3.1 Introduction

The 2019-2024 Housing Element provides for the identification and analysis of existing and projected housing needs and articulates the City's official policies for the preservation, conservation, improvement, and production of housing within the City of Sonora. The Housing Element is the only General Plan Element that requires review and certification by the State of California.

Purpose and Content of Housing Element

The Housing Element describes and analyzes the housing needs of Sonora residents and the issues confronted by the City. This Housing Element also outlines the official City response to addressing the community's housing needs in relation to availability, adequacy, and affordability.

The Housing Element is a five-year plan for the 2019-2024 period, which differs from other General Plan elements that are intended to govern development of the City through 2020. The Housing Element serves as an integrated part of the General Plan, but is updated more frequently to ensure its relevancy and accuracy.

California Government Code Section 65583 requires a jurisdiction's Housing Element include the following components:

- A review of the previous Element's goals, policies, objectives, and programs to ascertain the effectiveness of each of these components, as well as the overall effectiveness of the Housing Element;
- An assessment of housing need and an inventory of resources and constraints related to meeting these needs;
- A statement of goals, policies, and quantified objectives related to the maintenance, preservation, improvement, and development of housing; and
- A policy program that provides a schedule of actions that the City is undertaking or intends to undertake implementing the policies set forth in the Housing Element.

State Requirements

State law requires housing elements to be updated at least every five years (unless otherwise extended by State law) to reflect a community's changing housing needs. A critical measure of compliance with the State Housing Element Law is the ability of a jurisdiction to accommodate its "fair share" of the regional housing needs as established in the Regional Housing Needs Plan (RHNP). The term "fair share" refers to the fair and equitable distribution of growth between cities and unincorporated areas as well as the fair and equitable diversity of different income groups within a community.

General Plan Consistency

The California Government Code requires internal consistency among the various elements of a General Plan. Section 65300.5 of the Government Code states that the General Plan's various elements shall provide an integrated and internally consistent and compatible statement of policy. City staff has reviewed the other elements of the General Plan and has determined that this Housing Element provides consistency with the other elements of the General Plan. The City will maintain this consistency as future General Plan amendments are processed by evaluating proposed amendments for consistency with all elements of the General Plan. The City of Sonora is not recognized as having a disadvantaged population base.

3.2 Needs Assessment

This section analyzes the demographic, household, employment and housing stock statistics and trends of Sonora. It is the basis for the City's housing goals, policies and programs as it identifies housing issues, needs and opportunities as required by State law. Specifically, the information presented in this section summarizes the following:

1. Population and employment trends;
2. Household characteristics analysis;
3. Housing stock characteristics;
4. Special housing needs analysis;
5. Analysis of opportunities for energy conservation in residential development;
6. Analysis of existing housing projects at-risk of converting to non-low income uses; and
7. Projected housing needs, including the City's share of the regional housing needs, progress toward Regional Housing Needs Assessment (RHNA) and documenting affordability based on rents, sales prices, or other mechanisms that ensure affordability.

The Housing Needs Assessment is completed in conformance with Housing and Community Development (HCD) guidelines. The information provided in this analysis is based on the most up-to-date data available from the following sources: Housing and Community Development (HDC) 6th Cycle Data Package; US Census; California State Department of Finance, California Employment Development Department; and the City's Community Development Department.

Population Characteristics

The type and amount of housing needed in a community is largely determined by population growth and various demographic variables. Factors such as age, occupation, and income level of the residents combine to influence the type of housing needed in a community and the affordability of housing provided.

Population Trends

The City's population has experienced a number of changes through the years, but it has not experienced the large increases that other areas of the State have seen. While the population decreased in the 1870s as a result of the waning of the gold mines, overall the population has experienced an increase each year until the 2000's with the exception of the decade between 1910 and 1920 when Sonora experienced an approximate 2% decrease. Sonora's population reached 4,000 in the 1990s and slowly increased till about 2008 when there was a 0.8% decrease. The population has been stable with a small decline since 2010.

Table 3-1: Population Growth Trends

	2010	2018	2019	2010-2019 %Change	2018-2019 %Change
Sonora	4,903	4,887	4,877	-0.01	-0.01
Tuolumne County	55,365	54,721	54,590	-0.01	-0.01

Source: State of California, Department of Finance, E-4 Population Estimates for Cities, Counties and the State, 2010-2019, Census with 2010 Census Benchmark. Sacramento, California, August 2019

Age Characteristics

Housing needs in the community are determined in part by the age characteristics of its current and future residents. Each age group tends to have distinct lifestyle, family type and size, income levels, and housing preferences. As people move through each stage, their housing needs and preferences also change. As a result, evaluating the age characteristics of a community is important in determining and addressing housing needs.

Table 3-2 summarizes the age characteristics of Sonora residents. Approximately 20% of the population is under 18 years old while another approximately 20% is over 65 years old. A majority of the residents of Sonora are adults between the ages of 18 and 65. Table 3-3 shows the distribution of households by tenure and age. Sonora has more households living in renter occupied (59%) housing than owner occupied (41%).

Table 3-2: Population by Age (2017)

	Total	Percent
Total Population	4,824	100
Median Age (years)	40.6	
Under 18	947	19.6
18 and over	3,877	80.4

Employment Market

Employment has an important impact on housing needs to the extent that different occupations and the associated income levels determine the type and size of housing different households can afford. In addition, employment growth is a major factor affecting the demand for housing in a community.

Table 3-4 provides an employment profile of Sonora residents. Sonora's jobs market is varied with workers in a wide variety of jobs. As of 2017, educational / health / social services occupations employed the largest share of City residents. These jobs typically are higher paying which would provide Sonora residents engaged in those occupations with a higher income. Retail trade is the next largest share with 15.8% followed closely by professional, scientific and management and administrative, and arts, entertainment, and recreation and accommodation both of which categories have 13.1% of the workforce.

Table 3-4: Employment by Industry (2017)

Total Employed Population (16 and over)	2,042	100%

Source: State of California EDD, OES Employment and Wages (as of 2019, Sonora is included in the Eastern Sierra-Mother Lode Region)

Table 3-5 provides an annual wage profile for the Eastern Sierra-Mother Lode Region. In 2019, the State of California Employment Development Department combined the Tuolumne County information into the regional category. An analysis of Table 3-4 and Table 3-5 shows that category with the most jobs in Sonora is educational services, and health care and social assistance jobs. The Mean Annual Wage for these job categories ranges from \$100,480 to \$39,766.

According to the California Employment Development Department, Sonora's unemployment rate in August 2019 was 4.4%. The statewide unemployment rate was 4.1%. As noted below, the unemployment in the Tuolumne County region was comparable to the state average with the Mi Wuk Village CDP and Columbia areas having the highest unemployment of over 23% and 11% respectively.

Table 3-6: Unemployment Rates, 2019	
Tuolumne County	4.3%
Sonora	4.4%
Jamestown	3.4%
Columbia	11.6%
Mi Wuk Village	23.5%
California	4.1%

Household Characteristics

There are a variety of sources for the number of households within the city of Sonora (US Census, California Department of Finance, California Department of Housing and Community Development and the City of Sonora Housing and Income Survey). Each source was generated on a specific date with its information reflecting the status at that time, reports a different level of detail and focuses on a specific household analysis. The following information and tables utilize information from all these housing sources in an attempt to give the most inclusive analysis and information. Therefore, the number of households may differ from table to table depending on the source of the information, but each source is noted and the information is accurate as to what that source reported.

“Household” is defined by the US Census as any group of people occupying a housing unit, which may include related family members and unrelated people. A household can be a family, a person living alone, or unrelated persons living together. Household type and size, income level, the presence of special needs populations, and other household characteristics determine the type of housing needed by the residents. The following discussion details the various household characteristics affecting housing needs.

Household Type

According to the 2017 Census Bureau’s Population Estimations based on the American Community Survey (ACS) and as shown in Table 3-7, Sonora was home to 2,523 households, of which 50.7% were families. Families are comprised of married couple families with or without children, as well as other family types such as female-headed families with or without children. The other family category (23.2%) includes both male and female householders where there is not a wife or husband present. Non-families, including singles and other households, made up the remaining 32.1% of households in Sonora.

Table 3-7 Household Characteristics, 2017

Household Type	Number	Percentage
Total Households	2,523	100%
Family Households	1,278	50.7%
Other Family	434	17.2%
Non-Family Households	811	32.1%

Source: American Fact Finder, 2017 ACS

Household Size

Household size has a direct relationship to type of housing. The larger the household the larger the house needed. Overall, Sonora needs more of all types of housing units. The City needs one and two-bedroom units to accommodate the large number of people living alone and the 2-person households. As indicated in Table 3-8 below, the largest number of households in Sonora are 2-person households which is 42% of the households in the City. When combined with the 1-person households this makes up 73% of the City's households. Furthermore, as indicated below, 59% of the households in Sonora are renters. According to the information gathered in the 2019 Housing Survey, there are no vacancies in the multifamily units with many complexes having 3 year waiting lists. The City continues to face a housing shortage and the City has added numerous new programs to this Housing Element update to address the issue.

Table 3-8: Household Size by Tenure (2017)

Household Size	Owner-Occupied	Renter Occupied	Total Units
1-person household	209	426	635
2-person household	433	448	881
3-person household	105	177	282
4 or more person	113	178	291

Source: US Census, American FactFinder

Household Income

Household income is the most important factor affecting housing opportunity, determining a household's ability to purchase or rent housing and balance housing costs with other basic necessities. Income levels can vary considerably among households, affecting preferences for tenure, location and housing type. According to the Census, Sonora's overall median household income was \$42,052. As shown in the table below, the median household income within the City of Sonora is approximately \$12,000 less than the surrounding County households.

Table 3-9: Median Household Income (2107)

Jurisdiction	Median Income
Sonora	\$42,052
Tuolumne County	\$54,325

Source: US Census, American FactFinder

Households Overpaying for Housing

Housing is generally the greatest, single expense for families in Sonora. Current standards measure housing cost in relation to gross household income: households spending more than 30 percent of their income, including utilities, are generally considered to be overpaying or "cost burdened."

The State and Federal governments classify household income into several groupings based upon the relationship to the Area Median Income (AMI), adjusting for household size. The State of California utilizes the following income groups:

- Extremely Low 0-30% AMI
- Very Low 31-50% AMI
- Low 51-80% AMI
- Moderate 81-120% AMI
- Above Moderate over 120% AMI

For purposes of evaluating housing affordability, housing need and eligibility for housing assistance income levels are defined by guidelines adopted each year by the California Department of Housing and Community Development (HCD). For Tuolumne County, the area median income (AMI) for a family of four in 2019 is \$66,700.

Table 3-10: Income Limits, 2019

Income		Household Size						
Category	1 person	2 person	3 person	4 person	5 person	6 person	7 person	8 person
Extremely Low	\$13,950	\$15,950	\$17,950	\$19,900	\$21,500	\$23,100	\$24,700	\$26,300
Very Low	\$23,250	\$26,600	\$29,900	\$33,200	\$35,900	\$38,550	\$41,200	\$43,850
Low	\$37,200	\$42,500	\$47,800	\$53,100	\$57,350	\$61,600	\$65,850	\$70,100
Median	\$46,700	\$53,350	\$60,050	\$66,700	\$72,050	\$77,350	\$82,700	\$88,050
Moderate	\$56,050	\$64,050	\$72,050	\$80,050	\$86,450	\$92,850	\$99,250	\$105,650

Source: California Department of Housing and Community Development, 2019

Approximately 44% of the Sonora owner-occupied households and 8% of the renter-occupied households earned moderate and above moderate incomes. According to Table 3-11, 54.3% of Households that rent are overpaying and 15.8% of owner-occupied Households are overpaying for a total of 1,555 households in Sonora that are overpaying or considered cost burdened by their housing. That means that 70% of the households within the City of Sonora are in the “cost burdened” category.

Housing affordability is an urgent issue in the City of Sonora, regionally and throughout the State. It is a complex issue with multiple factors including demographic factors such as, retirees with fixed incomes and increased health costs, young people burdened with student loan debt and unable to save for down payments, low wage service sector jobs, etc. From the perspective of developers and home builders, the lack of Federal or State funding and / or subsidies to support housing that low income and moderate-income families can afford make construction costs prohibitive.

Table 3-11: Overpayment by Income Category

Total Households Characteristics	Number	Percent of Total Households
Total occupied units (households)	2,220	100.0%
Total Renter households	1,365	61.5%
Total Owner households	855	38.5%
Total lower income (0-80% of HAMFI) households	1,165	52.5%
Lower income renters (0-80%)	900	40.5%
Lower income owners (0-80%)	265	11.9%
Extremely low income renters (0-30%)	435	19.6%
Extremely low income owners (0-30%)	40	1.8%
Lower income households paying more than 50%	575	25.9%
Lower income renter HH severely overpaying	465	20.9%
Lower income owner HH severely overpaying	110	5.0%
Extremely Low Income (0-30%)	300	13.5%

ELI Owner HH severely overpaying	20	0.9%
Income between 30%-50%	155	7.0%
Income between 50% -80%	120	5.4%
Lower income households paying more than 30%	945	42.6%
Lower income renter HH overpaying	745	33.6%
Lower income owner HH overpaying	200	9.0%
Extremely Low Income (0-30%)	330	14.9%
Income between 30%-50%	280	12.6%
Income between 50% -80%	335	15.1%
Total Households Overpaying	1,555	70.0%
Total Renter Households Overpaying	1,205	54.3%
Total Owner Households Overpaying	350	15.8%

Source: 2006-2015 CHAS Data Sets: https://www.huduser.gov/portal/datasets/cp.html#2011-2015_data

Overpaying by Lower and Extremely Low Income Households

The median income of households defined as lower income is \$53,100 or less for a family of four and \$19,900 or less for a family of four is extremely low income. As shown in the following table, lower income households are more likely to be renters with 65.9% in this category renting. Overpaying for housing is a major issue for the extremely-low and low-income households in Sonora. In order to address the needs of these populations, several programs have been included in this Housing Element.

Table 3-12: Lower and Extremely Low Income Household Characteristics			
		Number	Percent
Total Lower Income Households (0-80% of HAMFI)			
	Renters	900	65.9%
	Owners	265	31%
Paying more than 30%			
	Low Income Renters	250	18.3%
	Extremely Low Income Renters	30	2.2%
	Low Income Owners	90	10.5%
	Extremely Low Income Owners	0	
Paying more than 50%			
	Low Income Renters	185	13.5%
	Extremely Low Income Renters	280	20.5%
	Low Income Owners	90	2.9%
	Extremely Low Income Owners	20	10%

Housing Stock Characteristics

This section addresses various housing characteristics and conditions that affect the well-being of Sonora residents. Housing factors evaluated include: housing stock and growth, tenure and vacancy rates, age and condition, housing costs, and affordability, among others.

The following analysis contains a variety of time horizons (annual and decade). With the variations in the housing market, the growth may be averaged over a time period when the timeline is expanded to match the Census data horizons.

Housing Growth, Type and Vacancy

Housing growth in Sonora in the last 8 years between 2010 and 2018 has been practically non-existent with seven new units being constructed during that time as shown in Table 3-15.

Table 3-13: Housing Growth 2010-2018						
	Total Units	Single	Multiple	Mobile Homes	Vacant Units	Vacancy Rate
Sonora 2018	2,470	1,498	949	23	146	3.4%
Sonora 2010	2,463	1,497	944	22	264	10.72%
Tuolumne County 2018	29,103	23,936	1,722	3,445	7,186	3.3%
Tuolumne County 2010	28,781	23,706	1,714	3,361	8,824	30.66%

Source : State of California, Department of Finance, E-5 Population and Housing Estimates for Cities, Counties and the State — January 1, 2011-2018

Single-family detached homes comprised approximately 61% of Sonora’s housing stock in 2018, while multi-family structures comprised another 38% (Table 3-15). Mobile homes represented a smaller 1%.

Vacancy rate is a measure of the availability of and demand for housing in a housing market. The City’s overall vacancy rate was 3.4% in 2018, not noticeably different than the countywide level of 3.3%. As discussed previously, availability of housing stock is an issue in Sonora and surrounding area.

Housing Age and Condition

Housing age is an important indicator of housing condition and quality within a community. If not properly and regularly maintained, housing can deteriorate over time, discouraging reinvestment, depressing neighboring property values and eventually impacting the quality of life in a neighborhood. Thus maintaining and improving housing quality is an important goal for the City.

Table 3-16 provides a breakdown of the housing stock by the year built. A general rule in the housing industry is that structures older than 30 years begin to show signs of deterioration and require reinvestment to maintain the quality. Unless properly maintained, homes older than 50 years require major renovations to remain in good working order. As of 2018, approximately 18% of housing units in Sonora were over 30 years old and 40% were over 50 years old. 16% of Sonora homes have been built since 1990.

Table 3-14: Year Units Built		
Period Built	Number of Units	Percent
2010 or later	7	0.1%
2000 to 2009	271	10.4%
1990 to 1999	150	5.8%
1980 to 1989	292	11.3%
1970 to 1979	319	12.3%
1960 to 1969	347	13.4%
1950 to 1959	413	15.9%
1940 to 1949	166	6.4%
1939 or earlier	636	24.5%
Total	2,594	100%
30 years or older	2,125	18%
50 years or older	1,562	40%

Source: American Fact Finder DP04 2017

The 2019 Housing Survey found that for approximately two-thirds of the housing stock included in the survey did not need repair. Minor repairs were identified in a variety of categories for approximately 15 % of the units. These are common conditions typical of an older housing stock. As indicated in Table 3-16, 40% of the housing stock is older than 50 years. Maintaining these older homes is an important part of the housing stock in Sonora.

Table 3-15 Housing Condition Survey Results (2019)
Number of Units by Housing Condition (% of Total Units – Completed Surveys)

Window Condition			
	No Repair Needed	487	67%
	Minor Repair	134	19%

	No Repair Needed	503	70%
	Minor Repair	201	28%
	Floor Coverings Needed	2	1%
	Structural Repairs Needed	8	1%

Housing Costs

The cost of housing potentially causes housing problems in a community. If housing costs are relatively high in comparison to household income, there will be a correspondingly higher prevalence of cost burden and overcrowding. As discussed previously 70% of the households in Sonora are cost burdened with housing costs. This section summarizes the cost and affordability of the Sonora housing stock to residents.

Sales and Rental Survey

In 2019, there were 37 single-family residential homes for sale for an average amount of \$338,602. Table 3-18 provides a summary of asking prices and rental rates for housing in Sonora. These listings included resale homes. The average asking price for a single-family home was \$434,499 for a one-bedroom unit, \$277,333 for a two-bedroom unit, \$330,044 for a three-bedroom unit, and \$371,590 for a four-bedroom unit.

Apartment rents vary by location as well as the quality and level of amenities available. According to an apartment survey conducted by City staff in 2019, the average asking rents for market-rate apartment units in Sonora are as follows: \$650 for a one-bedroom unit, \$808 for a two-bedroom unit, and \$750 for a three-bedroom unit (Table 3-18). Based on these rents, rental housing on the market are affordable to moderate income households, as compared to the affordable housing costs later shown in Table 3-20. At the time of the survey there was one unit available for rent.

Table 3-16: Market Home Sales and Apartment Rents

Housing Type	Bedrooms	Units Listed	Range	Average
Homes¹	1	2	\$394,000-\$475,000	\$434,499
	2	6	\$179,000-\$379,000	\$277,333
	3	18	\$170,000-\$499,000	\$330,044

Overcrowding

When housing becomes unaffordable to residents in a community overcrowding can occur. Overcrowding can lead to accelerated deterioration of the housing stock and infrastructure.

For purposes of the Housing Element, a housing unit is overcrowded when occupied by more than one person per room, counting bedrooms, living and dining rooms but excluding bathrooms and kitchens. However, some State and federal housing programs use a different definition of overcrowding – a housing unit is considered overcrowded if it is occupied by more than two persons per bedroom plus one extra person.

