now expected to conduct the ROW services rather than possibly a separate ROW RFP issuing for the project? **Yes the Design Engineering Consultant is responsible for ROW services, as stated on Page 6, paragraph 5 of the RFP.**  
**(Please note that the hiring of a Right-of-Way Consultant included within the City's CDD FY 17/18 Budget is for a different project)**
- 3) Is construction management expected to be done in-house, or by an on-call or local consultant, or is it expected that a separate RFP might be issued for the CM for the project? **The City will decide this at a later date. The City will notify interested firms if an RFP is released for these services.**
- 4) Is an RFP for Design for the Snell and Washington Street Improvement Project still expected out sometime this fiscal year? **No, currently there is no funding for that project.**
- 5) Was the Snell and Washington Street Project folded into this RFP? **No**
