MEMORANDUM

DATE:

July 2, 2018

TO:

Honorable Mayor, City Council members

FROM:

Timothy A. Miller, City Administrator

SUBJECT:

Certifying the Results and Declaring those Elected for the 2018 General Municipal

Election

RECOMMENDATION: City Staff recommends adoption of Resolution 07-02-2018-A certifying the results and declaring those elected for the June 5, 2018, General Municipal Election for City Officers.

DISCUSSION: The City General Municipal Election was held Tuesday, June 5, 2018, for the election of two members to the office of City Council. The Elections Code requires that the votes be canvassed and certified by the elections official. As a consolidated election, this task is performed for the City by the County Clerk & Auditor-Controller. Upon the receipt of the election results, the City elections official (City Clerk) shall certify the results to the governing body (City Council). Before installing the new officers, the governing body shall adopt a resolution declaring elected the persons receiving the highest number of votes cast for each office.

The City has received the certification and the canvass of votes for the election from the County Clerk & Auditor-Controller (see attached). The City Clerk needs to certify these results at which time the City Council needs to adopt Resolution 07-02-2018-A enumerating the results of the June 5, 2018, General Municipal Election and declaring those elected.

RESOLUTION NO. 07-02-2018-A

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF SONORA CERTIFYING THE RESULTS AND DECLARING THOSE ELECTED IN THE JUNE 2018 GENERAL MUNICIPAL ELECTION

WHEREAS, a General Municipal Election was held in the City of Sonora, June 5, 2018, for the purpose of electing two Council members to the City; and

WHEREAS, said results of the canvass of said General Municipal Election were presented to the City Council of the City of Sonora as attached in Exhibit A; and

WHEREAS, The Notice of Election was given in time, form and manner as provided by law; that candidates were nominated to fill the vacancies as provided by law; that voting precincts were properly established, and that election officers were appointed and that in all respects the election was held and conducted and the votes were cast, received and canvassed and the returns made and declared in time, form and manner as required by the provisions of the State of California relating to general law cities.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Sonora does hereby certify the results of said General Municipal Election and declares elected Colette Such and Jim Garaventa to the office of City Council effective this date, where each Council member will serve a four-year term accordingly.

PASSED AND ADOPTED AS A RESOLUTION of said Council of the City of Sonora, California, at a regular meeting of said City Council held on July 2, 2018, by the following votes:

AYES:

NOES:

ABSENT:

ATTEST:

——

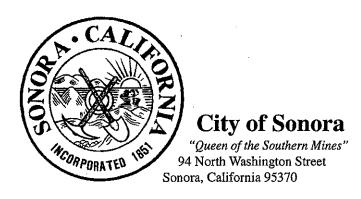

Marijane Cassinetto, City Clerk

Date

Connie L. Williams, Mayor

MEMORANDUM

DATE:

July 2, 2018

TO:

Honorable Mayor, City Council members

FROM:

Timothy A. Miller, City Administrator

SUBJECT:

Administering the "Oath of Office" for Elected City Officials/

Selection of Mayor and Mayor Pro Tem

RECOMMENDATION: That the City Clerk/Treasurer administer the Oath of Office to the following elected City Officials:

- 1. Colette Such, Council member (4) year term.
- 2. Jim Garaventa, Council member (4) year term.

DISCUSSION: Upon completion of the Oath of Office, the newly and reelected Council members will assume their seats. The Council will need to appoint a Council member to serve as Mayor for the next two years. Once selected, the Mayor will need to appoint a Mayor Pro Tem, with confirmation from the Council members.

July 2, 2018

Darin Grossi – Executive Director Tuolumne County Transportation Council 2 Green Street Sonora, CA 95370

Subject: Letter of Intent to partner with the Tuolumne County Transportation Council to submit a joint Active Transportation Program Grant application