Overcrowding occurs when housing costs are so high relative to income that families need to double up in a housing unit to afford rents and pay for other basic needs, such as food and medical care. Overcrowding tends to result in accelerated deterioration of homes, a shortage of parking, and additional traffic. Thus, maintaining a reasonable level of occupancy and alleviating overcrowding are critical to enhancing the quality of life in a community.

According to the 2012-2016 ACS Table B25014 data, overcrowding was not a significant issue in Sonora. The overall level of overcrowding in Sonora was less than 1% (49 households) in 2012-2016. Only 9 owner-households (>0.01%) and 40 renter-households (0.02%) were considered overcrowded. Overcrowding rates vary significantly by household income, type, and size. Generally, lower income households and large families exhibit higher levels of overcrowding.

Development of At-Risk Conversions

Housing that receives governmental assistance is often a significant source of affordable housing in many communities. Because of its significance, California Housing Element Law requires all jurisdictions to include a study of all low-income housing units which are at risk to be lost, due to the expiration of affordability restrictions. The law requires that the analysis and study cover a 5-year and 10-year period, coinciding with updates to the Housing Element. The California Department of Housing & Community Development maintains a list of qualified entities on their website at <https://www.hcd.ca.gov/policy-research/preserving-existing-affordable-housing.shtml>. This section of the

Housing Element identifies publicly assisted rental housing in Sonora, evaluates the potential of such housing to convert to market rates during a ten-year planning period (2019-2029), and analyzes the cost to preserve those units.

Assisted Housing Inventory

Table 3-21 is an inventory of publicly assisted rental housing projects in Sonora. A total of 257 assisted rental units are provided within 6 developments, including units assisted through a variety of federal programs. These programs include HUD Section 8 (project-based)¹, Section 515 (rural rental housing and rural cooperative housing), Community Development Block Grants, and previous redevelopment set-aside funds.

Loss of Assisted Housing

Covenants and deed restrictions are the typical mechanisms used to maintain the affordability of publicly assisted housing, ensuring that these units are available to lower and moderate income households in the long term. Over time, the City may face the risk of losing some of its affordable units due to the expiration of covenants and deed restrictions. As the relatively tight housing market continues to put upward pressure on market rents, property owners are more inclined to discontinue public subsidies and convert the assisted units to market-rate housing.

Total	257			

Estimate of Replacement vs Preservation Costs

There are three projects, Blackberry Oaks Apartments, Sonora Garden Apartments and Sonora Terrace Apartments, at-risk within the 10-year planning period totally 122 units. As no housing units are at risk until 2028, it is difficult to estimate

¹ This is project-based Section 8 rental assistance that is tied to the units. It is different from the tenant-based Section 8 Housing Choice Vouchers which is portable with the voucher recipients. For example, a household assisted by the project-based Section 8 program will lose the rental assistance if he/she moves out of the assisted unit. However, a Section 8 voucher recipient can take the voucher and use it to rent different housing units as long as the owners are willing to accept it.

preservation versus replacement costs, as it is very difficult to anticipate what governmental programs will be in place in 2030 to assist with preservation. Likewise, it is very difficult to estimate replacement costs nine years into the future.

Current funding programs that can assist in the preservation of at-risk projects include:

- 1) The Home Program
- 2) Multi-Family Housing Program (MHP)
- 3) Preservation Opportunity Program
- 4) Community Development Block Grant Program
- 5) Low-Income Housing Tax Credit Program
- 6) The Preservation Financing Program
- 7) USDA Section 515 – Rural Rental Housing Program

To maintain the existing affordable housing stock, the City must either preserve the existing assisted units or facilitate the development of new units. State Government Code Section 65863.10 requires owners of federally and state funded affordable housing projects to provide at least a twelve-month notice of contract termination or prepayment of Federal assistance to tenants and public agencies. Depending on the circumstances of at-risk projects, different options may be used to preserve or replace the units. Preservation options typically include: 1) transfer of project to non-profit ownership; 2) provision of rental assistance to tenants using non-federal funding sources; and 3) purchase of affordability covenants. Based on current housing trends, it is assumed to be cheaper to preserve the existing housing units than it would be to build new units.

Identification of Policies to Preserve Affordable Housing

In an effort to preserve all 257 affordable housing units the City will retain Policy 1.4 and 1.6 from the 2014 Housing Element. Additionally, this Housing Element establishes the following new programs in support of unit retention.

- Policy 1.2 Monitor Units At-Risk. 122 units are currently at risk in the City of Sonora. All units are guaranteed to remain affordable through 2029. The City will monitor annually the units that are at risk in the 2030 decade to ensure that they remain affordable.
- Policy 1.5 Work with Potential Purchasers. Establish contact with public and nonprofit agencies interested in purchasing and / or managing units at-risk in the 2029 timeframe to inform them of the status of these projects. Where feasible, provide technical assistance and support to these organizations with respect to acquisition. Consider reducing or waiving development fees associated with preservation or replacement of at-risk units. Assist property owners with grant applications for funding for mortgage refinancing, acquisition, rehabilitation and gap funding for affordable development.

Special Housing Needs Assessment Analysis

Certain groups have greater difficulty in finding decent, affordable housing due to their unique needs and/or circumstances. Special circumstances may be related to one's household characteristics, disability, employment and income, among others. As a result, certain segments of Sonora residents are more likely to be lower income and face housing cost burden, overcrowding, and/or other housing problems.

The State Housing Element law identifies the following "special needs" groups: senior households, disabled persons, large households, single-parent headed households, families and persons in need of emergency shelter, and

farmworkers. The following discussions detail the housing and supportive services needs of each particular group, as well as the major programs and services available to address their needs.

Table 3-18: Special Needs Groups

Special Needs Group		Number	% of Households / Population
Owner-occupied	Senior-Headed	284	14%
Households (65+)			
Renter-occupied	Senior-Headed	213	10%
Households (65+)			
Single-Parent Households		434	21%
Large Households		93	4%
Persons with Disability including persons with developmental disabilities		1,078	52%
Homeless*		367	>1%
Farmworkers*		44	>1%

*Numbers are representative of the surrounding County and not limited to the City of Sonora

Source: US Census Data 2017 and Central Sierra Continuum of Care Point in Time Homeless Count 2017

Senior Households

Senior households typically have special housing needs due to three primary concerns: fixed income, high health care costs, and disabilities. As shown in Table 3-12, 14% of owner-occupied households and 10% of renter-occupied households in Sonora were headed by persons aged 65 and older. Because of physical and/or other limitations, senior homeowners may have difficulty performing regular home maintenance or repair activities. In addition, because many seniors have fixed or limited income, they may have difficulty in making monthly mortgage or rent payments.

Various programs can assist senior needs, including but not limited to congregate care, supportive services, rental subsidies, shared housing, and housing rehabilitation assistance. For the frail elderly, or those with disabilities, housing with architectural design features that accommodate disabilities and senior housing with supportive services can help to ensure continued or extended independent living. Assisted living facilities represent another housing option for seniors in Sonora. These facilities are typically for the more frail elderly and offer daily assistance with personal and household tasks.

There are existing facilities within the City of Sonora that serve the senior population. The Senior Center located on Greenley Road next to the Main Branch of the county library also provides space for the seniors in the community.

Single-Parent Households

Single-parent households require special considerations and assistance because of their greater need for day care, health care and other facilities. Approximately 21% of the Sonora households were headed by single parents in 2017; the majority of which were headed by females (60%). Female-headed households with children often require special consideration and assistance as a result of their greater need for affordable housing, accessible day care, health care and other supportive services. Because of their relatively lower income and higher living expenses, such households usually have more limited opportunities for finding affordable and decent housing.

Sonora was home to 262 female-headed households in 2017, representing 13% of households in the City. Single mothers with children are a particularly vulnerable group because they must balance the needs of the children with work responsibilities. In 2017, 15% of female-headed families with children lived in poverty, compared to 39% of all families. Battered women with children typically comprise a sub-group of female-headed households that are especially in need.

Large Households

Large households are defined as households with five or more members residing in a housing unit. These households constitute a special need group because the supply of adequately sized, affordable housing units in a community is often limited. In order to save for other basic necessities such as food, clothing and medical care, it is common for lower income large households to reside in smaller units, which frequently results in overcrowding². A total of 93 large households lived in Sonora in 2017, 71% of which were renter-households. Large households represented approximately 4% of households in the City.

Housing needs of large households are typically met through larger units with three or more bedrooms, which could reasonably accommodate large families without overcrowding. To address overcrowding, communities can provide incentives to facilitate the development of larger apartments and condominiums with three or more bedrooms for large households or to accommodate multiple roommates. A shortage of large rental units may also be alleviated through the provision of affordable ownership housing opportunities, such as first-time homebuyer programs and self-help housing (e.g., Habitat for Humanity), to move renters into homeownership. Financial assistance for room additions may also help to relieve overcrowding.

Persons with disabilities including persons with developmental disabilities

Persons with disabilities including persons with developmental disabilities have special housing needs because of their generally fixed income, the lack of accessible and affordable housing, and the higher health costs associated with their disabilities. Disabilities are defined as mental, physical or health conditions that last over six months.

An estimated 17% of Sonora's population over 5 years old had one or more disabilities. Among those with disabilities, approximately 34% were seniors (65+). Employment disabilities were the most common among persons aged 5 to 64, closely followed by mental and physical disabilities. Go-outside-home disability and physical disabilities were the most common for persons over 65 years of age (Table 3-13).

Table 3-19: Disabilities Tallied		
Total Disabilities Tallied	814	100%

Self- Care Difficulty	49	6.02%
Independent Living Difficulty	135	16.58%

Source: ACS S1810 (2012-2016)

Several factors limit the supply of housing for persons with disabilities including persons with developmental disabilities, including affordability, accessibility, location, and discrimination. The most obvious housing need for persons with disabilities including persons with developmental disabilities is housing that is adapted to their needs. Most single-family homes are inaccessible to people with mobility and sensory limitations. Housing may not be adaptable to widened doorways and hallways, access ramps, larger bathrooms, lowered countertops and other features necessary for accessibility. The cost of retrofitting a home often prohibits homeownership, even for individuals or families who could otherwise afford a home. Location of housing is also an important factor for many persons with disabilities including persons with developmental disabilities, as they often rely upon public transportation.

Persons with Developmental Disabilities

Senate Bill 812 (SB 812, Ashburn, 2010) requires the City to include in its analysis of “Special Needs Groups” the needs of those with a developmental disability within the community. According to Section 4512 of the Welfare and Institutions Code, “developmental disability” means a disability that originates before an individual attains 18 years of age, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual.

It includes mental retardation, cerebral palsy, epilepsy, and autism. This term also includes disabling conditions found to be closely related to mental retardation or to require treatment similar to that required for individuals with mental retardation, but does not include other handicapping conditions that are solely physical in nature.

Many developmentally disabled persons can live and work independently within a conventional housing environment. More severely disabled persons require a group living environment where supervision is provided. The most severely affected persons may require an institutional environment where medical aid and physical therapy are provided. Because developmental disabilities exist before adulthood, the first issue in supportive housing for the developmentally disabled is the transition from the person’s living situation as a child to an appropriate level of independence as an adult.

Tuolumne County WATCH

WATCH serves developmentally disabled individuals and has clients in Tuolumne and Calaveras Counties. They provide work and life skills training, sheltered employment, transportation and social activities. These services help developmentally disabled individuals to remain as Independent as possible.

Valley Mountain Regional Center

The California Department of Developmental Services (CDDS) currently provides community-based services to persons with developmental disabilities and their families through a statewide system of twenty-one regional centers, four developmental centers, and two community-based facilities. The Valley Mountain Regional Center provides point of entry services for people with developmental disabilities within the counties of Amador, Calaveras, San Joaquin, Stanislaus, and Tuolumne. The center is a private, non-profit community agency that contracts with local businesses to offer a wide range of services to individuals with developmental disabilities and their families.

County of Tuolumne Behavioral Health Department

The County of Tuolumne Behavioral Health Department operates supportive housing for people with mental illness in a downtown location which was opened in 2012. The County Behavioral Health Department successfully utilized California Mental Health Services Act (MHSA) funding to purchase two homes in downtown Sonora to serve 6 people with mental illness. All of the beds are occupied. They provide case management and off-site services, activities and referrals.

There are a number of housing types appropriate for people living with a development disability: rent subsidized homes, licensed and unlicensed single-family homes, inclusionary housing, Section 8 vouchers, special programs for home purchase, HUD housing, and SB 962 homes. The design of housing-accessibility modifications, the proximity to services and transit, and the availability of group living opportunities represent some of the types of considerations that are important in serving this group's need. Incorporating "barrier free" design in all new multi-family housing (as required by California and Federal Fair Housing laws) is especially important to provide the widest range of choices for disabled residents. Special consideration should also be given to the affordability of housing, as people with disabilities may be living on a fixed income.

In order to assist in the housing needs for persons with development disabilities, the City will implement programs to coordinate housing activities and outreach with the Valley Mountain Regional Center, encourage housing providers to designate a portion of new affordable housing developments for persons with disabilities including persons with developmental disabilities, especially persons with developmental disabilities, and pursue funding sources designated for persons with special needs and disabilities.

Homeless

A person is considered homeless who lacks a fixed, regular and adequate night-time residence; and an individual who has a primary nighttime residence that is:

- A) A supervised publicly or privately operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing for the mentally ill); or

B) An institution that provides a temporary residence for individuals intended to be institutionalized; or

C) A public or private place not designed for or ordinarily used as, a regular sleeping accommodation for human beings. Homeless individuals do not include individuals imprisoned or otherwise detained pursuant to an Act of the Congress or a state law (U.S. Code Section 11302).

Homeless individuals within the City include, but are not limited to: victims of domestic violence, persons with mental illness, persons suffering from addiction disorders, those with inadequate incomes, families with single-heads of households, and unaccompanied minors.

The Central Sierra Continuum of Care oversaw the preparation of the Central Sierra 2019 Point-in-Time Homeless Census for Tuolumne County (as part of a tri-county effort). According to the Count, Tuolumne County has 418 homeless people. Approximately 26% of the people identified as homeless were children under 17 years old or younger. Of the three counties involved, Tuolumne County has the most homeless with 45% compared to Amador County (25%) and Calaveras County (22%). According to the Police Chief, approximately 75% of the homeless people counted are in the area of the City. As a regional issue, it is difficult to determine the exact amount within the City as there are homeless encampments along the city limits on both sides of the boundary.

Many individuals and families move in and out of homelessness and shelters over the course of a year. Generally, three types of facilities provide shelter for homeless individuals and families: emergency shelters, transitional housing, and permanent supportive housing:

- **Emergency Shelter:** A facility that provides overnight shelter and fulfills a client's basic needs (such as food, clothing, and medical care) either on-site or through off-site services. The permitted length of stay can vary from one day to six months, depending upon whether the shelter is short-term or long-term.
- **Transitional Housing:** A residence that provides housing for up to two years. Residents of transitional housing are usually connected to rehabilitative services, including substance abuse and mental health care interventions, employment services, individual and group counseling, and life skills training.
- **Permanent Supportive Housing:** Permanent housing that is affordable in the community or service-enriched housing that is linked with on-going supportive services (on-site or off-site) and is designed to allow formerly homeless clients to live at the facility on an indefinite basis.

The most common service needs identified (but unable to obtain) were identified as housing assistance or shelter and employment or employment training. Similarly, the top three services that would have helped prevent homelessness were identified as employment or employment training, housing assistance or shelter and legal assistance.

Table 3-22: Homeless Facilities*

Facility Type	Family Units	Family Beds	Adult Only Beds	Seasonal
Emergency Shelter	22	76	27	0
Transitional Housing	10	32	19	NA
Permanent Supportive Housing	0	0	21	NA
Rapid Rehousing	13	42	28	NA
Total	45	150	95	0

*Note: Numbers are provided for the Tuolumne, Amador, Calaveras, Mariposa Counties Continuum of Care for which Tuolumne County is a participating member. Numbers represent homeless needs for the total Continuum of Care area.

Source: Continuum of Care or HUD; CoC_HIC_State_CA_2017

Homeless Support Services

David Lambert Community Center/Drop-in Center

This facility provides a place for socialization for the mentally ill and other homeless individuals. The center is located in the former Department of Motor Vehicles office at 347 W. Jackson St., Sonora.

American Red Cross

The Tuolumne County office of the American Red Cross assists residents with temporary housing, food, and clothing in response to disasters. In addition to assisting individual households, the American Red Cross has played an important role in the county in response to county disasters, in particular, wildfires.

Churches/Salvation Army/Dorcas Society: Meals/Food Pantries/Clothing/Computer

Other organizations within the City have limited funds set aside for 1-2 night motel accommodations for the homeless (e.g., St. Patrick's Church, the Salvation Army). Free community meals are provided at the Red Church, St. Patrick's Church and at a local coffee house, the Heart Rock Café. Food pantries are available in the City limits at: the Dorcas Society, Red Church, Sonora Baptist Church and St. Patrick's Church. Clothing, linens and toiletries can be obtained in the City at the Dorcas Society, Red Church, St. Patrick's Church and Salvation Army Reach. Computer access is available at the David Lambert Drop in Center in the City and at the main branch of the Tuolumne County Library in Sonora. The Salvation Army Reach program also provides auto repair, assistance with energy and utilities, minor home repairs, transit tickets and related services. The Dorcas Society provides similar assistance with rent and utilities.

Amador-Tuolumne Community Action Agency (ATCAA)

ATCAA offices are based in the cities of Sonora (for Tuolumne County) and Jackson (for Amador County). ATCAA also works with the Calaveras-Mariposa Community Action Agency to implement programs in Calaveras County. ATCAA operates a homeless shelter in the City of Sonora. ATCAA has assisted the homeless in Sonora and Tuolumne County since 1981 and obtained its first shelter in 1984. ATCAA successfully worked with the City to acquire ownership of the existing homeless shelter and undertake shelter rehabilitation. ATCAA provides adults and children with emergency and transitional shelter in Tuolumne County, Homeless Prevention rent and utility assistance and Housing and Budget Counseling.

ATCAA provides a deposit assistance program that provides funding for individuals and families covering the necessary funds required for security deposits on rental units. The program provides an opportunity for people to enter into rental housing who are not able to afford the initial investment of a security deposit and first month rent payment.

ATCAA operates the county food bank, based in Jamestown. The food bank solicits, transports, stores and distributes emergency and supplemental foods to individuals and families. The food bank assists community church pantries with emergency food supplies. ATCAA also implements a Home Energy Assistance Program (HEAP) assisting with energy-saving home improvements such as home weatherization, appliance replacement and providing education on reducing energy costs.

Center for a Non-Violent Community

The Mountain Women's Resource Center has been providing services to victims of domestic violence and sexual assault in Tuolumne County since 1978. Initial funding for a shelter was obtained in 1980. Since that time, shelter usage has increased from 75 women and children in 1981 to an annual population of 200. The shelter is owned by the City of Sonora and is offered to the Center for a Non-Violent Community rent free. The principal funding sources for the shelter are the Office of Criminal Justice Planning, Community Development Block Grants, and fund raising. The average client profile is a white married woman under 30 with at least one child under the age of six, in the very low income category. As with the homeless shelter, clients are offered a variety of counseling services and life skills. The Battered Women's Shelter provides 11 beds and the length of stay is 30 days. The Center for a Non-Violent Community also operates a transitional housing facility in the County which provides 20 beds. This facility was funded with an Emergency Housing and Assistance Program Capital Development loan.

Farmworkers

Farmworkers are traditionally defined as persons whose primary incomes are earned through permanent or seasonal agricultural labor. Permanent farm laborers work in the fields, processing plants, or support activities on a generally year-round basis. When workloads increase during harvest periods, the labor force is supplemented by seasonal labor, often supplied by a labor contractor. For some crops, farms may hire migrant workers.

According to the Census American FactFinder, there were 42 people employed in agriculture, forestry, fishing and hunting, and mining occupations – less than 1% of the City's employed population. Consistent with the 2019-2024 Regional Housing Needs Assessment, the City of Sonora will provide approximately 18% of the county's total housing.

