Rich in History and Community

The Sonora Vision Plan provides strategies and implementation tools necessary to revitalize the local economy, enhance Sonora's unique historic character, and improve the quality of life. To develop the plan, the City and project team worked in partnership with the Tuolumne County Transportation Council and members of the community. The community's vision formed the foundation of this plan.

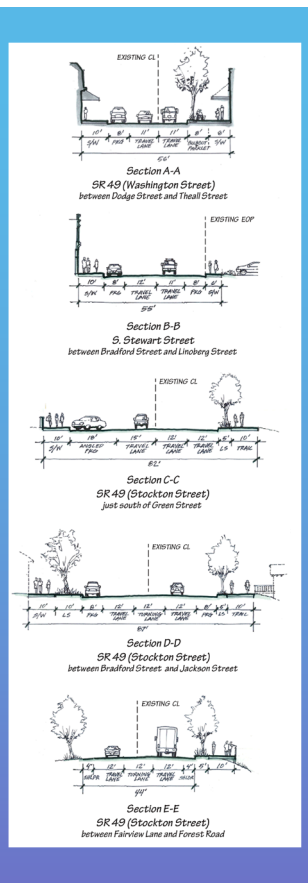
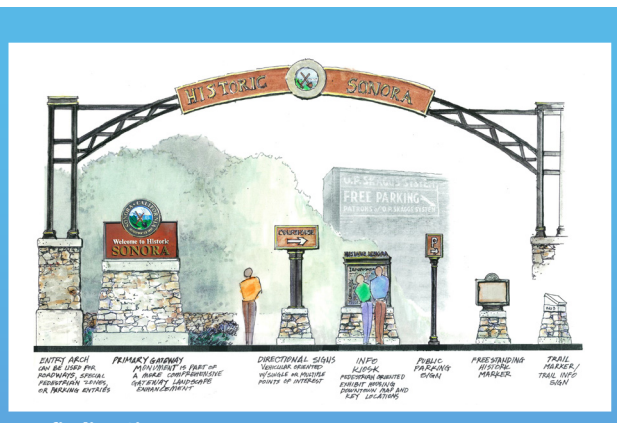
7 Mini-park at Washington and Church

8 Enhanced railroad bridge crossing Highway 108





Wayfinding Signage

Streetscape Furnishings

Streetscape furnishings with classic styles that are complementary to the historic character of Sonora are recommended. Pedestrian amenities such as benches, street lights, and waste receptacles, these are envisioned to be similar to the furnishings shown here.

Plant Palette

Native California plants that thrive in conditions similar to the Sonora climate are recommended for new landscaped areas. Low dry stacked stone walls are proposed that mimic Sonora's historic stone walls.