Dear Mr. Grossi,

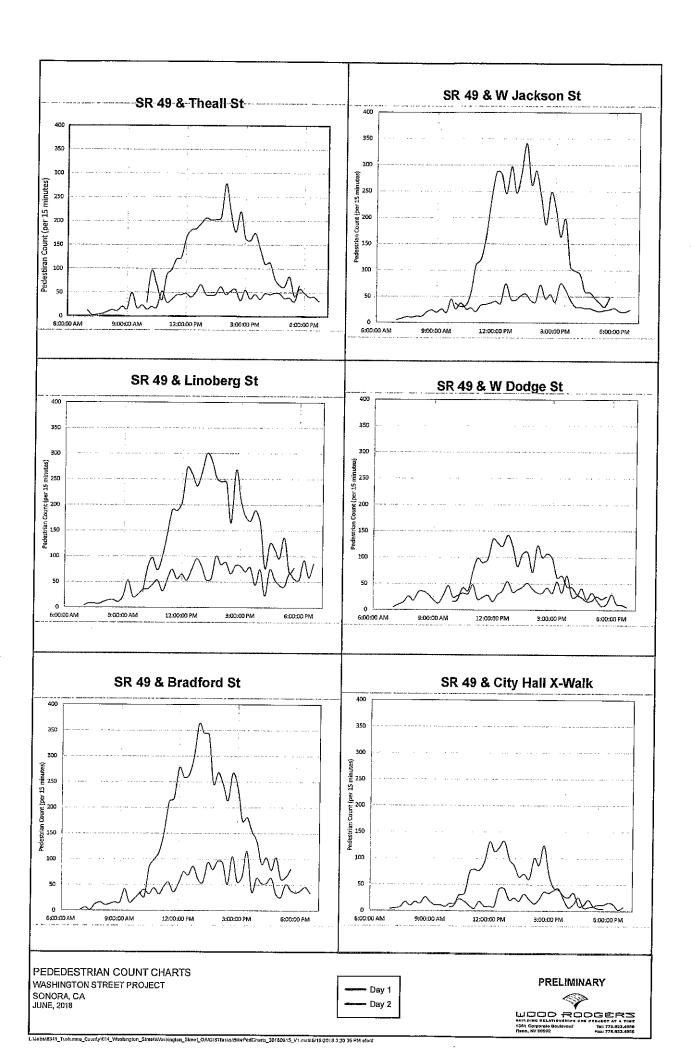

The City of Sonora intends to partner with the Tuolumne County Transportation Council and submit a joint Active Transportation Program (ATP) Grant Application for the Washington Street Improvements Project for Cycle 4 funds. The Washington Street Improvements ATP Project will help improve safety by improving the crossings at seven intersections along Washington Street (SR 49) in downtown Sonora.

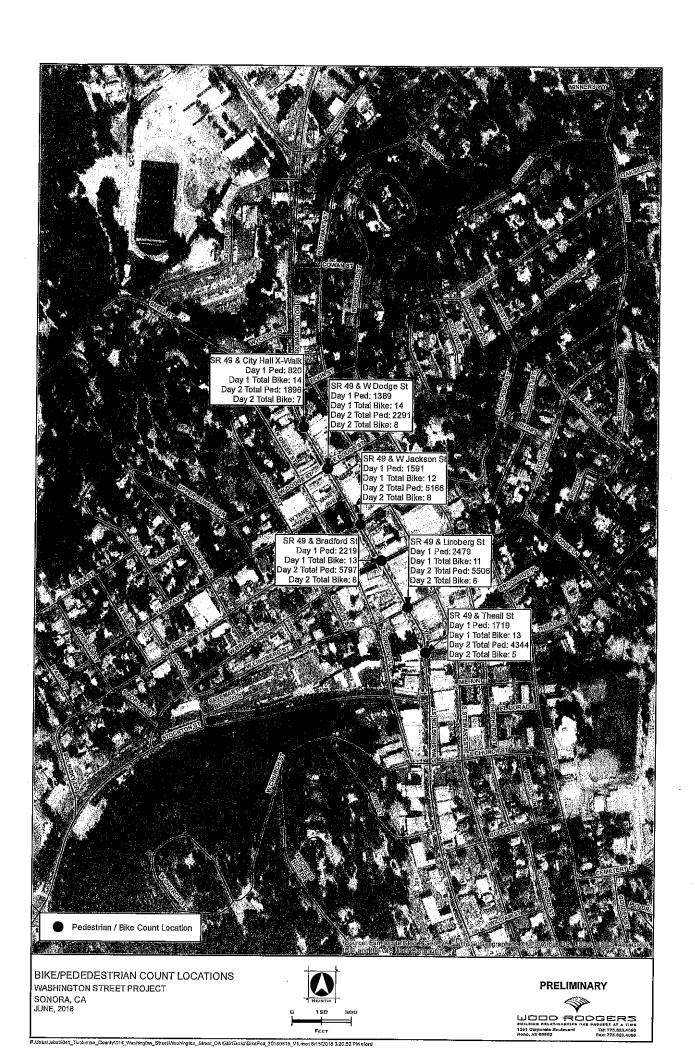

If the Tuolumne County Transportation Council, as lead agency, is awarded the requested ATP Cycle 4 funds, the City of Sonora intends to:

- Enter into an interagency agreement with the Tuolumne County Transportation
 Council which will specify the City of Sonora's obligations and responsibilities in the
 implementation and maintenance of the improvements.
- Assume responsibility for the on-going operations and maintenance of the sidewalk improvements.