Given the extended distance between the City and agricultural destinations for workers, and that migrant and seasonal workers are often without private transportation; farmworker housing units should be located along primarily public transportation routes which provide regular service to Twain Harte and higher elevations so that workers may meet with other workers to be transported to work sites by their employers. Implementation Program 3.D.j (Facilitate the Provision of Farm Worker Housing) establishes the City's strategy and implementation program removing governmental constraints to the provision of farm worker housing.

Opportunities for Energy Conservation

State law requires local government, in preparing a housing element, to address energy conservation measures with respect to residential developments within their jurisdiction. The City of Sonora has taken several measures to implement energy conservation programs in residential projects. The building orientation, street layout, lot design, landscaping, and street tree configuration of all residential projects are reviewed to maximize solar access and energy conservation.

Energy conservation is achieved through implementation measures on different levels. The first level includes requiring new residential development to meet applicable energy standards of Title 24 of the California Administrative Code. Building additions or alterations must also meet Title 24 standards if they increase the heated or cooled floor space of the building. Builders of these units may achieve compliance either by calculating the energy performance in a prescribed manner or by selecting from alternative component packages that prescribe a fixed method of energy compliance. The City's Building and Code Compliance Division checks all proposed residential units for design and construction compliance with Title 24 energy standards.

The level of energy conservation implementation occurs during review and approval of residential subdivisions to ensure they are designed to maximize passive or natural heating and cooling opportunities. This can be achieved by encouraging

the incorporation of techniques to maximize use of solar energy. Passive cooling opportunities are listed and included in the design of lots to allow the appropriate orientation of a structure to take advantage of prevailing breezes or available shade. Passive heating opportunities include design of lots to allow structures to be aligned in an east-west direction for southern exposure. Section 66473.1 of the State Subdivision Map Act requires that the design of a subdivision for which a tentative map is required shall provide, to the extent feasible, for future passive or natural heating or cooling opportunities in the subdivision. Although no precise standards are given, the State Attorney General issued an opinion in 1981 that “a tentative map of a subdivision must be disapproved if it fails to meet the design requirement of Government Code Section 66473.1.”

Another way to advance energy conservation is through implementation of various programs that encourage weatherization of residential structures (i.e., to improve conditions of existing structures and to decrease their energy demand). The most common techniques for increasing building efficiency are: insulation of ceilings, heating-ventilating air conditioning ducts and hot water heaters; weather stripping and caulking; thermostats at night; low-flow shower heads; window treatment to provide shade; and furnace efficiency modifications. The Department of Energy, Weatherization Assistance Program (DOE WAP) has long served as the core program for delivering energy conservation services to lower-income Californians. The Weatherization Assistance Program reduces the heating and cooling costs for lower-income families by improving the energy efficiency of their homes and ensuring their health and safety. Among low-income households, the program focuses on those with elderly residents, individuals with disabilities, and families with children. The City also provides assistance to lower income homeowners for rehabilitation, including weatherization. In addition, each new residential unit built must have solar included in the build.

Pacific Gas & Electric provides electricity to residential consumers in Tuolumne County, including the City of Sonora. PG&E also participates in several other energy assistance programs which help qualified homeowners and renters conserve energy and control costs. These include:

- The California Alternate Rates for Energy Program (CARE) provides a 20% monthly discount on energy rates to income qualified households, certain non-profits, facilities housing agricultural employees, homeless shelters, hospices and other qualified non-profit group living facilities.
- The Relief for Energy Assistance through Community Help (REACH) Program is administered by the Salvation Army and provides one-time energy assistance to lower-income customers. Those who have experienced an uncontrollable or unforeseen hardship may receive an energy credit up to \$200, credit amount based on the past due amount of the bill. REACH assistance may be available once within an 18 month period, but exceptions can be made for seniors, the physically challenged and the terminally ill.
- Family Electric Rate Assistance (FERA) provides a monthly discount on electric bills for income qualified households of three or more people.

Regional Housing Needs

Future housing need refers to the share of the regional housing need that has been allocated to the City. The State Department of Housing and Community Development (HCD) provides a regional housing goal number. In allocating the region’s future housing needs to jurisdictions, the following factors must be taken into consideration pursuant to Section 65584 of the State Government Code:

- Market demand for housing;
- Employment opportunities;
- Availability of suitable sites and public facilities;
- Commuting patterns;

- Type and tenure of housing;
- Loss of units in assisted housing developments;
- Over-concentration of lower-income households; and
- Geological and topographical constraints.

The RHNP addresses housing issues that are related to future growth in the region. The RHNP allocates to each city and county a “fair share” of the region’s projected housing needs by household income group. The Plan covers an 8.5-year period.

The major goal of the RHNP is to assure a fair distribution of housing among cities and counties, so that every community provides an opportunity for a mix of housing affordable to all economic segments. This share of regional housing needs is known as Regional Housing Needs Assessment (RHNA). RHNA targets are not building requirements, but goals for each community to accommodate through appropriate planning policies and land use regulations. RHNA targets are intended to assure that adequate sites and zoning are made available to address anticipated housing demand during the planning period and that market forces are not inhibited in addressing the housing needs of all economic segments of a community.

The RHNA allocates future (construction) needs by each income category in a way that meets the State mandate to reduce the over-concentration of lower-income households in one community versus another community. According to the RHNP, Sonora’s RHNA is a total of 115 new units for the 2019 to 2024 period. This allocation is distributed into five income categories, as shown in Table 3-23.

Table 3-23: Projected Needs (RHNA)

Jurisdiction	Very Low	Low	Moderate	Above-Moderate	Total
Sonora	25	20	20	50	115
% of Total	22%	17%	17%	43%	100%
Tuolumne Co.	125	93	87	220	525
% of Total	24%	18%	17%	42%	100%
Area Total	150	113	107	270	640

Note: The City has a RHNP allocation of 25 very low income units (inclusive of extremely low income units). Pursuant to State law (AB 2634), the City must project the number of extremely low income housing needs based on Census income distribution or assume 50% of the very low income units as extremely low. Using the 50% assumption method, the City’s RHNP allocation of 25 very low income units may be split into 13 extremely low and 12 very low income units. However, for purposes of identifying adequate sites for the RHNP allocation, State law does not mandate the separate accounting for the extremely low income category.

Public Participation

Public participation in preparation of the Housing Element is required under Government Code Section 65588(c). This Housing Element was developed through the combined efforts of City staff, the City’s Planning Commission, and the City Council. Public input was received through a noticed workshop conducted by the City staff and two Planning Commission meetings. Subsequently, public hearings for adoption of the Housing Element were conducted by the Planning Commission on October 12, 2019 and with the City Council on December 16, 2019. Flyers were distributed around town and a Public Service Announcement was conducted on the local radio station. Notices were published in the Union Democrat. In addition, organizations that represent the interests of low-income and special needs households, or are otherwise involved in the development of affordable housing, were consulted during the preparation of this Housing Element. In addition, the City conducted a Housing Conditions Survey which was

advertised in both the local newspaper and radio encouraging residents to participate. Numerous written comments were received and have been included within the Housing Condition Survey included within Appendix A.

The draft Housing Element has been available in City Hall and was posted on the City's website for review and comments. At the workshop, seven people from the public attended, noting interest in a variety of housing types and the inclusion of residential units in historic structures. Details of the public participation process, including letters, notices and public agency information, can be referenced in the Appendix of this document.

The City will actively engage the community in the progress of the Housing Element implementation, including specifically working with developers, service providers and other community interests to accomplish the various implementing programs.

3.3 Site Inventory Analysis and Zoning

Residential Land Inventory

This residential site inventory identifies parcels potentially suitable for residential use, especially multiple-family units. Staff utilized a recent aerial photo, the parcel inventory form the 2014 Housing Element, and staff knowledge to create an updated map and table with up-to-date vacant land which can accommodate residential development. All parcels are located in developed areas within the City with access to water and sewer service.

RHNP Requirement

Under the Regional Housing Needs Plan (RHNP), Sonora has been assigned a housing need target or its share of regional housing needs. This housing target refers to the City's share of new housing needed to accommodate population and employment growth in the region. As discussed previously, State law requires each community to play a role in meeting the region's housing needs. As such, the City of Sonora housing production goals between 2019 and 2024 have been establish as 115 units. This section discusses how Sonora will provide adequate residential site capacity within the community to accommodate its share of regional housing needs during the planning period as shown on Table 3-23.

Sites for Residential Development: Suitability and Available Land

There is a substantial amount of undeveloped land in Sonora. As part of this Housing Element update, the City identified sites designated for residential development and Table 3-33 lists sites and identifies the zoning, acreage, and unit potential (number of units that can be accommodated) on each site to create an available sites inventory demonstrating that assigned RHNA numbers can be accommodated. Each of the site listed below has undergone analysis as part of a proposed development project that took into consideration the slope, botanical , utility and access issue constraints. The sites available vary in size.

Although the general plan designations allow for a range in density, the City has used the minimum density of the designation or zone as a conservative assumption unless a specific entitlement has been issued.

Site Name	APN	Zoning/ General Pla	Approx. Acreage	Permitted Density*	Unit Potential	Affordability
Lemke	044-430-055	R3/HDR	11.05**	16-21.75	106	Low / Very low
Cuesta Heights	035-070-055	R1/SFR	21.78	7.2	48	Above Moderate
Oak Park	035-190-028 035-170-071	R1/SFR	18.71	7.2	58	50 Units - Moderate 8 Units – Above Moderate

*Based on 11.6 du/acre average development density for existing multi-family developments in the City.

** Based on the site constraints and the topography of the area, the portion of this parcel that falls within the range of 0-15% slope and would be developable is 9.19 acres. The City is working with a developer on the project and has identified project alternatives that would allow a multi-family project. Further, is part of a limited number of sites that has easy access to both sewer and water.

Availability and Adequacy of Public Services and Infrastructure

Infrastructure necessary to support future development is in place within the City of Sonora. All vacant land designated for single-family, medium-high or high-density residential use is served by sewer and water lines, streets, storm drains, telephone, electrical lines or they can be extended to serve the properties. To ensure the availability and adequacy of public facilities and services for future development, the City, along with other providers of public services, will continue to carry out regular infrastructure improvements and upgrading.

As shown in Table 3-24, the City has an adequate array of sites which have the appropriate densities and are unencumbered by development constraints to meet the current Regional Housing Needs Assessment (RHNA) requirements. State law (SB 1019) requires the City to zone an adequate number of sites that permit multi-family residential uses without a conditional use permit to all the City to meet its housing need for very-low and low income households. Multifamily units are permitted by right in the R-3 district. Likewise, state law (Government Code 65583.2(c)(3)) requires sufficient vacant land for lower-income households.

The Lemke site, included in the inventory, is large enough to accommodate 106 units, far in excess of the 45 units (25 very-low and 20 low) in the City's RHNA. This parcel was created in 2012 and rezoned to R-3, as such, it was not included within the City's Cycle 4 Housing Element. In total the City has sufficient vacant property that once developed would result in 212 units across the income categories which is more than enough to satisfy the 115 units in the current RHNA.

CEQA: Likely Level of Environmental Review Required for Each Vacant Parcel

Sites located within the City of would likely be subject to a negative declaration or mitigated negative declaration. Two of the three site have previously gone through the entitlement process and have associated CEQA documentation. The third site has been part of pre-development discussion and has had a number of technical studies completed including biological and cultural resources. Additionally, for affordable housing projects, many of the sites would be exempt from CEQA. None of the vacant parcels are subject to pending litigation on environmental grounds that could impact the availability for development over the next eight years.

Non-Vacant Site Analysis

As the City has adequate vacant sites to accommodate the RHNA for low income units, the City has not included a non-vacant site analysis in the report as it is not necessary.

Financial Resources For Housing

Sonora has access to a variety of existing and potential funding sources available for affordable housing activities. These include programs from local, State, federal and private resources. The following section describes the primary housing funding sources available to the City of Sonora for housing production, rehabilitation, or preservation: HUD CDBG funds, and Section 8 Housing Choice Vouchers program.

Housing And Urban Development (HUD)/Community Development Block Grant (CDBG) Funds

The HUD CDBG program provides funds for a range of community development activities. The program is flexible in that the funds can be used for a range of activities. The eligible activities include, but are not limited to: acquisition and/or disposition of real estate or property, public facilities and improvements, relocation, rehabilitation and construction (under certain limitations) of housing, homeownership assistance, and also clearance activities.

The City will have to submit a competitive grant application to the State Department of Housing and Community Development (HCD) for CDBG funding through the Small Cities program.

Section 8 Housing Choice Voucher Program

The Section 8 Housing Choice Voucher Program is a federal program that provides rental assistance to very low-income persons in need of affordable housing. The program offers a voucher to income-qualified tenants that pays the difference between the payment standard (an exception to fair market rent) and what a tenant can afford to pay (e.g. 30% of their income). A voucher allows a tenant to choose housing that may cost above the payment standard, with the tenant paying the extra cost.

Habitat For Humanity

Habitat for Humanity is a non-profit, faith-based private, non-governmental organization dedicated to building affordable housing and rehabilitating homes for lower-income families. Habitat builds and repairs homes with the partner families and the help of volunteers. Habitat homes are sold to partner families at no profit with affordable, no-interest loans. Volunteers, churches, businesses, and other groups provide most of the labor for the homes. Government agencies or individuals usually donate land for new homes.

3.4 CONSTRAINTS

Land costs, construction costs, and market financing can potentially hinder the production of new residential projects. Although many factors limiting housing production are market driven, jurisdictions have some control in instituting policies and programs to address the constraints or limiting factors.

MARKET CONSTRAINTS

DEVELOPMENT COSTS

Construction costs vary widely according to the type of development, with multi-family housing generally less expensive to construct than single-family homes. However, there is wide variation within each construction type, depending on the size of unit and the number and quality of amenities provided, such as fireplaces, swimming pools, and interior fixtures among others.

Land costs in Sonora is generally less than in other parts of the State. Data gathered from Trulia.com in August 2019 indicates that land in Sonora ranges from \$28,900 for 0.83 acres to \$595,000 for 17.96 acres (Table 3-24).

Table 3-25: 2019 Land Costs	
Lot Size (ac)	Listing Price
0.33	\$59,000
0.46	\$105,00
0.40	\$74,000
0.35	\$49,500
0.83	\$28,900
17.96	\$595,000
0.25	\$34,900
2.99	\$119,000
8.89	\$139,000
2.99	\$135,000
0.32	\$72,500
0.39	\$79,500
10	\$249,900
9.34	\$249,000
6.49	\$149,000

Source: Trulia.com, August 2019

Mortgage And Rehabilitation Financing

The availability of financing affects a person's ability to purchase or improve a home. Under the Home Mortgage Disclosure Act (HMDA), lending institutions are required to disclose information on the disposition of loan applications by the income, gender, and race of the refinancing, whether financed at market rate or with government assistance.

Table 3-26 summarizes the disposition of loan applications submitted to financial institutions for home purchase, refinance, and home improvement loans within Tuolumne County in 2017. Included is information on loans for home improvements, home purchase and refinancing.

Table 3-26: Home Loans in Tuolumne County*

Loan Purpose	Property Type	Number
Home Improvement	1-4 family dwelling	7
Home Purchase	Manufactured housing	3
Home Purchase	1-4 family dwelling	90
Refinancing	Manufactured housing	2
Refinancing	1-4 family dwelling	70

Source: Home Mortgage Disclosure Act (HMDA) data 2017

*Census Tracts that include the city limits of Sonora

Home Purchase Loans

In 2017, a total of 165 households applied for loans to purchase homes in Tuolumne County within the Census Tracts where Sonora is located. To be eligible for government backed loans such as FHA and VA loans, residents must meet the established income standards and the home prices must not exceed a certain limit. Of the 165 loan applications 5 were for manufactured homes. The data was provided on the Census Tract level and was unavailable at the more specific City level so some of these households could be located outside of the city limits of Sonora.

Home Improvement Loans

The smallest number of loans during this time period were for home improvement loans. The small number of loans may be explained by the nature of these loans. Whereas the common home equity line of credit is secured by equity in a home, most home improvement loans are unsecured loans and can be more risky for lenders.

To address potential private market lending constraints and expand home improvement opportunities, the City of Sonora offers and/or participates in a variety of programs. Such programs assist lower and moderate income residents by increasing access to favorable loan terms to improve their homes.

Governmental Constraints

Local policies and regulations can impact the price and availability of housing and in particular, the provision of affordable housing. Land use controls, site improvement requirements, fees and exactions, permit processing procedures, and various other issues may present constraints to the maintenance, development and improvement of housing. This section discusses potential governmental constraints in Sonora.

Land Use Controls

The Land Use Element sets forth City policies for guiding local land use development. These policies, together with existing zoning regulations, establish the amount and distribution of land allocated for different uses. Table 3-26 shows the land use categories in Sonora that permit residential uses. The City of Sonora does not have an inclusionary provision in the Zoning Ordinance for low income housing.

Table 3-27: Land Use Categories Permitting Residential Use

General Plan Designation	Zoning District	Density
Estate Residential - ER	Agricultural/Residential - AR Residential Estate - RE	1 unit / acre
Single-Family Residential - SFR	Single-Family Residential - R-1	1 unit / 6,000 sq.ft.
Medium Density Residential-MDR	Limited Multifamily Residential - R-2	1 unit / 4,000 sq.ft.
High Density Residential -HDR	Multifamily Residential - R-3	1 unit / 2,000 sq.ft.
Historic Mixed Use -HMu	Single-Family Residential - R-1	1 unit / 6,000 sq.ft.
Historic Mixed Density Residential -HMR	Limited Multifamily Residential - R-2 Multifamily Residential - R-3	1 unit / 4,000 sq.ft. 1 unit / 2,000 sq.ft.
Mixed Use - MU	Planned Development -PD	Varies by proposal, but averages 4.3 units/acre
Commercial	Commercial	No limit on the number of units above the ground floor

Residential Development Standards

The City regulates the type, location, density, and scale of residential development primarily through the Zoning Ordinance. Zoning regulations are designed to protect and promote the health, safety, and general welfare of residents as well as implement the policies of the General Plan. The Zoning Ordinance also serves to preserve the character and integrity of existing neighborhoods. The Ordinance sets forth specific residential development standards, which are summarized in Table 3-27.

Generally, development standards can limit the number of units that may be constructed on a particular piece of property. These include density, minimum lot and unit sizes, height, and open space requirements. By limiting the number of units that could be constructed, the per unit land costs would necessarily be higher and, all other factors being equal, result in higher development costs that could impact housing affordability.

Table 3-28: Parking Zoning Requirements

Residential Use Type	Parking Requirements
Single-family and Multifamily Dwelling with Two to Four Units	Two stalls per Dwelling Unit
Multifamily Dwelling with Five or More Units	1.5 stalls per Dwelling Unit for studio, one and 2 bedroom units, 2 stalls per unit for Three or More Bedrooms, no guest parking is required
Roominghouse, Boardinghouse, Motel, Hotel	One stall for Each Unit

Overall, development standards in Sonora are comparable to similar communities. To facilitate affordable housing development, the City offers a variety of incentives, including reduction/waiver of parking requirements. Specifically, for apartment units that are affordable to lower income households, the requirement for two spaces per unit and visitor parking is waived at the request of the applicant. Pursuant to State Density Bonus law (SB 1818), projects meeting the requirements of the Density Incentive Program are eligible to receive density increases, use of State parking standards, and may also receive additional regulatory concessions.

Table 3-29: Residential Development Standards					
Zoning District	Maximum Building Height	Minimum Lot Area	Minimum Lot Width	Setbacks (ft); Front, Side, Rear,	Maximum Lot Coverage
AR	35ft/2 stories	5 acres	150 feet	50, 20,50	None
RE	35ft/2 stories	1 acre	100 feet	20, 10,30	35%
R1	35ft/2 stories	6,000 sq.ft.	60 feet	10, 10% or 10 ft, 20	35%
R2	35ft/2 stories	5,000 sq.ft.	50 feet	10, 10% or 10 ft, 15	50%
R3	35ft, higher with use permit	6,000 sq.ft.	60 feet	10, 5, 10, +5 ft for additional stories over 2 stories	<u>50%</u>
PD	Varies	Varies	Varies	Varies	Varies

Note: Multifamily residential is also allowed in the CO-Tourist and Administrative zone and the C-Commercial zone.