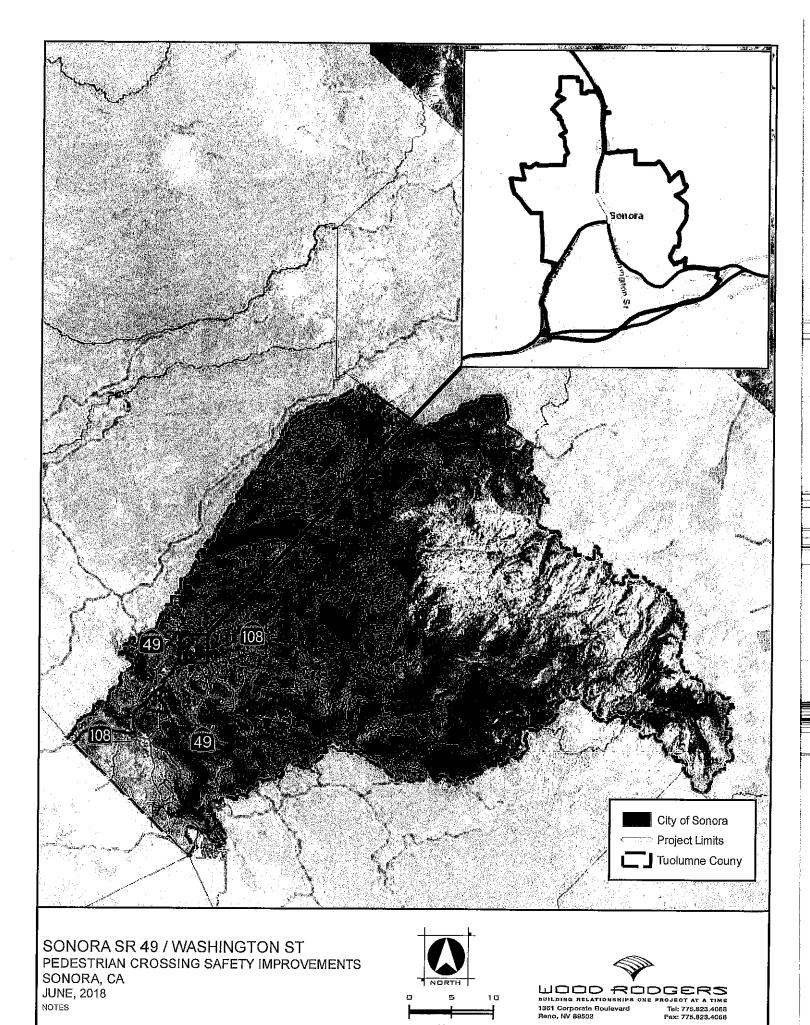

Respectfully,

Tim Miller, Administrator City of Sonora

:\Jobs\8341_Tuolumne_County\014_Washington_Street\Washington_Street_OA\GS\Tasks\Location_20180615_V1.mxd6/20/2018 7:42:29 AM eto

Right of Way (R/W) Impacts (Check all that apply) Project is 100% within the Implementing Agency's R/W and/or is within their control at the time of this application submittal. (This includes temporary construction easements) Project will likely require R/W in fee ownership, permanent easements and/or temporary construction easements from private owners and/ or will require utility relocations from utility companies outside that implementing agency's governmental control. Project will likely encroach into Caltrans R/W requiring easements, encroachment permits and/or other approvals. Is Caltrans the "Implementing Agency"? No *See the application instructions for more details on the required coordination, documentation and approval from Caltrans. The applicant must attach the approved and signed Caltrans Checklist for ATP projects impacting Caltrans R/W. Attach The following project details must match the information shown in the approved Caltrans Checklist attached above: What % of the project (by area) is within Caltrans R/W? What % of the project (by total project cost) is within Caltrans R/W? What is the total cost (all project phases) of all the project elements within Caltrans R/W? What level of Caltrans project development oversite has been determined to be needed by Caltrans? Is the project expected to be tracked by Caltrans as a "Local Assistance" or "Capital" project? What is the total additional months needed (all project phases) for Caltrans to complete its required oversite responsibilities? Has the project schedule been developed to account for this time? Project will likely require R/W, Easements, encroachment and/or approval involving Governmental (excluding Caltrans - as Caltrans impacts are documented above), Environmental, or Railroad owner's property. *See the application instructions for more details on the required coordination and documentation from these agencies. Attach a letter of support or neutrality from each separate agency. Combine all letters in one pdf attachment. Attach The following information should be based on specific prior coordination and agreement between the agencies:

What is the total additional months needed (all project phases) for all of these agencies to complete their required oversite responsibilities and to complete any required actions that are necessary based on the expected R/W impacts? 4

Has the project schedule been developed to account for this time? Yes

ATP CYCLE 4 APPLICATION FORM

LAPG 22-U (NEW 05/2018)

v1.1

Index Page

Page 21 of 29

10-Tuolumne County Transportation Council (TCTC)-1 Sonora Washington Street (SR49) Pedestrian Crossing Safety Improvements

Improving the highway crossings are critical to improving accessibility and safety for both residents and visitors walking through the downtown Sonora area, giving pedestrians a safe way to cross the highway during day time congestion and in low light/night time conditions. Most important is creating a buffer zone for pedestrians through the addition of bulb-outs to make the pedestrians visible to on coming traffic opposed to hidden behind parked cars. Creating contrast on the crossings through the use of non asphalt colored concrete to give drivers the awareness that pedestrians will be crossing in these areas, as well as including in pavement flashing warning lights triggered when pedestrians cross to keep traffic clear of the crossings and indicate when there are pedestrians in the highway. ADA improvements will be added to the crossing areas so all users can safely get across the highway and back on the sidewalk. Lighting is currently not in locations that benefit the crossings, and will be relocated or new lighting added specific to the crossing locations. These improvements will help make pedestrians visible in the day and night, and greatly improve the safety of the highway crossings. Safer, improved access across the highway will better connect the community and improve the safety and walk-ability of downtown Sonora.

B. Describe how the proposed project will address the active transportation need: (0-27 points)

What type of active transportation need will the proposed project directly address (select one or more) of the following elements, and discuss how the project will be meeting the identified need.

- 1. Proposed project address:
 - · Closure of a gap?

Gap closure = Construction of a missing segment of an existing facility in order to make that facility continuous.

Creation of new routes?

New Route = Construction of a new facility that did not previously exist that provides a transportation route.

 Removal of barrier to mobility? Describe the type of barrier.

Other improvements to existing routes?

(Max of 400 words)

Words Remaining:

The proposed improvements will primarily remove a barrier to mobility by improving the safety of six existing highway crossing locations that provide crucial connectivity for downtown Sonora and the surrounding communities. Poor crossing conditions for thousands of pedestrians that cross daily creates a major barrier in mobility for those trying to access services and employment, as well as those trying to enjoy the business district of Sonora. The existing crossings in many locations lead to a curb with no ADA improvements creating a barrier for those that require these types of improvements. ADA improvements will be made to all crossing locations to eliminate those barriers.

In addition to removing barriers in mobility, side street crosswalks that adjoin the highway crossings will also be completed to close a gap in overall connectivity in the downtown area. These gaps will be closed at each of the six locations identified on the map as well as a new cross walk that will be added to Yaney Street, which is near the transit center and public buildings and currently does not have a crossing. Connecting downtown and eliminating barriers for safe crossing of the highway in the downtown district will encourage residents to walk more and not fear for their life to

2. Must provide a map identifying the location of each: gap closures and connections; the new routes; and the barriers and improvements.

3. Referencing this map, describe the existing route(s) that currently connect the affected transportation related and community identified destinations and why the route(s) are not adequate. (Max of 200 words) Words Remaining:

The six existing highway crossing locations identified for improvements as depicted in the attached map, consist of pavement markings only (photos included) and provide no advance warning signals, signage, proper lighting, or ability for pedestrians to get out in the crosswalk without being hidden by parked cars. As Sonora is a historic mining town, neon signage or large crossing signals would not fit the surroundings. Changing the crossings to a stamped and colored concrete, adding the in-pavement warning lights, and bulb-outs will help create the same visibility for pedestrians without taking away from the historical features of Sonora. SR 49 is Sonora's main street, and that is not going to change in the forseable future. Pedestrian crossings need to be enhanced so pedestrians can use main street to access services and employment safely.