PD: The underlining combining district regulations apply.

Flexibility in Development Standards

The City offers various mechanisms to provide relief from development standards that are typically required of all residential projects under the Zoning Ordinance. These mechanisms include the Density Bonus and Planned Development (PD) Zone.

Density Increase Incentive Program: To facilitate the development of housing for lower and moderate income households, the City offers the Density Increase Incentive Program. Under this program, the City may offer a density increase over the otherwise maximum allowable residential density of a location. Additional incentives may also be provided, including the use of federal and State funds when available. SB 1818 and SB 435 changed the State Density Bonus Law to allow a bonus of up to 35% and other incentives at the request of applicants who restrict a portion of proposed units for lower or moderate income households consistent with State law. In addition, in compliance with State law, the City allows for a density bonus for projects that will provide senior housing.

Planned Development or PD Zone / Mixed Use Areas: The PD zone was adopted in order to provide for the efficient and economical use of existing buildings, structures and land. It is intended that the PD zone be combined with other districts to allow for flexibility in the enforcement of land use regulations. Various land uses may be combined in a planned development zone, including combinations of residential, commercial, industrial, utility, institutional, education, cultural, recreational, and other uses. The practical (i.e., likely) density of development on multi-family residential land (or land designated Planned Development used for multi-family residential developments) in the City of Sonora can be estimated to be: 13.7 dwelling units per acre. In general, older apartment complexes have higher densities (11-81 du/acre) and more recent apartment complexes have lower densities (10-13 du/acre). Older apartment complexes tend to have relatively narrow ingress and egress that may present constraints under current safety standards or older complexes have on-street parking—also potentially a constraint. Therefore, the most likely yield is projected to be somewhat lower than 13.7 dwelling units per acre, or 11.6 dwelling units per acre (based on those projects most recently approved). Based on

calculations for single-family residential yields and these high density multi-family yields, medium density multi-family yields are expected to be approximately 7.7 dwelling units per acre.

The General Plan Land Use Element has a designation for Mixed Use. This designation was developed to encourage development which creates a diverse, walkable, compact, and vibrant project with integrated design compatible with the physical characteristics of the property. Since Sonora is located in a rural area and has a diverse topography, this land use designation provides for a greater range of development and density with a reduction in lot area, setbacks, lot width and an increase in lot coverage and building height. The current implementing district for this designation is the Planned Development or PD Zone.

Provisions for a Variety of Housing

Housing element law specifies that jurisdictions must identify adequate sites to be made available through appropriate zoning and development standards to encourage the development of a variety of housing types for all economic segments of the population. This includes single-family homes, multi-family housing, second units, mobile homes, emergency shelters and transitional housing, among others. Table 3-30 below summarizes the various housing types permitted within the City's zoning districts. Besides single-family homes, the City provides for various other housing types to meet the special needs of the community, including persons earning lower income, seniors, the disabled, the homeless, and agricultural workers, among others.

Table 3-30: Housing Types Permitted by Zone	
Single-family**	AR, RE, R-1, R-2, R-3, CO, PD
Secondary Unit	AR, RE, R-1, R-2, R-3, CO, PD
Single Room Occupancy Units	R-2, R-3, CO, C, PD
Mobile Home Parks	CO ***
Manufactured Homes	AR, RE, R-1, R-2, R-3, CO, PD
Child Care Facilities 7+ persons*	C, CG, CO, ML
Duplexes	R-2, R-3, PD
Apartments	R-2, R-3, CO, C, PD
Emergency Shelters	C***

*** Requires a Use Permit (remaining are allowed by right in the identified zoning district)

**Community Care Facilities and Transition Housing are permitted in the same areas as other similar residential uses.

*Facilities less than 6 people are permitted in all districts that residential uses are allowed in

Single Family Homes

Single family homes are permitted within all residential zones. As discussed below, manufactured homes are likewise permitted in all zones that allow single family homes and are permitted as single family homes.

Accessory Dwelling Units

Second units are a permitted use in all residential zoning districts where a single-family residential unit is permitted. There are significant opportunities for secondary units as they are permitted by right where single family homes are allowed.

Mobile Home Parks

Mobile homes offer an affordable housing option to many low and moderate income households. According to the State Department of Finance (2017), approximately >1% of Sonora's housing stock consists of mobile homes. Mobile home parks are permitted in the CO zone with the approval of a use permit, subject to the following criteria:

- A minimum of 3 acres
- Minimum area of 3,000 square feet per mobile home site, exclusive of the roadway
- One community open space of a minimum 200 square feet per mobile home site
- Mobile home should be set back a minimum of 5 feet from the interior roadway
- Solid wall or fence six feet high on project boundaries
- No structure within 6 feet of the mobile home
- Roadway and public utilities provided to the mobile home sites.

Manufactured Housing/Mobile Homes

Manufactured housing units/mobile homes are permitted within all single-family residential districts and should comply with all of the following criteria:

- Only be used as a single-family residence
- Subject to provisions of zoning applicable to a residential structure
- Attach to a permanent perimeter foundation system
- Minimum width of twenty feet
- Compatibility with the architectural design of two-thirds of conventional homes within two hundred feet:
 - Pitched roof
 - Eave overhangs
 - Roofing material
 - Siding material
 - Number of stories

Community Care Facilities

Sections 5115 and 5116 of the California Welfare and Institutions Code declare that mentally and physically disabled persons are entitled to live in normal residential surroundings. The use of property for the care of six or fewer disabled persons is a residential use for the purpose of zoning. A State-authorized, certified or licensed family care home, foster home, or group home serving six or fewer disabled persons or dependent and neglected children on a 24-hour-a-day basis is considered a residential use that is permitted in all residential zones.

The City of Sonora does not currently define group quarters (group homes for the disabled) nor does it specify zoning districts for the location of these facilities. Currently the City does not distinguish between these uses and other residential uses in residential districts. The City will continue to comply with State law with regard to group homes and State licensed community care facilities and group home residency among unrelated persons.

Multifamily Housing

According to the Census (2019), multi-family housing made up approximately 38% of the existing housing stock in Sonora. The Zoning Ordinance expressly permits multifamily residential in the R-2, R-3, CO and C zones. They may also be included within a Planned Unit Development (PD). Multifamily units are allowed above the ground floor in the downtown. The

downtown area consists of the area designated as the Historic Area which is all property between Elkin Street, Church Street, Stewart Street and Green Street. This area includes the historic multi-story buildings facing North Washington Street. The Zoning Ordinance allows for an unlimited number of units above the ground level. Many of the existing structures in this area have space on the second floor for residential units that is used for office space or is currently vacant. Approximately 75 buildings are located within this Historic Area that could have residential units on the upper floor.

Being a historic community that relies heavily on tourism, new multifamily residential projects require a site plan review. This process has fee of \$950 and requires the project layout to be approved by the Planning Commission. The City of Sonora Zoning Ordinance requires a site plan for any new development. Due to this requirement most all development related projects are heard before the Planning Commission. Therefore, unlike in many other cities, the public meeting and public review process for development projects is a common occurrence and does not bring undue focus to multi-family projects. The City's site plan/design review process does not change the density of a project that would be allowed, but instead focuses on the integration of the project with historic context of the overall City to ensure that new projects fit within the aesthetics of the community. Given the City's success in providing multi-family housing, development standards and permit processing procedures are not unduly onerous or serve to constrain multi-family housing development. The City of Sonora is requesting funding through SB2 to develop Design Guidelines that would provide guidance in developing new projects and would allow some projects to be approved ministerially depending on the improvement.

Farmworker Housing

Despite the limited number of farmworkers in the City and surrounding area, the City allows employee housing, including housing for farmworkers, consistent with Health and Safety Code Section 17021.5 and 17021.6. The City has no strictly agricultural only land use designation. Correspondingly, the Zoning Ordinance does not expressly address housing for agricultural workers. According to the Housing Survey, 2.3% of Sonora residents were employed in agriculture, forestry, fishing and hunting, and mining. The majority of farmworkers in Tuolumne County are employed in reforestation after timber harvesting. Reforestation activities generally occur in the county's higher elevations (above 3,000 feet) and are often seasonal. As a result, the demand for farm worker housing for those employed in reforestation activities is normally greatest at elevations of 3,000 feet and above.

In contrast, many of the county's non-forest agricultural crops can be found below 3,000 feet, but not necessarily within the city limits. Therefore, the primary emphasis on farm worker housing in the City of Sonora is focused on the provision of housing for farm workers employed in the production of non-forest crops and farm commodities (e.g., grapes, apples, turkeys). Within the city limits, households associated with agricultural workers are most likely to have large households. The City does provide opportunities for multifamily housing and a variety of housing types for the larger family households.

Emergency Shelters

An emergency shelter is a facility that provides shelter to homeless families and/or homeless individuals on a limited short-term basis. The City's Zoning Ordinance permits emergency shelters via a use permit in the Commercial (C) zone. Currently there is approximately 56.59 acres of vacant land available in those zoning districts where these facilities would be permitted as a residential use. The vacant land is more than adequate to meet the community's need for emergency shelters. These facilities would be located in areas with access to supportive health, welfare, social, employment, and transportation services.

Transitional and Supportive Housing

The City's Zoning Ordinance treats transitional and supportive housing in all residential and commercial zoning districts as regular residential use and subject only to those restrictions that apply to other residential uses of the same type in the same zone. Along with group quarters with beds, single-family homes, and multi-family apartments and single room occupancy units address the housing needs of extremely-low households.

Traditional single and multi-family units being used as transitional and supportive housing meeting the H&S Code definitions will be treated as regular residential uses and permitted according to the same restrictions for similar uses in the same zone. Currently, Sierra Hope, a local non-profit, is working in cooperation with private property owners and the County Behavior Health to provide Supportive Housing.

Low-Barrier Navigation Centers and Supportive Housing

AB101 requires that Low-Barrier Navigation Centers are a use by right in areas zoned for mixed use and nonresidential zones permitting multifamily uses. AB 2162 requires supportive housing projects meeting specific criteria are a by right use in zones where multifamily and mixed uses are permitted, including nonresidential zones permitting multifamily uses. The City will review its zoning code and approval processes, and revise them as needed to comply with AB101 and AB2162.

Single Room Occupancy Units (SROs)

An SRO unit is a one-room unit intended for occupancy by a single individual. It is distinct from a studio or efficiency unit, in that a studio is a one-room unit that must contain a kitchen and bathroom. Although an SRO unit is not required to have a kitchen or bathroom, many SROs have one or the other. This housing type along with the Transitional and Supportive Housing and multifamily units address the housing needs of extremely low-income households. Even prior to AB2634, Sonora has a long history of providing SROs thorough the use of Roominghouses and Boardinghouses which are permitted in the Limited Multifamily Residential (R2), Multifamily Residential (R3), Tourist and Administrative (CO), and Commercial (C) zones. They may also be included within a Planned Unit Development (PD).

Transient Use Ordinance

The City of Sonora allows for the transient use of either rooms or whole units. The City currently has 19 transient use permits. At this time there is not a limitation on the number of permits that are issued. Some of the permits are for individual rooms within a shared house and others are for the entire unit. At this time, the City does not see this as having a negative impact on available housing due to the low number of units. However, the City will continue to monitor the permits and reevaluate if the number of permit requests increase substantially.

Development Permit Procedures

The processing time needed to obtain development permits and required approvals is commonly cited by the development community as a prime contributor to the high cost of housing. The development process begins with submittal of the formal planning application along with the proper documents and fees. The Community Development Department accepts the application and is responsible for routing it to other City departments and outside agencies for review and comment. The Community Development Department is also responsible for keeping the applicant informed about any significant comments and requirements or conditions received from other departments and agencies. In addition, the Community Development Department is responsible for determining the type of environmental document that would be needed for the project.

For applications, such as multi-family projects and planned development projects which plan to vary the regulations, that require a hearing before the Planning Commission or City Council, staff will discuss the staff recommendation and schedule the public hearing. As discussed previously, the City of Sonora's fees are nominal (\$950) and do not create an obstacle to development. Projects that have been determined to have potential environmental impacts (i.e., not exempt from the California Environmental Quality Act (CEQA)) will not be scheduled for a public hearing until after the appropriate environmental document has been prepared, circulated for public review and finalized. The applicant or a designated representative must be present at any hearing to explain requests and to answer questions. A favorable decision frequently includes conditions of approval that are necessary to carry out the provisions and intent of the Zoning Ordinance.

If an application included a tentative subdivision or parcel map that was approved during the public hearing process, the applicant can submit the final map, grading plans, and final improvement plans to the Engineering Division for plan check. The Engineering Division reviews the plans for compliance with City engineering standards and to ensure that all relevant Planning Commission or City Council conditions imposed on the project have been included. The map and plans are also routed to other appropriate departments such as fire and utility agencies for review and comment as applicable.

After the public hearing for a building project, the applicant's architect and/or engineer can submit working drawings to the Community Development Department for plan check. The Community Development Department is responsible for routing the plans to other appropriate departments for review and comment. Developers are permitted to submit building plans to the Community Development Department prior to the public hearing; however, they do so at their own risk as the reviewing body may reject the proposal or require revisions to the plan set.

Once the necessary permits have been obtained from the Community Development Department and construction commences, the staff is responsible to inspect the development for the following:

- Compliance with conditions of approval imposed by the City Council and Commission;
- Compliance with the Zoning Ordinance;
- Compliance of architectural detail, materials and colors as approved;
- Compliance with requirements for screening of mechanical equipment, outdoor lighting fixtures, landscape completion, parking requirements and signage; and
- Compliance with environmental mitigation imposed on the project.

When the permitted work is complete, the applicant requests a final inspection from the Community Development Department. A staff planner will visit the project to ensure that all Planning provisions have been completed. A similar Fire Department and Engineering Division inspection may also be required. Once completed, final clearance for issuance of a Certificate of Occupancy is given.

As indicated in Table 3-31, the planning processing time is approximately four to six months for apartments. These are reasonable timeframes, especially compared to communities where it could take years to process and approve multi-family developments. Sonora's development permit procedures are necessary to ensure proposed projects meet the City's established standards and regulations and do not unduly constrain or delay the development of housing.

The City has not had much development in the last decade. The last parcel map that was processed by the City took approximately six months from time of submission to recordation of the final map. Building permits were pulled within a month of final entitlement for a low income single family house on the newly created parcel.

Table 3-31: Development Review Process		
Entitlement	Processing Time	Discretionary or Ministerial
General Plan Amendment	2-3 months	Discretionary
Zone Change	2 months	Discretionary
Tentative Subdivision Map	2-6 months	Discretionary
Site Development Permit	2-5 months	Discretionary
Final Subdivision Map	2 months	Ministerial
Design Review Permit	1 month	Discretionary
Conditional Use Permit	1-3 months	Discretionary
Plan Check / Building Permit	1-3 days	Ministerial

SB35

SB35 provides provisions for streamlining projects based on a jurisdiction's progress towards its RHNA and timely submittal of the Housing Element Annual Progress Report. Sonora has timely submitted their Housing Element Annual Reports, however, as discussed previously, there has been a very limited number of housing units built in the last decade. When jurisdictions have insufficient progress toward their Above Moderate income RHNA, these jurisdictions are subject to the streamlined ministerial approval process (SB35 (Chapter 366, Statutes of 2017) streamlining) for proposed developments with at least 10% affordability. However, since the majority of the City of Sonora is with the Very High Fire Risk Area as designated by the State, only the very small portion of the City (primarily the already developed Downtown core) is eligible for this streamlining. A program has been added to address the SB35 provision where it would be applicable.

SITE IMPROVEMENTS, DEVELOPMENT FEES AND EXACTIONS

For large subdivisions, the City requires the construction of reasonable on- and off-site improvements as permitted by the Subdivision Map Act. Typical improvements required of a developer include:

- Grading and improvement of public and private streets including surfacing, curbs, gutters, sidewalks, street lighting, street name signs, and necessary barricades or traffic safety devices;
- Storm drainage and flood control facilities within and outside of the subdivision (when necessary) to carry storm runoff both tributary to and originating within the subdivision;
- A public sewage system that meets public sewer system standards;
- A water supply system providing an adequate supply of potable water to each lot and fire hydrant within the subdivision;
- Fire hydrants and connections of the type and at locations specified by the Fire Department; and
- Public utility distribution facilities including gas, electric, telephone and cable television necessary to serve each lot in the subdivision.

Specific standards for design and improvements of subdivisions must be in accordance with the applicable sections of the General Plan, Specific Plans, Zoning Ordinance, Subdivision Ordinance, other requirements of the City Engineer and each applicable utility provider.

In addition to improvements and dedication of public land, residential developers are subject to a variety of fees and exactions to process permits and provide necessary services and facilities as allowed by State law. In general, these development fees can be a constraint to the maintenance, improvement, and development of housing because the additional cost borne by developers contributes to overall increased housing unit cost. However, the fees are necessary to maintain adequate planning services and other public services and facilities in the City.

The City's development impact fees are summarized in Table 3-32A. These fees are levied to offset the cost of serving new development with parks, roadways, drainage, and public facilities. Certain fees are set by regional agencies and are beyond the control of the City. Table 3-32B summarized the planning fees the City of Sonora charges for the processing of development projects. The City has adopted a three year implementation plan for full cost recovery. The City recently adopted these new fees as the City had not updated some of the fees since the 1980s and was greatly subsidizing development projects since the old fees did not even cover the cost of the public hearing notices being published in the local newspaper.

The City's fees are evaluated annually and adjusted as necessary to reflect the costs of services, consistent with State law. The City recognizes the financial impact of development fees on affordable housing development. As available, affordable housing funds from various federal, state and local funding sources may be used to reduce or offset fees and assist in the construction and/or acquisition/rehabilitation of affordable housing.

Table 3-32A: Development and Mitigation Fees				
Name of Fee	Single-Family Residential	Multi-Family Residential / per unit	Mobilehome	Second Unit
TUD Water	\$1,465.00	\$1,268.00	\$1,465.00	\$1,268.00
TUD Sewer	\$3,800.00	\$3,068.00	\$3,800.00	\$3,068.00
County Services	\$988.06	\$988.06	\$988.06	\$988.06
Impact Mitigation Fee				
Traffic Impact Mitigation Fee	\$3,724.00	\$2,697.00	\$3,724.00	\$2,697.00
Encroachment Permit	\$100.00	\$100.00	\$100.00	\$0.00
Building Permit	\$3,564.00	\$2,858.00	\$2,000.00	\$2,300.00
School Fee*	\$5,640.00	\$2,008.00	\$2,008.00	\$4,512.00**
Total	\$18,264.06	\$12,056.06	\$13,644.06	\$12,647.06

Based on \$300,000 valuation
**School fees are \$3.20 per square foot and are collected by the School District*
***Based on 1,200 square feet second unit*

Table 3-32B: Planning Fees 3 Year Implementation Plan				
Fee Name	Prior Fee / Deposit	Current Fee	Year 2 Fee	Year 3 Fee
General Plan Amendment (Text)	\$590	\$961	\$1,332	\$1,705
General Plan Amendment (Map)	\$590	\$1,079	\$1,568	\$2,057
Zoning Amendment	\$590	\$1,026	\$1,462	\$1,898
Planned Development (PD)	\$590	\$1,386	\$2,182	\$2,980
Planned Development Review	\$430	\$1,078	\$1,726	\$2,374
Use Permit	\$325	\$933	\$1,541	\$2,149
Variance	\$325	\$902	\$1,479	\$2,057

Site Plan	\$240	\$950	\$1,660	\$2,372
Design Review	\$240	\$428	\$616	\$805
Development Agreement	\$590 plus cost of City Attorney and City Engineer	\$2,118 plus cost of City Attorney and City Engineer	\$3,646 plus cost of City Attorney and City Engineer	\$5,175 plus cost of City Attorney and City Engineer
Landscape Plan Review	\$50	\$233 plus Landscape Arch. fee	\$416 plus Landscape Arch. fee	\$600 plus Landscape Arch. fee
Land Divisions				
Tentative Parcel Map (4 parcels or less)	\$325 -2 lots \$375 -3 lots \$590 -4 lots	\$1,088 -2 lots \$1,138 -3 lots \$1,353 -4 lots	\$1,850 -2 lots \$1,900 -3 lots \$2,116 -4 lots	\$2,615 -2 lots \$2,665 -3 lots \$2,880 -4 lots
Tentative Subdivision Map	\$590 +\$5 a lot	\$1,909	\$3,228	\$4,547
Vesting Tentative Subdivision Map	\$590	\$2,232	\$3,874	\$5,517
Final Map (Parcel)	\$125	\$448	\$771	\$1,094
Final Map (Subdivision)	\$125 +\$5 a lot	\$561	\$997	\$1,433
Boundary Line Adjustment (Lot Line Adjustment)	\$590	\$867	\$1,144	\$1,423
California Environmental Quality Act – no change. Continue to charge cost from consultant plus 10% admin fee				

Building permit fees already are adjusted for the size of the home. Based on these factors, permit fees and mitigation fees in the City are not considered a constraint to the development of housing for all income levels.