- 4. Referencing this map, describe how the project links or connects, or encourages use existing routes to transportation-related and community identified destinations where an increase in active transportation modes can be realized, including but not limited to: schools, school facilities, transit facilities, community, social service or medical centers, employment centers, high density or affordable housing, regional, State or national trail system, recreational and visitor destinations or other community identified destinations. Specific destinations must be identified.
 - For combined I/NI projects: discuss how the encouragement, education, and/or enforcement program will help address the needs.

(Max of 400 words)

Words Remaining:

The improved highway crossings will provide safe access for many users including students walking to and through downtown to get to school and for lunch, residential areas surrounding the project, the business district/employment along the project area, and other public services including better connecting the transit center with downtown. Visitors frequent the project area to experience the historic mining town and the rows of unique local businesses. SR 49 bisects all of these user groups and makes it challenging for them to cross the highway to access their destination. Improving the crossings will make it safer and less challenging to move around downtown, and improve the overall connectivity of Sonora.

STATE OF CALIFORNIA • DEPARTMENT OF TRANSPORTATION ATP CYCLE 4 APPLICATION FORM

LAPG 22-U (NEW 05/2018)

Index Page

Page 23 of 29

10-Tuokumne County Transportation Council (TCTC)-1 Sonora Washington Street (SR49) Pedestrian Crossing Safety Improvements

Referencing project's heat-maps, collision map and collision summaries provided in above, discuss the extent to which the proposed project limits represents one of the agency's top priorities for addressing ongoing safety and discuss how the proposed safety improvements correspond to the types and locations of the past collisions. (e.g. sidewalks, bike lanes, lighting, bulb-outs, signals/ barriers, etc.)

For Projects with Non-Infrastructure elements (Combined I/NI projects):

As appropriate, describe how the NI program elements:

- educates bicyclists, pedestrians, and/or drivers about safety hazards for pedestrians and bicyclists; and
- encourages safe behavior, including through enforcement.

| (Max of 700 Words) | Words Remaining: | |
|--------------------|------------------|--|
| | | |
| | | |
| | | |

B. Safety Countermeasures (13 points max)

Referencing the information provided in Part A, demonstrate how the proposed countermeasures directly address (one or more) of the following underlying factors that are contributing to the occurrence (or potential occurrence) of pedestrian and/or bicyclist collisions.

- a. Reduces speed and/or volume of motor vehicles in the proximity of non-motorized users
- b. Improves sight distance and/or visibility between motorized and non-motorized users
- c. Eliminates potential conflict points between motorized and non-motorized users, including creating physical separation between motorized and non-motorized users
- d. Improves compliance with local traffic laws for both motorized and non-motorized users
- e. Addresses inadequate vehicular traffic control devices
- f. Addresses inadequate or unsafe bicycle facilities, trails, crosswalks and/or sidewalks
- g. Eliminates or reduces behaviors that lead to collisions involving non-motorized users

(Max of 1500 Words)

Words Remaining: 974

The proposed Project will improve visibility between motorized and non-motorized users and sight distance, will add physical separation between motorized and non-motorizes vehicles, will help improve compliance with local traffic laws for all users, and will address inadequate crosswalks on a state highway (SR49) in downtown Sonora. All of which will reduce behaviors that lead to collisions involving non-motorized users. Below is a summary of each element the Project will address:

- Create physical separation between motorized and non-motorized users:

Adding bulb-outs to crossing locations will create a physical separation for non-motorized users and parked vehicles. The bulb-outs will create breaks in parked cars and will allow the pedestrians waiting to cross to become more visible to oncoming traffic opposed to hidden behind those parked cars.

- Improve visibility between motorized and non-motorized users and sight distance:

In addition to the bulb-outs allowing pedestrians to become more visible, and giving on coming traffic a better line of sight of those looking to cross the highway, changing the surface of the crossing from asphalt to a colored concrete will create contrast helping the crossing physically standout and make highway traffic not want to stop on the cross walks. Relocating the light to the crossing locations will improve low light and night time visibility. In-pavement warning lights will clearly identify to traffic that pedestrians are in the cross walk.

- Improve compliance with local traffic laws for both motorized and non-motorized users:

Adding the concrete, bulb-outs, and warning lights will clearly identify where pedestrians need to safely cross. This will provide advanced warning to on coming traffic so they have plenty of time to allow pedestrians to cross. Pedestrians will also clearly see where the crossings are and will not have to cross in areas with no cross walks.