Building Codes and Enforcement

The California Building Codes establish standards and require inspections at various stages of construction to ensure code compliance and minimum health and safety standards.

The City's Community Development Department carries out code enforcement and inspection activities as a means to preserve and maintain the livability and quality of neighborhoods. The City does not have a formal code enforcement program and code enforcement occurs only on a complaint basis. The part-time City Building Inspector is responsible for inspecting the property after a complaint is received. The majority of the complaints the received by the City are for tenant based properties and tenants are advised of their rights at the time of the complaint. They are also provided with Fair Housing information and with the contact information for those agencies within Tuolumne County who provide rental assistance. The property owner/landlord is also notified about any code violations are required to bring the property into compliance.

City staff investigates violations of property maintenance standards as defined in the Municipal Code as well as other complaints. Although these standards and the time required for inspections increase housing production costs and may impact the viability of rehabilitation of older properties which are required to be brought up to current code standards, the intent of the codes is to provide structurally sound and safe housing.

Housing for Persons with disabilities including persons with developmental disabilities

Both the federal Fair Housing Amendment Act (FHAA) and the California Fair Employment and Housing Act direct local governments to make reasonable accommodations (i.e., modifications or exceptions) in local zoning laws and other land use regulations when such accommodations may be necessary to afford disabled persons an equal opportunity to use and enjoy a dwelling.

Building Code

The City enforces the 2019 California Green Building Codes, which are based on the International Building Codes. The City's building code requires new multi-family residential construction to comply with FHAA, which specifies that ground floor dwelling units in new developments must be adaptable to the physically disabled. The requirements include: 1) adaptive design features for the interior of the units; 2) accessible public use and common use areas; and 3) sufficiently wider doors to allow wheelchair access.

Reasonable Accommodation Procedures

Pursuant to the FHAA, a disabled person or representative may request reasonable accommodation relating to the various land use, zoning, or building codes, rules, and policies, practices, and/or procedures. For rehabilitation projects, such as installation of ramps or interior modifications, the City processes these requests for reasonable accommodation over the counter. No special review is required and therefore, will not constrain the rehabilitation of housing. Some projects require modifications to development standards to accommodate persons with disabilities including persons with developmental disabilities. The City reviews requests for reasonable accommodation at the staff level. Often requests are processed within one week. Furthermore, the City provides zoning flexibility for rehabilitation of existing nonconforming housing. Some requests for reasonable accommodation may be processed under these provisions.

The City will continue to place literature regarding the extent of and procedures for requesting reasonable accommodation at public counters. The City will also continue to monitor its development codes and procedures to ensure that no conditions exist to unduly constrain the development of housing for persons with disabilities including persons with developmental disabilities. When constraints are identified, the City will work to mitigate or eliminate such constraints.

Zoning Ordinance

The enforcement of the Sonora Zoning Ordinance complies with the Lanterman Developmental Disabilities Services Act in addressing community residential care facilities for persons with disabilities including persons with developmental disabilities. Community care facilities serving six or fewer residents are permitted by right in all residential zones. However, the Zoning Ordinance will be revised to specifically list this as a permitted use.

Definition of Family

Local governments may restrict access to housing for households failing to qualify as a "family" by definition specified in the Zoning Code. Specifically, a restrictive definition of "family" that limits the number of and differentiates between related and unrelated individuals living together may illegally limit the development and siting of group homes for persons

with disabilities including persons with developmental disabilities but not for housing families that are similarly sized or situated.³ The City of Sonora will amend its Zoning Ordinance to remove the definition of “family”.

Conclusion

The amendments to the City’s Zoning Ordinance related to persons with disabilities including persons with developmental disabilities and the removal of the definition of family would enable the policies to be less restrictive to the development of housing.

ENVIRONMENTAL CONSTRAINTS

A community’s environmental setting affects the feasibility and cost of developing housing. Environmental issues range from the availability of water and preservation of oak trees to the suitability of land for development due to potential exposure to seismic, flooding, wildfire and other hazards. This section summarizes these potential constraints in Sonora. (Refer to the Safety Element and Open Space, Conservation and Recreation Element of the General Plan for more detailed analyses and mitigating policies that address environmental issues or hazards within the Sonora area.)

Water Supply

Tuolumne Utilities District (TUD) serves all of the City of Sonora. TUD maintains three water storage and treatment facilities within or adjacent to the City limits:

- Greenley Road water tank adjacent to Sonora Hills – 2.7 million gallons storage
- Sonora Water Treatment Plant water storage tanks on Bald Mountain Road - Storage capacity 2 million with potential expansion to 3 million gallons
- Sonora Reservoir at the end of Reservoir Road – 60,000 gallons

TUD has three primary sources of water:

- Surface water
- Groundwater

TUD obtains more than 96% of its water from surface water supplied for the South Fork of the Stanislaus River through a 1983 purchase agreement with PG&E. Sonora’s water supply travels from Lyons Reservoir, fed by the Stanislaus River, to Phoenix Lake which is the nearest water storage body serving Sonora. From Phoenix Lake, water travels to TUD’s Sonora Water Treatment Plant (located within the Sonora City Limits) by underground pipe. Between Lyons Reservoir and Phoenix Lake, water is transported by numerous miles of ditch. Annual water supply is dependent upon natural flow of the South Fork of the Stanislaus River which yields 100,000± acre feet including 24,000± acre feet of combined storage in Strawberry (Pinecrest) and Lyons Reservoirs. Historically, the amount of water supplied through the system has been more than twice the amount of water consumed.

Groundwater provides 5% of domestic or treated water annually. TUD assumes it could sustain 1,075 acre-feet over a nine-month period, annually. Recycled water is used by private landowners for irrigating 713± acres of farm and

³ California court cases (City of Santa Barbara v. Adamson, 1980 and City of Chula Vista v. Pagard, 1981, etc.) have ruled an ordinance as invalid if it defines a “Family” as (a) an individual; (b) two or more persons related by blood, marriage, or adoption; (c) a group of not more than a specific number of unrelated persons as a single housekeeping unit. These cases have explained that defining a family in a manner that distinguishes between blood-related and non-blood related individuals does not serve any legitimate or useful objective or purpose recognized under the zoning and land use planning powers of a municipality, and therefore violates rights of privacy under the California Constitution.

pastureland. Per TUD, available water supplies for new development are currently dependent upon when water is requested. Presently, there is a sufficient volume of water available to supply existing needs for the City of Sonora. Water service in the City of Sonora is provided by TUD; a copy of this Housing Element was provided to TUD for their review and comment.

The Public Facilities and Services Element includes policies to facilitate water conservation to help maintain adequate water supply for the community.

Topography

Topography in the foothills restricts the overall density of housing units that can be accommodated both physically and economically. Within the City limits, slopes vary from 0% to in excess of 30%. To address this issue, the City of Sonora has adopted a Hillside Preservation Ordinance that includes slope/density requirements and flexible standards for hillside development. Topography also provides challenges for sidewalk construction and in meeting grade requirements for wheelchair accessibility.

In addition, the General Plan has assigned land use designations to lands based, in large part, on topography. Specifically, land with fewer topographic constraints were designated for higher density development or as Mixed Use to allow for increasing densities on portions of the site with gentle topography and limiting density on the steepest slopes while achieving an overall density of at least 15 dwelling units per acre.

Sewer Capacity

TUD provides public sewer service to the majority of the City. TUD operates a sewer treatment plant in the southwestern corner of the City adjacent to City-owned property - (Sonora Wastewater Treatment Plan – WWTP). The facility currently provides service to 23,000± people with a design capacity of 2.6 million gallons per day (mgd). The average dry weather flow at the facility is approximately 1.7 mgd. The plant produces secondary treated and disinfected effluent is discharged to a large storage reservoir, Quartz Reservoir, prior to distribution for reclamation by agricultural end-users.

During winter months, input at the WWTP may increase to more than 2.6 mgd exceeding the facility's capacity to clarify and digest the input. The additional flow is stored on-site in ponds until it can be treated TUD has adopted a reclamation strategy, currently under review by the state that includes:

- All biosolids are trucked out of Tuolumne County
- Increasing storage capacity (140± acres has been acquired for additional storage expected to come on-line in the year 2015, dependent on funding)

Private septic systems are regulated through the Tuolumne County Environmental Health Department and are of limited distribution. Private systems are concentrated southwest of J.S. West and Symons and near the northern City limits with limited numbers scattered in areas outside the public sewer service areas. Thin soils and porous rock (e.g., limestone) are two identified hazards associated with failed septic systems within the City's sphere of influence. However, age has been the primary reason for septic system failure within the City according to the Tuolumne County Environmental Health Department. Most of these older failing systems have been replaced with public sewer service from TUD.

Sewer service in the City of Sonora is provided by TUD; a copy of this Housing Element was provided to TUD for their review and comment.

Landscape Requirements

Sonora's oak woodlands are an important part of the City's heritage and constitute a valuable natural resource within the community. The oak woodlands provide habitat for wildlife, contribute to the City's beauty and varied scenery, provide shade in parks as well as in developed areas, and enrich soils and protect watersheds and streams from erosion. To address the decline of oak woodlands due to urbanization, the City adopted landscaping requirements that strives to balance preservation with the social benefits of private property ownership and development. The City's regulations establish a comprehensive design review process for new development, offer incentives for tree preservation, and provide feasible alternatives and options to removal where practicable, consistent with the Sonora General Plan Conservation and Open Space and Recreation Elements of the Sonora General Plan.

Seismic Safety

The Sonora area is subject to moderate to strong ground shaking from large earthquakes on active faults in the Lake Tahoe area and the Coast Ranges/San Francisco Bay area. An earthquake on the potentially active Foothills Fault Zone, is less likely, but would probably produce much stronger motion due to the proximity of the Foothills Fault Zone to the Sonora area.

Historically, seismic activity in the San Joaquin Valley has been slight in comparison to the rest of California. Throughout recorded history, no major movement has occurred. Earthquakes felt locally are from seismic disturbances to the west of the valley and include the San Andreas, Calaveras and Hayward faults.

Flooding

Flood threats exist within the Sonora area on occasion. Perennial streams flowing through the Sonora area, including Sonora Creek and Woods Creek, do not ordinarily carry large volumes of water. The City requires new development to detain drainage to maintain peak flow runoff at pre-development levels. Detention can be provided either on or off-site, provided it can be demonstrated that the detention facility will effectively meet City adopted goals and policies with respect to drainage.

Fire Protection

According to the California Department of Forestry and Fire Protection (CalFire), the City of Sonora is mostly located within a very high fire hazard severity zone. Areas where homes are located near dense vegetation and forest land have higher risks from wildfires. The Sonora Fire Department provides service to the City of Sonora. Significant amount of oak woodland exists within the Sonora planning area. Fire danger is especially high in the summer months in these areas. This area is susceptible to wildland fires that can move quickly if there is a stiff breeze. Several wildland fires have occurred within Tuolumne County in recent years. The Rim Fire in 2013 impacted the Sonora area due to the heavy smoke and the reduction in visitors which resulted in a loss of tourism revenue for the businesses in Sonora.

The Sonora Fire Department and TUD are responsible for reviewing all development proposals within the City to ensure the proper sizing of infrastructure, provision of adequate access for firefighting equipment, and identification of fire hazard areas. The City encourages the restriction of construction of new buildings within 100 feet of designated fire hazard areas unless fuel modification measures are included in the design. Fire hazard areas are those that create excessive firefighting problems due to lot and street configuration, landscaping materials and vegetation overgrowth.

ISO Rating

The Insurance Services Office (ISO) is an independent organization that serves insurance companies, fire departments, insurance regulators, and others by providing information about risk. ISO's Public Protection Classification (PPC) service

gauges the quality of local fire departments by collecting information on a community's public fire protection and then analyzing the data using a Fire Suppression Rating Schedule (FSRS). ISO then assigns a PPC from 1 to 10. Class 1 represents the best public protection and Class 10 indicates no recognized protection. The Sonora Fire Department currently has an ISO Public Protection Classification rating of 4.

3.5 HOUSING PLAN

This section of the Housing Element contains objectives and policies the City will implement to address a number of important housing-related issues.

The section also contains quantified objectives for housing construction, rehabilitation, and the preservation of affordable housing, with a five-year program of actions that:

- Conserves and improves the condition of the existing affordable housing stock, which may include addressing ways to mitigate the loss of dwelling units demolished by public or private action;
- Assists in the preservation of housing developments for lower-income households;
- Assists in the development of adequate housing to meet the needs of lower- and moderate-income households;
- Provides regulatory concessions and incentives and uses available local, state, and federal financial resources to support the development of affordable housing;
- Identifies adequate sites with appropriate zoning, development standards, services and facilities to encourage the development of a variety of housing types for all income levels;
- Addresses and, where appropriate and legally possible, removes governmental constraints to the maintenance, improvement, and development of housing, including housing for all income levels and housing for persons with disabilities including persons with developmental disabilities;
- Promotes regional cooperation to expand housing opportunities and services to lower and moderate income households, including extremely low income households and the homeless; and
- Encourages housing opportunities for all persons regardless of race, religion, sex, marital status, ancestry, national origin, color, familial status, or disability.

The Community Development Department staff regularly reviews Housing Element programs, objectives, and progress towards accommodating the City's share of the regional housing need. An annual implementation report will be prepared and provided to the California Office of Planning and Research and California Department of Housing and Community Development. Depending on funding availability, the City will consider modifications to Housing Element programs as necessary and appropriate to implement General Plan goals and policies.

This 2019-2024 Housing Plan builds upon the City's experience in implementing the previous Housing Element. Existing housing programs were evaluated for progress, continued appropriateness and modified, as necessary, for the new planning period. New housing programs have been added to respond to new issues and concerns, changing needs, and updated laws. This evaluation of existing housing programs is presented in Appendix B.

Goals and Policies

The following Housing Element goals and policies have been developed in response to the community's identified housing needs.

Housing Conservation

Goal 1 Maintain and improve the quality of existing housing and residential neighborhoods in Sonora.

Policy 1.1 Promote increased awareness of the importance of property maintenance to long-term housing quality and engage the community to preserve neighborhoods.

Policy 1.2 Monitor Units At-Risk. 122 units are currently at risk in the City of Sonora. All units are guaranteed to remain affordable through 2028. The City will monitor the units that are at risk in the 2030 decade to ensure that they remain affordable.

Policy 1.3 Provide assistance to inspect and identify code violations in residential structures.

Policy 1.4 Work with for-profit developers and non-profit housing corporations to identify existing affordable housing and develop strategies to maintain its affordability.

Policy 1.5 Work with Potential Purchasers. Establish contact with public and nonprofit agencies interested in purchasing and / or managing units at-risk in the 2028 timeframe to inform them of the status of these projects. Where feasible, provide technical assistance and support to these organizations with respect to acquisition. Consider reducing or waiving development fees associated with preservation or replacement of at-risk units. Assist property owners with grant applications for funding for mortgage refinancing, acquisition, rehabilitation and gap funding for affordable development.

Policy 1.6 Preserve the existing stock of affordable housing through City regulations and other forms of assistance.

Housing Production

The City of Sonora encourages the production of a diversity of housing types to meet the needs of all segments of the community. Housing diversity is important to ensure that all households, regardless of age, income level, and household type, have the opportunity to find housing suited to their need and lifestyle. New construction is a major source of housing for prospective homeowners and renters but generally requires public sector support for the creation of units affordable to lower income households, including extremely low-income households. The following goals and policies support the expansion of housing opportunities in Sonora.

Goal 2: Facilitate the provision of a range of housing types to meet the diverse needs of the community.

Policy 2.1 Provide quality housing opportunities for current and future residents with a diverse range of income levels.

Policy 2.2 Provide expanded housing opportunities for the community's workforce.

Policy 2.3 Encourage both the private and public sectors to produce or assist in the production of housing, with particular emphasis on housing affordable to lower income households, including extremely low income households, as well as housing suitable for seniors, large families, single-parent headed households, the homeless, and persons with disabilities including persons with developmental disabilities.

Policy 2.4 Encourage the provision of housing affordable to extremely low income households when reviewing proposals for new affordable housing developments.

Policy 2.5 Facilitate the provision of second units as a means of providing affordable rental housing opportunities in existing neighborhoods.

Policy 2.6 Encourage diversity of unit size and number of bedrooms within housing developments to expand lower cost rental opportunities for seniors, large families and all family types.

Provision Of Adequate Housing Sites

A key element in satisfying the housing needs of all segments of the community is the provision of adequate sites for housing of all types, sizes, and prices. The City's General Plan and Zoning Ordinance determine where housing may locate, thereby affecting the supply of land available for residential development.

Goal 3 Provide adequate housing sites through appropriate land use and zoning designations to accommodate the City's share of the regional housing needs.

Policy 3.1 Identify vacant parcels and provide to interested developers in conjunction with information on available development incentives. Encourage new development to provide housing that is affordable to all segments of the community.

Policy 3.2 Ensure new residential projects are developed at densities consistent with the density ranges established for each residential district in the Land Use Element.

Policy 3.3 Facilitate the development of multi-family housing on vacant parcels designated for medium-high and high density residential uses.

Policy 3.4 Consider walkability and distance to transportation nodes and public facilities, such as schools, when determining whether land is suitable for multi-family housing development.

Policy 3.5 Continue to work with developers requesting General Plan Amendments converting nonresidential designation to residential uses or from a higher density residential category to a lower density residential category to incorporate affordable housing as a component of the overall development. As an objective, target up to ten percent of the units as affordable, depending on the level of affordability or other amenities provided. Pursue the inclusion of extremely low income units in the negotiated target number of affordable units.

Removal of Governmental Constraints

State law requires that housing elements address, and where appropriate and legally possible, remove governmental constraints to the maintenance, improvement, and development of housing. The City will continue to monitor its development process and zoning regulations to identify and remove constraints to the development of housing affordable to lower- and moderate-income households, including housing for families, seniors, and persons with special needs.

Goal 4 Mitigate or remove potential governmental constraints to housing production and affordability.

Policy 4.1 Provide regulatory and/or financial incentives, where appropriate, to offset or reduce the costs of affordable housing development, including density bonuses and flexibility in site development standards.

Policy 4.2 Periodically review City regulations, ordinances, departmental processing procedures, and residential fees related to rehabilitation and/or construction to assess their impact on housing costs, and revise as appropriate.

Regional Coordination

The City seeks to take an active role in cooperating with Tuolumne County to resolve housing problems and issues facing Sonora that are primarily regional in nature. Homelessness and limited supply of and funding for affordable housing are examples of major housing issues that should be addressed at the local as well as regional level.

Goal 5 Coordinate and cooperate with surrounding jurisdictions to address regional housing issues, including the supply of affordable housing and homelessness.

Policy 5.1 Coordinate with surrounding jurisdictions in the provision of housing assistance and related services to lower and moderate income households, homeless persons, and other persons with special needs.

Policy 5.2 In conjunction with surrounding jurisdictions, actively pursue State, Federal, and other funding sources for affordable housing activities.

Equal Housing Opportunity

The City seeks to promote housing opportunities for all persons in Sonora, regardless of race, religion, sex, family size, marital status, ancestry, national origin, color, age, physical or mental disability, sexual orientation, or source of income. In order to make adequate provision for the housing needs of all segments of the community, the City must also ensure equal and fair housing opportunities are available to all residents.

Goal 6 Promote equal opportunity for all residents to reside in the housing of their choice.

Policy 6.1 Support the enforcement of fair housing laws prohibiting arbitrary discrimination in the building, financing, selling or renting of housing on the basis of race, color, ancestry, national origin, gender, religion, marital status, family status, physical or mental disability, or other arbitrary factors.

Policy 6.2 Support organizations that offer fair housing and mediation services to Sonora residents.

Policy 6.3 Promote housing that meets the special needs of the homeless, seniors, large families, and persons with disabilities including persons with developmental disabilities.

PROGRAMS

The goals and policies outlined in the prior section address Sonora's identified housing needs, and are implemented through a series of housing programs offered primarily through the City's Community Development Department. Housing programs define the specific actions the City will undertake to achieve the stated goals and policies. The City's housing programs for addressing community housing needs are described according to the following six issue areas.

- Housing Conservation
- Production of Housing
- Provision of Adequate Housing Sites
- Removal of Governmental Constraints
- Promotion of Regional Coordination
- Promotion of Equal Housing Opportunity

The housing programs presented on the following pages include existing programs as well as various revised and new programs that have been added to address the City's unmet housing needs.

Conservation Of The Existing Supply Of Housing

3.A.1 Encourage the Establishment of Small, Affordable Housing Units Distributed Throughout the City

Review active City Housing Programs annually to help ensure that there is no unintended bias towards applicants and that the affordable units are not concentrated in lower-income areas or areas of minority concentration. Reduce community opposition to high-density affordable housing complexes through the provision of smaller (e.g., duplex, triplex) infill projects in appropriately zoned districts.

The City will facilitate the provision of affordable housing in infill areas through implementation of the following programs:

- i. Maintain a map of vacant parcels zoned R-2, R-3, and CO throughout the City and make the map available for developers at the Community Development public counter or on the City's website

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Establishment affordable housing units using the preceding incentives on land within the City limits

3.A.2 Modify Parking Requirements to Establish Housing Opportunities near the City's Commercial Centers

Rehabilitate deteriorating buildings and encourage residential units above commercial establishments in appropriately zoned districts through implementation of the following incentive programs:

Revise Section 17.42.060 of the Sonora Municipal Code to:

- i. Allow for reduced parking for new commercial developments when development plans include affordable housing units pursuant to an agreement with long-term affordability covenants and restrictions to maintain the housing for low, very low or extremely low income housing;
- ii. Within the historic commercial district, if the landowner enters into an agreement with long-term affordability covenants and restrictions to maintain the housing for extremely low, very low and low income housing waive in-lieu parking fees for second-story residential uses located above commercial establishments within the historic commercial district.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Provide draft ordinances to the Sonora Planning Commission prior to June 30, 2021

Program Goals: Establish three new residential units above existing commercial uses within the historic commercial district. Receipt of one new commercial development application including on-site housing.

3.A.4 *Continue to Pursue Grant Funding Supporting the Provision of Affordable Housing*

Continue to pursue grant funding in support of affordable housing. In particular, the City would pursue funding to assist with housing for the extremely low-income. Current conditions within the City indicate that the following programs will receive high priority for funding:

- i. Preservation of At-Risk Housing
- ii. Housing Rehabilitation Assistance
- iii. Infrastructure Improvements in Support of low-income households

Responsible Entity: City of Sonora Special Programs Department

Funding Sources: CDBG and HOME

Timeframe: Annually apply for funding when eligible

Program Goals: Obtain grants to assist with the preceding programs for 5 housing units.

3.A.5 *Facilitate the Exchange/Consolidation of the Region’s Housing Assistance Information*

Facilitate the exchange/consolidation of the region’s housing assistance information through implementation of the following program:

Expand, on the City website, a page with links and contact information to the region’s housing assistance organizations. Continue to include information related to the City’s housing programs and including, where feasible, on-line applications. The website also shall include contact and referral information for Sonora residents regarding how and where to file housing complaints (brochures with similar information shall continue to be made available at the public counter at the Sonora Community Development Department).

Responsible Entity: City of Sonora Special Programs Department

Funding Sources: General Fund

Timeframe: By 12/21/2021

Program Goal: Provide a “one-stop” information source for affordable housing information for City residents.

3.A.6 *Continue to Provide the City Employee Down Payment Assistance Program*

Continue to offer City employees home ownership incentives in conjunction with City employment.

Responsible Entity: City of Sonora Special Programs Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Assist in achieving an appropriate jobs/housing balance

Governmental Constraints

3.B.1 Continue to Provide Flexible Standards for On and Off-Site Improvements for the Construction of Extremely Low-to-Moderate Income Housing

Consistent with health and safety; continue to provide flexible standards for on and off-site improvements for extremely low-to-moderate income housing projects including, but not limited to: reduced parking requirements for senior housing; reduced street widths, use of rolled curbs and gutters, and the flexible development standards contained in the City's Hillside Preservation Ordinance.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund, CDBG Planning/Technical Assistance Grant

Timeframe: Ongoing

Program Goal: Continue to provide flexible standards for development of affordable housing

3.B.2 Continue to Waive or Reduce Certain Fees for Extremely Low, Very Low and Low Income Housing Projects

Continue to work with the County to encourage waiving the Tuolumne County Services Impact Mitigation Fee for extremely low, very low and low income housing projects with long-term affordability covenants.

Responsible Entity: Sonora Community Development Department, Finance Director

Funding Sources: Not Applicable

Timeframe: Ongoing

Program Goal: Reduce development costs for providing affordable housing.

3.B.3 Maintain and Promote the City's Density Bonus Program

Promote the availability of density bonuses through handouts at the public counter and by including information related to density bonuses on the City's website.

Responsible Entity: City of Sonora Administration, Sonora Community Development Department, Sonora Special Programs Department

Funding Sources: General Fund

Timeframe: Ongoing.

Program Goal: Provide a variety of housing types affordable to all income levels.

3.B.4 Encourage the Establishment of Single-Room Occupancy Housing

Recognize the historical nature of boarding houses and other single-room occupancy structures as consistent with the historic character of the City's central commercial district and as an appropriate alternative use for abandoned multi-room or dormitory-type structures (e.g., hospitals, jails). Single-room occupancy housing should include a community eating area. City staff should facilitate discussion when development applications are discussed.

Responsible Entity: City of Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Expand opportunities for a wide variety of housing types and permit one single-room occupancy housing project over the planning period.

3.B.5 Pursue Development Standards and Design Guidelines for Multi-Family Residential Projects

Establish a process to provide consistent and predictable policy direction for project applicants through objective development and design standards.

Responsible Entity: City of Sonora Community Development Department

Funding Sources: General Fund / SB2 grant funding request has been submitted.

Timeframe: Prior to 2023

Program Goal: Reduce development costs for providing affordable housing.

Housing Conservation

3.C.1 Continue to Apply the State Historic Building Code for Qualified Buildings

Continue to apply the State Historic Building Code for qualified historic buildings listed in the City's historical inventory (Marvin, et. Al., 2003, as may be amended) unless a health or safety hazard would result consistent with the provisions of Health & Safety Code Section 17922(d). Refer to the State Historic Building Code for guidance, where pertinent.

Responsible Entity: City of Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Recognize the existence of the State Historic Building Code as a mechanism for facilitating rehabilitation of qualified historic buildings to maintain them in the housing stock.

3.C.2 Continue to Pursue Projects Promoting Neighborhood Improvements in Conjunction with Housing Rehabilitation

Continue to pursue projects promoting neighborhood improvements in conjunction with housing rehabilitation (e.g., upgrading storm drains; replacement of curbs, gutters and sidewalks and similar projects. Specifically, maintain and/or earmark funds including, but not limited to the following projects:

- i. Storm drain replacement & enhancements;
- ii. Pedestrian/bicycle path enhancements in areas linking high density residential developments to shopping, schools and other high-use locations (generally within ¼ mile of each other);
- iii. Neighborhood cleanup/beautification projects

Responsible Entity: Community Development Department

Funding Sources: General Fund and CDBG

Timeframe: Ongoing

Program Goal: Improve the City infrastructure to facilitate the provision of affordable housing

3.C.3 Continue to Monitor the Status of At-Risk Units, and Inform Agencies Able to Pursue Purchase and Support Acquisition Efforts

Continue to annually visit the internet to remain apprised of the California Housing Partnership’s list of Affordable Housing At-Risk of Conversion prepared by the California Coalition for Rural Housing. Contact at-risk property owners/managers annually to remain apprised of any changes in the project’s status and needed assistance for preservation. Notify the agency or agencies established in the following program when at-risk units are identified within the City limits. Post the City’s inventory of at-risk units on the City’s web site and provide a link from the City’s web site to the California Housing Partnership’s website. Three projects are at-risk during the next ten years.

In addition, assist and support agencies qualified to acquire at-risk units (and maintain these units as affordable housing) through letters of support or similar actions or by providing funding assistance for the acquisition of at-risk units should such funding be available.

The City will work with tenants of at-risk units and provide them with education regarding tenant rights and conversion procedures. The City will also provide tenants in at-risk projects information regarding Section 8 rent subsidies through the Housing Authority, and other affordable housing opportunities in the City.

The goal of this program is to provide a reliable and easily-accessible source of information to organizations interested in the purchase and maintenance of at-risk housing for target income groups and to provide city support for those efforts.

Responsible Entity: City of Sonora Special Programs Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Provide a reliable and easily-accessible source of information to organizations interested in the purchase and maintenance of at-risk housing for low-to-moderate income households. Preserve the 122 units at-risk for conversion from low-income to market-rate rental projects.

3.C.4 *Continue to Coordinate with the Amador-Tuolumne Community Action Agency (ATCAA) to Promote Energy Conservation for Housing Rehabilitation Projects*

In coordination with ATCAA, encourage low-income homeowners or renters to apply for free energy audits and home weatherization through programs conducted in partnership with local service agencies through implementation of the following programs:

- i. Continue to provide information at the public counter regarding the availability of energy-conservation programs available through ATCAA
- ii. Add information on the City’s website regarding available weatherization programs, contacts for the programs or a link to the ATCAA web page describing weatherization programs

Responsible Entity:	Sonora Building Department
Funding Sources:	General Fund
Timeframe:	Ongoing
Program Goal:	Increase the number of individuals with access to information regarding weatherization programs and funding assistance for those programs

3.C.5 *Continue to Enforce State Energy Efficiency Standards for Residential Buildings*

Continue to enforce state energy efficiency standards for residential buildings in compliance with the provisions of Government Code Title 24, Part 6.

Responsible Entity:	Sonora Community Development Department
Funding Sources:	General Fund
Timeframe:	Ongoing
Program Goal:	Reduce home heating and cooling costs

3.C.6 *Support the Reduction of Contamination Hazards in Older Buildings*

Support the reduction of contamination hazards (e.g., lead-based paint, asbestos) during the rehabilitation of older buildings by providing information at the public counter regarding sources of contamination.

Responsible Entity:	Sonora Community Development Department
Funding Sources:	General Fund
Timeframe:	Ongoing

Program Goal: Provide safe housing options in older homes.

3.C.7 Climate/Green/Energy Programs

Pursue implementing the following program:

- i. Implement the California Green Building Code or establish a similar program for reuse or recycling of construction and demolition materials
- ii. Encourage safe sustainability practices through the collection of rainwater and the use of grey water systems in order to reduce the impact on the environment and promote water conservation. Post information on the website concerning grey water and rainwater design and permit procedures.
- iii. Encourage and support local agencies' individual and collaborative efforts to improve in-home energy conservation and efficiency. Promote the widespread distribution of information on methods and alternatives for improving in-home energy conservation and efficiency.

Responsible Entity: City of Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Expand opportunities for a wide variety of housing types

3.C.8 Flood Hazards and Flood Management Analysis

Continue to analyze and implement programs in the Conservation and Open Space Element and Safety Element of the General Plan addressing flood hazards and flood management in compliance with Government Code Section 65302 and consistent with the City's floodplain management ordinance (Chapter 15.36 of the Sonora Municipal Code). Review the Land Use Element of the General Plan for those areas subject to flooding as identified by flood plain mapping prepared by the Federal Emergency Management Agency (FEMA) or the State Department of Water Resources. Continue to review the Housing Element for consistency with the Conservation and Open Space Element, Safety Element, Land Use Element and the City's floodplain management ordinance relative to flood hazard and flood management in conjunction with any changes to those elements or ordinance. Continue to identify alternative sites for target income group housing should existing target sites be identified as subject to threats from flooding.

Responsible Entity: Sonora Community Development Department, Administration (in cooperation with Police Department, Fire Department, Emergency Response Agencies)

Funding Sources: General Fund

Timeframe: Ongoing

Equal Opportunity Housing

3.D.1 *Support Senior Housing*

Continue to support the provision of congregate care, convalescent, and long-term care facilities and small facilities providing senior housing consistent with the equitable distribution of senior housing between the City and county.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: To provide senior housing options throughout the City to address the various needs of the senior population

3.D.2 *Maintain an Emergency Shelter*

Continue to coordinate with the Amador-Tuolumne Community Action Agency and the Mountain Women’s Resource Center to maintain an emergency shelter within the City limits.

Responsible Entity: Sonora Community Development Department

Funding Sources: Facility Lessee

Timeframe: Ongoing

Program Goal: Continue to provide housing for those in need of emergency shelters, transitional shelters and homeless shelters

3.D.3 *Maintain a Transitional Shelter*

Coordinate with the Amador-Tuolumne Community Action Agency, the Mountain Women’s Resource Center, and other suitable agencies to maintain a transitional shelter within the City limits.

Responsible Entity: Sonora Community Development Department

Funding Sources: Facility Lessee

Timeframe: Ongoing

Program Goal: Continue to provide housing for those in need of emergency shelters, transitional shelters and homeless shelters

3.D.4 Maintain a Homeless Shelter

Continue to coordinate with the Amador-Tuolumne Community Action Agency and other suitable agencies to maintain a homeless shelter.

Responsible Entity: Sonora Community Development Department with subsequent responsibility by the Amador-Tuolumne Community Action Agency

Funding Sources: Facility Lessee

Timeframe: Ongoing

Program Goal: Continue to provide housing for those in need of emergency shelters, transitional shelters and homeless shelters

3.D.5 Facilitate the Provision of Transitional Shelters or Housing, Supportive Housing, Emergency and Homeless Shelters

Facilitate the provision of emergency and homeless shelters, transitional shelters or housing and supportive housing within the City through implementation of the following programs:

- i. Require all Special Housing Needs facilities to Register with the City (without the payment of registration fees in accordance with state law), providing:
 - a. If the landowner of record is not the designated emergency contact, the name of an emergency contact individual (or individuals) that can be reached 24 hours a day, 7 days a week shall be provided to the City. The City shall make contact information available to emergency response agencies (e.g., police and fire).
 - b. Evidence of compliance with all required state licensing requirements.
 - c. Details related to facility capacity to be included in ongoing updates of the City's Housing Element and Housing Needs assessments.
- ii. Permit Emergency and Homeless Shelters in the R-3, C or an equivalent zoning district. Or as an alternative establish an overlay district that permits Emergency and Homeless Shelters: Amend all applicable sections of the Sonora Municipal Code to permit, by right, emergency and homeless shelters, in the Multi-Family Residential (R-3) zoning district, in the Commercial (C) zoning district or equivalent zoning district, or establish an overlay district that permits emergency and homeless shelters by right:. Clarify that these uses are subject only to standards, including any state licensing requirements, that apply to other residential uses within the same zoning districts, and any applicable combining or overlay districts, respectively.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Adopt ordinance revisions by June 2020

Program Goal: Eliminate the necessity for discretionary entitlements within the specified zoning districts for proposals for emergency and homeless shelters, transitional shelters or housing and supportive housing

3.D.6 Fair Housing Act

Ensure that the disabled have adequate access to housing. Continue to enforce the provisions of the federal and State Fair Housing Act for households with special needs by ensuring that construction meets the accessibility requirements of the FHA through installation of accessibility modifications in handicapped-adaptable units, to the extent that such modified units are in demand for households with special needs

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Ensure equal housing opportunities for the disabled.

3.D.7 Provide Information for Renters

Continue to make available [e.g., on the City website and at the Sonora Community Development Department public counter] published materials and resource referral information for renters on the following subjects: housing discrimination, landlord-tenant relations, access to legal aid services for housing complaints, information on housing advocacy programs and similar information. Continue to designate the Community Development Director, or his or her designee, shall be the primary contact for referring tenants and potential tenants to the appropriate agencies.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: To disseminate information to City residents concerning housing issues

3.D.8 Facilitate Cooperative City/County Efforts to Achieve Housing Goals

Work with Tuolumne County staff to facilitate information exchange and planning for future housing needs between City and county staff and officials.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Promote cooperation and information exchange between the City and County and to promote joint efforts to address the region's housing needs

3.D.9 Facilitate the Provision of Farm Worker Housing

The City will review and revise its current ordinance and/or processes not in compliance with the Employment Housing Act, California Health and Safety Code Sections 17021.5 & 17021.6.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Draft ordinance completed by December 2021 and ordinance adopted by December 2022.

Program Goal: Provide suitable locations for farm-worker housing

3.D.10 Water and Wastewater Service Priorities for Target Income Groups

Continue to submit the City's Housing Element and Regional Housing Needs Assessment allocation requirements for target and non-target income groups to the Tuolumne Utilities District (TUD) in compliance with Government Code Section 65589.7 and keep apprised of TUD's policies and procedures for granting priority to proposed developments with housing for target income groups and prohibiting denial or conditioning of approvals or reducing the amount of service for developments with housing for target income groups unless specific written findings are made.

Responsible Entity: TUD, City Council, Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

3.D.12 Plan and Develop Supportive Housing Facilities

Support the efforts of the Amador-Tuolumne Community Action Agency and the Central Sierra Continuum of Care to plan and develop supportive housing facilities for people with developmental disabilities in Tuolumne County.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Ongoing

Program Goal: Continue to provide housing for those with disabilities.

3.D.13 Low-Barrier Navigation Centers and Supportive Housing

The City will review its zoning code and approval processes, and revise them as needed to comply with AB101 and AB2162.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Review and evaluate current zoning code and processes by 12/31/2020.

Program Goal: Revise zoning code for consistency with State laws by 12/31/2020.

3.D.14 SB35 Streamlining Process

The City will revise the Zoning Code to specify the SB3S streamlining approval process and standards for eligible projects, as set forth under Government Code Section 65913.4

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Review and evaluate current zoning code and processes by 12/31/2020.

Program Goal: Revise zoning code for consistency with State laws by 12/31/2020.

3.D.15 Reasonable Accommodation Procedures

The City will continue to place literature regarding the extent of and procedures for requesting reasonable accommodation at public counters. The City will continue to monitor its development codes and procedures to ensure that no conditions exist to unduly constrain the development of housing for persons with disabilities including persons with development disabilities. When constraints are identified the City will work to mitigate or eliminate such constraints.

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: On going

Program Goal: Continue to provide reasonable accommodation information and monitor for constraints.

3.D.16 Definition of Family

The City will revise the Zoning Code to remove the definition of "family"

Responsible Entity: Sonora Community Development Department

Funding Sources: General Fund

Timeframe: Adopt ordinance by December 2020.

Program Goal: Revise zoning code for consistency with State laws by 12/31/2020.

Quantified Objectives

As noted in the table, the City has identified a target for 115 new residential units in Sonora by 2024. Additionally, the City anticipates continued and ongoing rehabilitation / conservation of up to 122 housing units by private sector forces.

City of Sonora Quantified Housing Goals

	Extremely Low- Income	Very Low- Income	Low- Income	Moderate Income	Above Moderate- Income	Total
New Construction	0	25	20	20	50	115
Conservation & Preservation			122	0	0	122
Rehabilitation Units	0	0	0	0	0	0

APPENDIX A

Public Participation

HOUSING CONDITION SURVEY

2019

INTRODUCTION

The Housing Condition and Income Survey was a jurisdiction wide study of the City of Sonora's housing needs funded through a \$35,000 Community Development Block Grant Planning and Technical Assistance Grant. The overall objective for the grant is to benefit Target Income Group (low-income) households and any work which results from the grant must principally benefit these households. Previous Housing Condition and Income Surveys funded with CDBG grants were completed in 2003 and 2010.

The purpose of this survey was to provide the City with a current picture of the needs of the City's households and the housing issues that they face, the condition of City's housing stock, and the City's housing environment as a whole. The information collected will assist the City in creating and continuing programs to address the City's housing needs. Additionally, the data collected and programs to assist households have been included within the City's 2019-2024 Housing Element, currently being reviewed by the State Department of Housing and Community Development.

SURVEY PROCESS AND METHODOLOGY

Survey Process

1. Staff developed the survey instruments (*Attachment A*) to address:
 - Housing Condition – Input received from occupant as to the condition of the home's windows, roof, exterior siding/stucco, plumbing, electrical, interior walls and ceilings, flooring and other health and safety issues.
 - Needs Assessment of Households – Input received from occupant as to housing expenses, overcrowding, tenure, type of occupancy, occupant status and special needs of the occupant.
2. Assessor's Parcel Maps were coded to identify all residential properties within the City. All surveys were identified by this code which allowed for the confidentiality of the respondents.
3. City Staff received the necessary training in interviewing techniques.

4. Survey packets were prepared for the initial mailed surveys and for field work.
5. Prior to the survey being conducted, the public was informed of the survey process and asked to assist in the completion of the survey. This allowed citizens the opportunity to contact the City with any questions and also let them know that the surveyors were truly representing the City. The City received no comments or concerns.
6. Surveys were mailed to resident in May 2019 and completed by July 2019. Staff completed on-site surveying of multifamily sites in July 2019.
7. Upon completion of field work and survey process, data was compiled and analyzed.
8. Data was prepared to be included within the 2019-2024 City of Sonora Housing Element.
9. Staff prepared this comprehensive Final Report to be used for planning housing programs and projects. This report also serves as the final product to be submitted to the State Department of Housing and Community Development.

Survey Methodology

A survey was developed to gather information on demographics of household, condition of structure, information regarding second accessory dwelling units and owner-occupied status. The packet included a survey with instructions and a self-addressed stamped envelope which was mailed to every residential address in Sonora.

The survey was used to determine the housing condition as no repair needed, minor repair needed, and replacement needed. The interior and exterior condition of the units were determined by the surveys completed by the occupants on their own.

In order to have the complete survey information be accepted as reliable by HCD, the City had to obtain an adequate sampling size. The minimum sample size required was 350 respondents. The City sample size was 734, well above the minimum. In addition, staff conducted on-site interviews with the apartment complexes in town.

HOUSING CONDITION DATA

Number of Housing Units within the City -	2,399	
Number of Single-Family Units -	1,661	
Number of Multifamily Units -	738	
Number of Housing Units for Sale -	37	
Number of Completed Surveys -	734	(30% of Units)
Total Occupants	1423	(1.93 persons/housing unit)

Number of Units by Structure Type *(% of Total Units in Survey)*

• Single-Family – Detached Garage	26	(4%)
• Single-Family – Attached Garage	289	(39%)
• Single-Family – Without Garage	161	(22%)
• Duplex	28	(4%)
• Multi-Family	115	(16%)
• Accessory Dwelling Unit (2 nd unit)	54	(3% of SF units)

Number of Units by Housing Condition *(% of Total Units in Survey)*

Window Condition

• No Repair Needed	487	(67%)
• Minor Repair	134	(19%)
• Replacement Needed	98	(14%)

Roof Condition

• No Repair Needed	514	(72%)
• Minor Repair	114	(16%)
• Replacement Needed	80	(11%)

Home Exterior Siding /Stucco

• No Repair Needed	426	(60%)
• Minor Repair/Needs Re-Painting	253	(36%)
• Replacement Needed	30	(4%)

Interior Housing Condition*(Information Provided by Occupants)*

Home Plumbing

• No Repair Needed	528	(74%)
• Minor Repair	137	(19%)
• Replacement Needed	46	(6%)

Home Electrical

• No Repair Needed	549	(76%)
• Minor Repair	125	(17%)
• Replacement Needed	42	(6%)

Home Walls and Ceilings

• No Repair Needed	516	(72%)
• Needs Repainting	94	(13%)
• Needs to be Patched and Re-Painted	77	(11%)
• Needs Replacement and Painting	22	(3%)

Home Flooring

• No Repair Needed	503	(70%)
• Minor Repair	201	(28%)
• Floor Coverings Needed	2	(1%)
• Structural Repairs Needed	8	(1%)

HOUSING NEEDS ASSESSMENT DATA

(% of Completed Surveys)

Total Owner-Occupied Households	519	(71%)
Total Rental Households	203	(28%)
Total Households with Children 18 and Under	113	(15%)
Total Households with Occupants Over the Age of 65	358	(49%)
Total Households, Mentally or Physically Handicapped	150	(20%)
Total Female Head of Households	315	(43%)

Overpayment – Households with Monthly Housing Costs over 35% of Monthly Income

- Owner Occupied Households Overpaying: 183 (25%)
- Rental Households Overpaying: 116 (16%)

Miscellaneous Information

Period of Time Living in Unit: *(% of Respondents)*

- Under 12 Months 38 (6%)
- 1 to 5 Years 213 (32%)
- 5 to 10 Years 146 (22%)
- 11 to 20 Years 174 (8%)
- 21 to 30 Years 56 (8%)
- Over 30 Years 74 (11%)

Households Vacating in Next 12 Months 69 (9%)

Reason for Leaving:

- Moving Within County 14 (20%)
- Moving out of County 11 (16%)
- Less Expensive Housing 7 (10%)
- Job Related 2 (3%)
- Other (smaller unit, divorce, etc.) 35 (51%)

Primary Heat Source *(% of Respondents)*

- Wood 103 (14%)
- Pellets 23 (3%)
- Propane/Gas 403 (55%)
- Electric 257 (35%)
- Other 5 (1%)

Number of Households Employed in Agriculture and Timber: 20 (3%)

HOUSING NEEDS AND SPECIFIC PROJECTS/PROGRAMS

Utilizing the information collected through the surveying process, a thorough analysis of the City's current housing condition and the needs of the households was conducted. The analysis included household characteristics, needs, housing costs in relation to the ability to pay, special housing needs, housing stock availability and condition, and type of housing. Along with this, current and proposed housing programs/projects were evaluated as well as any constraints, both governmental and private, to housing. The information was included within the City's 2019-2024 Housing Element. The following highlights this analysis of the Housing Survey responses:

- 16% of rental households are paying more than 35% of their monthly income for housing costs (rent and utilities).
- 43% of respondents were Female Head of Households. This is a 3% decrease from 2010 and a 5% increase from 2003.
- As indicated in the following table, the population of Sonora is aging.

	2003	2010	2019
65 or older	31%	26%	49%
Households with children under 18	25%	31%	15%

- 11% have lived in their current house for more than 30 years. The majority of respondents have purchased their homes within the last ten years.
- According to the survey respondents, approximately three-fourths of the structures are in good condition and do not need substantial repairs to the identified interior items of walls, flooring, electrical or plumbing.
- Only 3% of the respondents had a second or accessory dwelling unit on their property. As an affordable option for housing, this would be an area that could provide options for additional affordable units.
- A third of respondents rented their housing. The vacancy rate in the rental market for both single-family units and multi-family units is very low with only 2 multi-family units available and approximately 10 single-family units.

APPENDIX

Additional Comments Received on Surveys

- inadequate insulation
- Slight water accumulation in winter. Have a pump. Need door light on side door.
- Property taxes too high. Purchased at height of housing boom. Price dropped over half the purchase value of home. Taxes eventually reduced but now going back up but at a higher rate than the value of the house and the houses in the neighborhood.
- Much damage to our home from past renters and homeless living in our home while we were at work during day.
- Backyard trees need trimming, overgrown, and lying on power lines! Possible hazard! Called PG&E and no action taken
- Want to see fewer homeless and more affordable housing available
- The flooding in my neighborhood!
- Apts need off street parking
- Lack of city storm drain capacity caused flooding in our basement, yard, and garden in March. We are working to increase our home's fire preparedness. It would be great if the city had an action list of things residents could do to make homes more fire safe.
- High cost of building due to fees and lots of unnecessary regulations.
- Property backs/ sides onto occupied/incorporated heavily wooded land
- Homeowners insurance impossible to find in our area, which is near downtown and within city limits
- Just installed solar - still on the grid. Ask about defensible space!
- The neighborhood's street water (Meyers Hill Area - Jackson St) runs through our backyard in large rainstorms, causing flooding of the yard and our home's crawl space. The culvert system on the northern end of E. Oakside Drive needs to be fixed.
- Love our house. Would add on to side but set back lines are too close would have to go up which is costly and would make weird floor plan. Did get estimate to add on from engineer. Adding what we wanted would over build us for the area I believe.
- Rise in housing pricing is frightening. City needs to consider alternate solutions such as tiny homes or other auxiliary units. Currently, regulations and laws pertaining to alternative housing are ambiguous and confusing. City/county needs to endorse and streamline the process.
- Driveway repair
- Fire safety, clearance. Public safety. Code compliance (neighbors not compliant, placing neighborhood at risk for fire). We need more senior housing, not "affordable" housing for tweekers and young people who don't want to work
- Not enough rental properties. Would be nice to have condominiums.
- Possible asbestos

- Need much more affordable housing. Need to address the issue of homelessness due to lack of affordable housing.
- Fire - neighbors around don't maintain proper clearance. Across the street are multiple lots overgrown and overly crowded. I would appreciate ordinance to maintain property
- My husband and I own the home but do not live there. It is the primary residence for my 91 yr old mother and 88 y old stepfather. My stepfather is just entering hospice care at home.
- Older house needs updating, electrical issue - don't own the house. Also there are some fire issues in the backyard that could take some electrical wires out if the tree falls
- Poor city street maintenance and evacuation clearance, inadequate drainage, neighboring lots/parcels need brushing and treework - fire danger
- Interested in trash abatement re neighbor's front yard (301 Bonanza road)
- TWEAKERS!
- Toilet and extractor of heat in the roof of the bathroom and oven is not working right.
- Trimming of bushes and trees in neighborhood for fires safety.
- Basement is a mess
- I would like to convert a small building out back into a small rental, but was told that it is in non-compliance because it is too close to the property line
- We were fortunate enough to buy the house we were renting this year. If we hadn't, we would have been hard pressed to find another rental. We anticipate senior parents will be moving to the area in the next few years. More options for senior living/assisted living would be desirable similar to a smaller version of Rossmoor in Walnut Creek. Not many homes available for aging in place without serious renovation.
- Parking on streets
- Please make Sonora a fire safe community. All residents should set this as a city goal and when achieved receive reduced fire / insurance rates. Weekend efforts supported by professionals can work from downtown to the perimeter of the community and work together to thin the fire load of brush and slash. My 2 cents :)
- City must address the homeless problem. Should be looking at alternative housing options
- Rude neighbor
- Concerned of homeless people scattered near our house.
- An abandoned lot with a wrecked trailer house on it that is a large hazard to my home. Lots of weeds and downed tree
- Need road repairs - and sight distance from leaving our streets.
- What plans do the city have to regulate or control excessive trash/debris in neighborhoods?

- Neighbor's large pine tree overhanging my roof. They have removed the smaller branches but have not hired a professional to take out the larger ones or the whole tree. Driveway needs repaving.
- We are surrounded by overgrown brush. Road is not swept often enough to remove dead leaves and grass. Overgrown brush on sides of roads needs trimming
- I am concerned about the condition of vacant field behind our home. It is currently for sale. There are numerous dead trees on it numerous fallen trees, at least 5 ft tall grass and weeds, a total fire hazard. It needs upkeep immediately before a horrible fire on it. I have brought this to the attention of the real estate and Sonora fire with no results.
- Tree removal
- Shortage of affordable. Poorly maintained rental and mobile parks. Few alternatives for homeless seniors
- Grants, consultations, etc, on how to make homes more fire safe, in light of climate change. Not just raking leaves and taking down trees, but research-based improvements - such as specific attic vents
- Interested in solar
- Help in making it easier to remove and dispose of property's fuel loading (brush, dead branches)
- Taxes are too high
- Need trees trimmed
- Need a door on back porch. Back porch faces street and is on the street so anyone can come at night and use the washer and dryer. The management won't put one up because of a "code issue"
- Accessing affordable homeowner's insurance due to fire threat
- Retaining wall in driveway has collapsed. Causing issues. Siding is original 1927 cedar shingles. We are going to be trying to save money to replace.
- The cost of water/sewer is too high. Hard to understand why
- Maintaining the house on a fixed income grows more and more difficult. PG+E keeps rising water and sewer keep rising, groceries keep rising, my physical ability to keep up the house work, the yard, and the house itself is so discouraging and I do not have the money to hire these necessities out. My income is too high for low income housing, my bills are becoming too high to keep up. Other are worse off than I am and I am at a loss of what to do. My supplemental insurance is very high as even the cost of my partially covered prescriptions. What will I do when pre-existing conditions are no longer covered? There isn't an apartment I could rent for less than my house payment and that would not decrease all my other expenses. I also suggest you realize that a small garbage can is over \$200 for 2 months water is \$190 for 2 month- I don't have a dishwasher, I take a shower every 3 days and I haven't watered the yard at all and plants until this week. PG&E is rising propane I divide by 12 months and just received my new monthly amount \$190 a month. Is it a surprise that we have so many homeless? And, in closing, as you should know, there isn't enough affordable housing in this area. There are also very few jobs that pay enough for housing at our growing

rate. Does the City of Sonora realize how many elderly adults can't afford housing? These people are everywhere, living in vans and cars, taking showers at the shower bus, eating senior citizens and going without adequate healthcare. Oh yes and talk of cutting social security.

- Upkeep + utility costs. PG+E is a heavy burden and water continues to rise. After several years - we finally plan to fix our yard, but we are concerned with water costs.
- Air conditioning
- Increased rent costs and personal income
- Rent is too high for the property and lack of money made in this area. The windows are nearly falling out of the panes. The heater only heats the living and dining area. It could use a lot of work interior.
- Housing costs in Tuolumne County far exceed the average income range. We are very fortunate here; our landlord is very generous. The home could easily rent for \$1,100 - way beyond what we could pay.
- Cost of fire/ homeowner's insurance/ half of windows have already been replaced
- Accessibility for disabled life
- Lack of senior and affordable housing
- More senior housing! More help with paying rent for seniors!
- No air cooling. House is worth less than I bought it for would need to short sale.
- Fire prevention in neighborhood
- We need more affordable rentals in our county that persons in the 35k-45k income range can comfortably pay
- The city needs to charge less for building permits. Also, I would like to do the addition myself. What kind of incentives are there for me to do the work myself so that I may stay a resident? I will NOT hire a contractor.
- Rising property taxes, overhead utility lines, high city water pressure + continued safe/clean water, increasing cost, street traffic, high-cost garbage pick up
- As a senior, finding low maintenance condo or townhouse w/in city limits would be like sighting a unicorn playing with and elf riding a griffin. One story for safety - w/in easy access of necessary services and grocery stores. What makes sense is condensing populations that are willing to be condensed instead of permitting people moving into areas that are indefensible in a fire.
- An ordinance is needed for trees as big on my neighbor's property be on a slope an old huge oak tree stands. I've always been concerned in a storm or storms like we had this year and other years the tree would uproot and could damage or destroy 3 or 4 homes underneath. When I first moved here, I talked to my neighbor about removing the big huge oak tree and I'd pay for half the cost of the removal of the tree or defensible space, but we didn't get it removed.
- We have a real problem here. You wonder why we have homeless people here. We need more affordable housing. My rent for this postage stamp of a house is 900 a month. I make 981 on 5.5 a month. If I wasn't blessed to be on Sec 8, I too would be homeless.

- Tuolumne County has high housing prices and little to no availability for the people's income. People cannot afford to buy a home or rent a home here unless you are rich and retired. Rent is out of control and home buying costs are out of reach for the middle class trying to live. People are leaving especially younger people no jobs, housing!! no affordable housing!!
- Proliferation of trees in the neighborhood, suggesting potential fire damage.
- Trees- overgrown on property and along street. Cannot afford to cut down without assistance.
- Cost of keeping our home. Cost of living is becoming a concern with our standard of living costs.
- Steps and deck safety very old air conditioning and windows screens. Screens need replaced. Air - heating no air in bedroom too hot and cold to use
- My TUD sewer connector is 60 yards uphill. There is a pump under the house. This always concerns me. Homeowners insurance concerns me neighbor's hill fell down on the street a couple of years ago due to rain - there is a drainage problem above her property I don't want her garage to fall next.
- Desperately need more lower income housing - rentals or sales. I have a friend who has been homeless for a year because she couldn't find anything to rent.
- We would be interested in low income senior housing in Sonora in this area.
- The house next door is in terrible condition. Pieces of the roof have been blowing into our yard for 1.5 years now. It is in need of paint/siding repair also. It is a rental property.
- Possible flooding due to incline roads of downtown. 2 220-volt outlets w/ power and no idea how to remove power. Turned off all power in house and still had power
- Trees in power lines. Street/road needs to be paved, road gets lots of city use and it's destroyed the street. Not to mention when the fair is town all the street traffic puts lots of wear and tear. P.S. the new light in Jamestown sucks!! 10-20 minutes to get through Jamestown? Imagine holiday traffic to come!
- Difficulties of future fire insurance increases? Students disrespectful
- Overgrown and dangerous trees in area
- Tax rates are too high. Health insurance costs are out of control!!
- We are in a residential neighborhood on a high hill. I would like help from city crews to clear the lower story (ground cover) under the oak trees around our neighborhood. We have cleared 30 feet from our house, but there are lots of dried brush in the woods below the house. (Morningstar subdivision)
- Cost of annual homeowners' ins due to state fires is rising dramatically. Retirement and on fixed income-taxes high and cost of living increasing not income
- Water and sewer base rate for only 1 person. Waste management - every other week option (change rate of utilities as it is expensive for only 1 person to make it in Sonora). Cont. tax increases in all areas of living in CA, limits abilities to fix and update home.
- The homeless are allowed and encouraged to live/squat nearby and I worry about their unregulated fires escaping and burning down my house.

- Fire protection, insurance, fire breaks, help with clearing
- Other properties near mine are not well kept
- Rising property taxes in Sonora!
- Introduce ordinances to prevent people from piling junk in their front yards
- Insurance is exceptionally high!!
- There is a weak spot in the gutters and roof. I have a plumbing issue in the second bathroom with the toilet. I have just purchased a replacement toilet but am saving up to have it installed. A few other minor issues, as noted above. I love this little home and hope to be here for the rest of my life.
- Just completed major repair of Federal Pacific panel and subpanel. After purchasing the house, we called an electrician because of an outlet seemed faulty. They discovered the panel and subpanel were substandard, manufactured by Federal Pacific, which has been associated with many fires. In addition, the subpanel was in the bedroom closet, which was allowed at the time but is now not permitted by code. We placed these panels at a cost of about \$6,000. Other housing in Sonora may have similar fire dangers.
- Home settling severely, moisture leaks, some concerns about possible mold
- 2 rooms with carpet flooring 1 living room and 1 bedroom both have not been replaced in over 10 years that I'm aware of. Hard wood flooring throughout the rest of house has some minor repairs needed.
- Driveway repair
- We have a 2nd with the city that prevents us from taking out an equity loan to repair major items on our home. We have no way to pay for the costly repairs needed.
- No rentals available in county. Housing price increases decreases ability to find less expensive options for senior citizens.
- No fire insurance!
- I do not believe burn permits should be used in city limits. I have seen on more than one occasion where people have burns going too close to trees and bush.
- Increased taxes
- Several dead trees near house that are not on our property. Lot not large enough to clear 100' fire protection
- The garden is difficult for me to maintain. Picket fence in need of repair and paint
- This is a rental property for us
- Want sidewalks
- Fire concerns. There needs to be more ordinances and enforcement of defensible space around homes in Sonora. My home is cleared and ready for fire, but my neighbors have done any clearing.
- It is cold in winter / hot in summer
- Trees in the city right of way are a potential fire hazard and traffic hazard.
- We need to build more low-income housing/apartments for the middle - low class people that are moving to Sonora and for all the people that are now homeless and on the streets!!! Board of Committee needs to approve many more low-income

apartments seriously!!! This is a huge problem. Sonora could turn into San Francisco with homeless if we don't.

- My apartment floor and carpet is gross
- No or inadequate insulation. ATTCA helped with major leaks but the house was built (1929) before insulation was put in walls and ceiling. It gets cold and hot. It is difficult for me to keep up the maintenance an old house needs!
- Roofs being fixed this summer. Main sewer line by next summer hopefully. Power poles in neighborhood need replacing. Lines need to be restrung through trees. Road is falling apart! The Oakside Dr Road was repaved years ago, East Bald Mtn Rd is disintegrating. The corner has a sinkhole forming water comes through it every day by fire hydrant down by the small overgrown creek.
- Neighbor in adjoining unit is very untidy- front porch is dirty and untidy- they never clean it. Mine is clean with lots of blooming flowers
- The house is poorly insulated and loses heat rapidly in winter which resulted in our freezing or holing up in a single room with a portable heater to stay warm.
- Lack of low-income housing. Lack of rentals that are affordable single individuals and families.
- I've learned through conversations that some low-income apartments in our area are not re-evaluating tenants for income changes. So, when their income increases their rent stays at the low-income level. Thus, low income apts do not become available to people who need it.
- Hot water heater
- Streets need surfacing. Snell to Racetrack is in very bad shape. From what I heard and read in the paper, there are no plans to repair and resurface that street anytime soon. It really needs to be done. Ans for pedestrian safety it needs a sidewalk.
- It's been good living here as well as not so good. Some neighbors need to learn to keep their noses out of other people's business. Maintenance was very good at getting repairs done in a timely manner. Manager is understanding and very nice.
- Gutters need to be cleaned on roof and repaired because some of them break. Tree limbs need to be cut away from roof.
- Termites and corner foundation sinking
- Management issues, outlets and wiring need looked at, outside unit light's never on, drain at base of stairs floods when rains, lots of mold.
- Was homeless for 8 months before receiving this apartment. We were on the waiting list for nearly 2 years. I know many people who have nowhere to go because no affordable housing is available. They can't even find an affordable room to rent. Many could get an RV or trailer but there is no available place to park them. All lots are full.
- Parking
- Possibly black mold under the bathroom floor. Security light not replaced. Laundry room lights need replacing
- Needs new screens. The doors need to be updated. There are not enough rental options.

- Safe active transportation options are needed. It would help to develop more infill housing where people work, shop, and recreate. More of these trip generators could be supported by a walking and biking network. The new development should support these projects, as well as the city of Sonora and County of Tuolumne. Shaw's Flat really needs a sidewalk for kids to get to school on foot and a shoulder on the uphill travel lane to provide space for motorists to pass bicyclists when they are traveling slowly. Currently, there is no space to do this and there have been many close call head on collisions.
- Affordable housing and limited rentals. Rent hikes
- Lack of affordable housing forcing families to rent units that do not have enough bedrooms for everyone.
- Want to stay in low income housing
- There is not enough affordable housing in Sonora. I am very fortunate to have this apartment. Disability forced a very early retirement. Income is low.
- No pets allowed :(
- The walls have very little insulation. The windows need replacing and reframing. Exterior door needs new sealing. Drawers and cupboards are very old. Refrigerator needs to be replaced. Dishwasher is extremely inefficient. The other 3 units have been renovated and upgraded not mine and paying same. Rent is extremely reasonable, but cost of living is high due to needed upgrades
- My concerns are for proper smoke detectors and carbon monoxide detectors in each apt. Needs double paned windows. Parking drive is in need of major repair. Lots of things not up to code. Apts at end flood during heavy rain
- Needs kitchen tile and rug replaced
- Overpriced for what it is. The apartment complex is Sonora Terrace built in 1987
- All faucets are leaky, both windows need updating, appt has serious sagging of floor ceiling and walls.
- Minimal affordable rentals available in Sonora
- Housing cost not on par w/ county pay
- The porch is in need of repair. It's a split level 4 plex. The boards are being eaten by termites and all the nails are sticking up on walkways.
- Many trees are behind building and concern me for fire
- Walls are thin and need more wood on them. You even hear neighbors next to me. Not bad but could be better
- Too many rent increases
- The cost of rent is outrageously high in this county for the low income that is offered. There are no good paying jobs with benefits. This county seems to encourage unemployment or low income because then you can get public assistance. I work 40 hours/week at a "decent" job and still struggle to make ends meet. I have a Bachelor's degree and have considered moving from my home town because of the lack of opportunity here :(

- "Air BnB's" need to be limited somehow-small units that are affordable to the working class are being turned into air BnBs. Who will be here to serve food, retail, etc if we can't afford to live in Tuolumne Co.?
- Apartment complex was built in the late 70s, electric hasn't been evaluated in the ten total years I've resided here with my girlfriend. Some outlets in both our current and former apartments have either worked, sparked, or do not work at all. Plumbing also needs to be evaluated and redone. Windows have some seal issues during heavy rain, in addition to not being energy efficient. Many apartments in the complex (of the ground floor units) are not 100% ADA compliant/accessible, this is partly due to the floor plan which as far as either of us have found out hasn't been renovated/updated since the original construction of the complex. My girlfriend has tried several times to at this point (as have I) to have these issues addressed/resolved only to be met with excuses and nonaction on the part of both management and the company which previously owned the complex. A new company now owns the complex but as far as we know management hasn't shared with them any of the many concerns/issues of any of the residences of the complex. Additional info included on single sheet of binder paper. Other additional concerns: Laundry room retains the smell of detergents due to lack of ventilation which has made folks sick if they are in there too long (more than 15 minutes). Possibility for wall fires due to sparging outlets (which clearly show that they are experiencing shorts somewhere in wall). Lack of ADA compliance/accessibility - only front doors are wide enough to accommodate a wheelchair - All interior doors are too narrow to allow entrance to the room by wheelchair. - Bathroom and bedrooms do not accommodate wheelchair use nor does kitchen - For the ground floor units the windows are to be used in the event of emergency evacuation, only one window is low enough to accommodate proper and speedy exit all others are at or over 18" high which is impossible for mobility challenged people to get out of. - On the exterior there are rocks and/or plants that pose a hazard should someone need to escape their apartment via window in an emergency. - Exterior walkways are uneven and need to be redone. - Staircases and railing need to be assessed and replaced. - Complex needs to be assessed to see about replacing/redoing insulation. Rooms aside from the living room and dinette are often times much colder, at least in the case of two-bedroom units. - Appliances in the kitchens should be assessed for energy efficiency and age-related issues and replaced with brand new replacements as needed. These are all things that have been told to management only to be dismissed, ignored, or have a halfhearted attempt at fixing the problem. I've written down the number included at the top of the survey just in case. Thank you for the opportunity to make known our concerns! Complaints to people that will actually take action in getting things sorted out.
- Electrical problems with outlets and circuit breakers. Had one fire already and still have problems. Bathtub has cracks and leaks. Bathroom floor is bad and is sinking. Need fire inspection. There is seven units here with problems. Landlord won't help.
- No low income or any housing available

- There are severe structural cracks in the concrete outside, the driveway has several big potholes which need to be fixed, the roof on my building leaks and is not being fixed, they don't do much to improve the place. And behind my building there are several trees and nasty bushes which need to be trimmed and the insects from the trees come in through the screens it needs to be sprayed. Windows are old and they fill with water in the cold weather which causes mold. I have black mold painted into the window frame. And if you complain, they serve you with a notice or just ignore it.
- More affordable housing is needed. And paint streets - striping and wording
- Others use my trash can, mail goes missing, cars drive badly on my street, no guest parking, Landlord charges for basic repairs / maintenance.
- Expired fire extinguishers. Carpet is 5+ years old. Please fix the housing crisis rent is too expensive!!
- Rent high for a low-income housing apt. complex. Rent raised \$92 last month. Rent raised well before the one-year renting of the unit.
- Rent is too high! The cost of buying houses is absurd!
- We need more low-cost rentals
- Rent is very high for what you get in Sonora
- Rent in this county is insane! The rent prices are equivalent to living 30 minutes from the beach. Last I checked, this wasn't Monterey. The place I live now is a few years old and poorly constructed. My apt has flooded twice since living here and the ceiling has leaked. My car has been hit once in the poorly designed parking lot.
- I work and my take home pay is \$1500 and the average rent is 800 a month and their adding other basic utilities and cost of Medicare I'm lost at what to do when this building sells and we are given 30 days to find a new place to go.
- Rent is very expensive. We need more assistance from city, county, state.
- Kitchen cabinets are very old. Prior tenant was a heavy smoker. Been waiting over a year for the inside of cabinets to be sealed to block cigarette smoke. Drawers and tracking are worn out. Drawers won't stay on tracking. One drawer has nails on outside that my clothes catch on. None can have blinds hanging outside to block heat because they don't match the apt color but yet new white windows and sliding doors are being installed that stand out way more than the shades.
- I wish they would clean the carpet after living there for 10 years.

Open House for Housing Element of City of Sonora General Plan

July 24, 2019

3:00-6:00 PM

**City Hall Council Chambers
94 N. Washington Street
Sonora, CA**

The City of Sonora is currently in the process of updating the current Housing Element of the General Plan for the 2019-2024 planning period. This update to the Housing Element satisfies the requirements of Government Code 65580-65589.9 by identifying site which can accommodate the City's share of the State's Housing need (Regional Housing Needs Assessment or RHNA) of 115 units of housing and providing a statement of goals, objectives, policies and programs that the City intends to implement to assure that those housing units meet the needs of all income groups in the City.

**Come share your thoughts and ideas
during the Open House!**

APPENDIX B

Housing Accomplishments - Evaluation of 2014 Housing Element

Evaluation of 2014 Housing Element

The analysis of the 2014 Housing Element addresses the following

1. Effectiveness of the element - A description of the actual results or outcomes of the prior housing-element's goals (what happened), objectives, policies, and programs. The results should be quantified where possible (EG number of units rehabilitated) and may be qualitative where necessary (mitigation of governmental constraints).
2. Progress in implementation- For each program, the analysis should compare significant differences between what was projected or planned in the earlier housing element and what was achieved. Analyze the differences to determine where the previous housing element met, exceeded, or fell short of what was anticipated.
3. Appropriateness of goals, objectives, policies, and programs – A description of what has been learned based on the analysis of progress and effectiveness of the previous housing element. A description of how the goals, objectives, policies, and programs in the updated housing element are being changed or adjusted to incorporate what has been learned from the results of the previous element.

Name of Program	Objective	Effectiveness	Status of Program Implementation	Appropriateness
3.A.1	Encourage the Establishment of Small, affordable housing units distributed throughout the City.	The City provided 4 additional small lots.	The City has kept an updated vacant parcels map and has approved a parcel map that includes 4 small lots under this period.	This program is an effective way to encourage housing units.
3.A.2	Use Available Funding Sources to Establish Housing Opportunities near the City's Commercial Centers.	The City worked with a property owner to leverage CDBG funding to provide 7 units.	Ongoing. The City continues to work with interested parties to apply this program to projects.	This program has resulted in a successful project on Stewart Street.
3.A.3	Continue to Seek Funding to Ensure the Continuation of the City's Homebuyers Assistance Program.	The City has had limited success in getting new clients in the program.	City has an active CDBG grant to fund the City's Homebuyers Assistance Loan Program.	This program is no longer appropriate with the ending of the CDBG grant and the limited number of participants.
3.A.4	Continue to pursue grant funding in support of affordable housing	The City worked with a property owner to leverage CDBG funding to provide 7 units	Ongoing. The City has actively pursued CDBG grants and is continuing to identify new funding like SB2 monies.	This program has resulted in a successful project on Stewart Street.

Name of Program	Objective	Effectiveness	Status of Program Implementation	Appropriateness
3.A.5	Facilitate the Exchange/ Consolidation of the Region's Housing Assistance Information	Information available to the public.	Included information about housing programs on City's website and at the CDD public counter. Completed and is currently available.	This policy has limited effectiveness however it also is easy to implement.
3.A.6	Continue to offer City employees home ownership incentives in conjunction with City employment.	Limited effectiveness since limited by City employees housing situations and small staff.	Program is still available.	Program is limited by the employees of the City housing situations, but may be used more in future with staff turnover.
3.B.1	Continue to provide flexible standards for on and off-site improvements for extremely low-to-moderate income housing projects.	Could be effective in cutting requirements and costs for projects.	Ongoing.	No applications for projects were received over this period.
3.B.2	Waive or reduce fees for extremely low, very low and low income housing projects.	Could be effective in cutting requirements and costs for projects.	Ongoing	No applications for projects were received over this period.
3.B.3	Update, maintain, and promote the City's density bonus program.	City continues to offer guidance on using the density bonus program, but have not had any projects.	Completed changes to the Municipal Code to implement Density Bonus Program.	This program is appropriate to continue.
3.B.4	Encourage the establishment of single-room occupancy housing	City continues to offer guidance, but have not had any projects.	Completed work with community hotels / motels and reviewed Municipal Code for compliance.	This program has limited effectiveness as no applications have been submitted.
3.C.1	Continue to apply the State Historic Building Code for qualified buildings.	Very effective with the majority of the City having older structures.	Program is still available and implemented through the Building Division.	This successful program was much appreciated by residents and is appropriate to continue.
3.C.2	Maintain priorities for rehabilitation	Limited effectiveness since the City has no funding source.	The City's rehabilitation program no longer exists due to the loss of Redevelopment funding.	This program is no longer appropriate.
3.C.3	Continue to pursue projects promoting neighborhood improvements in conjunction with housing rehabilitation.	City was able to participate in a Fire Hydrant replacement program through CDBG.	The City's rehabilitation program no longer exists due to the loss of Redevelopment funding.	Limited success since the City no longer has Redevelopment funds.
3.C.4	Continue to monitor at-risk units and inform agencies able to pursue purchase and support acquisition efforts.	One group of units were removed because no one was able to purchase the units and keep them in affordable covenants.	Ongoing. This is periodically done by the Community Development Department.	Limited success since City does not have funding and is in an advisory position.

Name of Program	Objective	Effectiveness	Status of Program Implementation	Appropriateness
3.C.5	Continue to implement the City's CDBG Reuse Plan.	Limited effectiveness depending on the grant monies available.	City continues to comply with State requirements regarding CDBG Program Income.	This program is no longer appropriate.
3.C.6	Update and maintain the City's Condominium Conversion Ordinance.	Not effective as the City has no condominiums.	There are no, nor has there ever been, any owner-occupied condominiums within the City so the current ordinance remains as originally adopted.	This program is no longer appropriate.
3.C.7	Consider adopting the Mills Act.	Due to limited staff and budget, the City is not in a position to implement.	The City has not taken action on adopting the Mills Act.	Due to limited staff and budget, the City is not in a position to implement. This program is no longer appropriate.
3.C.8	Continue to expand funding for the City's Housing Rehabilitation Loan Program.	Not effective since loss of Redevelopment funding.	The City's rehabilitation program no longer exists due to the loss of Redevelopment funding.	This program is no longer appropriate.
3.C.9	Continue to coordinate with ATCAA to promote energy conservation for housing rehabilitation projects.	Ongoing	Information about ATCAA's housing programs is provided at the Community Development Department counter.	This program is appropriate to continue.
3.C.10	Continue to enforce state energy efficiency standards for residential buildings.	All new building permits must meet state building code requirements.	The City enforces all energy efficiency standards required under the applicable California Building Codes.	This program is appropriate to continue.
3.C.12	Continue to publicize the City's Rehabilitation Program	No longer needed.	The City's rehabilitation program no longer exists due to the loss of Redevelopment funding.	This program is no longer appropriate.
3.C.13	Implement the California Green Building Codes.	Ongoing	City is enforcing the applicable California Green Building Codes.	This program is appropriate to continue.
3.C.14	Flood Hazards and Flood Management Analysis	Ongoing	City continues to evaluate flood hazards and floodplain management.	With the increase in extreme events this program continues to be appropriate as impacts during flood events could worsen over time.
3.D.1	Support Senior Housing	Ongoing	Completed Code updates to incorporate senior facilities in additional zones.	This program is appropriate to continue as new senior housing options come available.
3.D.2	Maintain an Emergency Shelter	Ongoing. Continue to coordinate with CNVC to maintain an emergency shelter within the City.	Shelter is still available.	This program is appropriate to continue.

Name of Program	Objective	Effectiveness	Status of Program Implementation	Appropriateness
3.D.3	Maintain a Transitional Shelter	Various shelters exist with the City.	Continuing to coordinate with various agencies to maintain a transitional shelter within the City.	This program is appropriate to continue.
3.D.4	Maintain a homeless shelter	A homeless shelter is still available.	Continue to coordinate with A-TCAA and other agencies to maintain a homeless shelter.	This program is appropriate to continue.
3.D.5	Facilitate the provision of transitional shelters or housing, supportive housing, emergency and homeless shelters	City coordinates with ATCAA and the County.	City will need to amend various sections of the SMC to allow transitional shelters or housing, supportive housing, emergency and homeless shelters.	This program is appropriate to continue.
3.D.6	Enforce provisions of the federal and state Fair Housing Act. Amend SMC to accommodate shared and congregate housing and group homes in various zones.	Code updates have been completed. Building staff is continuing to enforce Fair Housing Act.	Through the California Building Codes the City enforces all applicable requirements. City also complies with all applicable State requirements related to this type of housing.	This program is appropriate to continue with amendments.
3.D.7	Provide Fair Housing information for renters.	Ongoing	The Community Development Department provides Fair Housing information both on the City's website and at the counter.	This program is appropriate to continue.
3.D.8	Facilitate cooperative City/County efforts to achieve housing goals.	Ongoing	City and County housing staff meet regularly and also participate together at various housing related meetings and events.	This program is appropriate to continue.
3.D.9	Implement various code changes within the SMC related to Farm Worker Housing.	This has not been completed.	Ongoing is planned for completion in 2021.	This program is appropriate to continue.
3.D.10	Incorporate Housing Education Programs	The City has a stable staff who have working in the Community Development Department for many years. City staff meet on a regular basis to discuss any housing issues that arise and provide training as needed.	Training is at least once every three years or new staff orientation.	Training for housing issue areas area incorporated in the staff procedures, this program as written is no longer appropriate.

Name of Program	Objective	Effectiveness	Status of Program Implementation	Appropriateness
3.D.11	Water and wastewater service priorities for target income groups.	The City coordinates with TUD on all development projects to ensure adequate utility capacity and availability.	RENA was submitted to TUD following adoption of the 2014/15 Housing Element. There has been only one low-income housing project within the City since its adoption and water/sewer services were provided with no issues.	This program is appropriate to continue.
3.D.12	Adopt a reasonable accommodation procedure.	Items have been implemented Department wide.	Completed	This program does not need to be continued as it was completed.
3.D.13	Plan and develop supportive housing facilities.	The City supports the efforts of ATCAA and the Central Sierra continuum of Care to plan and develop supportive housing facilities for people with developmental disabilities in Tuolumne County.	The City continues to support the efforts of these agencies and assist them as needed.	This program is appropriate to continue.

APPENDIX C

Map of Sites

CITY MAP HISTORY

This map was prepared by the City of Sonoma Planning Department as part of the City's ongoing effort to update its official maps. It is based on aerial photography from 2008 and street data from the City's Geographic Information System (GIS).

The map shows the following features:

- City Limits:** Indicated by a dashed line.
- Parks:** Shaded green areas.
- Highways:** Solid black lines with route numbers.
- Streets:** Thin solid lines.
- Water Bodies:** Blue areas representing water.

Highlighted Areas:

- Cuesta Heights:** Located in the northwest quadrant of the city.
- Oak Park:** Located in the central-eastern part of the city.
- Lemke:** Located in the southeast quadrant of the city.