Addresses inadequate crosswalks:

The crosswalks today are painted lines on asphalt with no advance warning or ADA improvements to get pedestrians safely across the highway (Sonora's downtown main street). Crosswalks will be enhanced with concrete to clearly mark where pedestrians may safely cross the street, while providing in pavement warning lights to signal drivers when pedestrians are in the highway. ADA improvements will be added to address mobility challenges for all users and lighting will be relocated to properly illuminate the crossings in low light and night time conditions.

- Eliminate or reduce behaviors that lead to collisions involving non-motorized users:

At an ADT of over 19,000 traveling through SR 49 in downtown Sonora with parked cars lining the street, mixing with the tens of thousand pedestrians moving back and forth across the highway, inadequate crosswalks are bound to create collisions. One of the larger issues is the visibility of pedestrians and drivers not able to see each other around parked vehicles or hidden in congestion. Bulb-outs and in-pavement warning LAPG 22-U (NEW 05/2018)

Page 25 of 29

10-Tuolumne County Transportation Council (TCTC)-1 Sonora Washington Street (SR49) Pedestrian Crossing Safety Improvements

Part B: Narrative Questions Question #4

QUESTION #4 PUBLIC PARTICIPATION and PLANNING (0-10 POINTS)

A. Describe the community based public participation process that culminated in the project

Include discussions of: What was the process to prepare for existing and future needs of users of this project? Who was engaged in the public participation and planning process? How will stakeholders continue to be engaged in the implementation of the project?

(Max of 1000 words)

Words Remaining: 715

A robust public outreach process was conducted for this project. In 2015 the City of Sonora completed their "Vision Sonora" plan which identified these crossing locations as areas of improvement for pedestrian connectivity in the downtown area. Vision Sonora was a lengthy process that included many stakeholders, business community, and the public and identified master plan level concepts for improving Sonora. In 2017 a several month design charrette process was conducted, which ultimately lead to the conceptual design of the proposed project. The design charrette process started with the Vision Sonora concepts, a couple additional alternatives were developed, and a public open house and several other presentations and meetings were held to discuss all alternatives. Following the public process, a final preferred concept was selected in conjunction with the City of Sonora to move forward in implementation.

The current concept includes a balance of improving pedestrian visibility and safety through the loss of a few parking spaces in downtown to construct the bulb-outs. In-pavement warning lights at crossings were selected over rapid flashing signs to reduce sign clutter and signs that don't fit the historic character of Sonora, but still provide safety benefits. Colored concrete in crosswalks will add to the historic character while providing a pedestrian visibility benefits. Generally the public and business community want to see pedestrian improvements, but want to also maintain the historic character of the mining town. Caltrans district 10 staff have been involved in the public process and have provided a letter of support for the project. Ultimately the design balances the requirements of the state highway and standard design criteria while recognizing the highway is part of a historic downtown that needs to be preserved.

Area Code 209

MEMORANDUM

DATE: July 02, 2018

TO:

Honorable Mayor, City Council members

FROM:

Timothy A. Miller, City Administrator

SUBJECT:

CPI Increase - Waste Management/Cal Sierra Disposal

RECOMMENDATION: That the City Council, by motion, adopt Resolution No. 07-02-2018-B, approving a 3.34% CPI increase and adding a recycle contamination charge to the refuse collection rates for Waste Management.

DISCUSSION: Attached is a letter from Joe Cadelago, Public Sector Services Manager, Waste Management, requesting an increase in the refuse collection rates based on the Consumer Price Index (CPI) as provided for in the City's franchise agreement (see attached letter). The preceding three year mean average percentage change is 3.34% (see attached CPI calculations). Last year's CPI increase was 3.00%. The tables attached to the resolution compare the existing residential, commercial and miscellaneous rates (Current Rate column) with the proposed rates (New Rate column). The additional cost related to the CPI increase is identified in the middle column (CPI Adjustment). For a typical residential subscriber (one 35-gallon cart), the current rate will increase by \$0.85, from \$25.32 per month to \$26.17 per month.

In addition, Waste Management is proposing to add a charge of \$20.00 for residential customers and \$50.00 for commercial customers for contamination of the recyclables. The charge would be imposed only after the contaminated recyclables were collected at no additional charge; education and instruction materials were provided; and, a second notice was issued to the customer. After three or four further occurrences, additional notice would be provided and the contamination fee could be levied for the pick-up. Continued contamination would result in the removal of the cart or bin for up to one year. See attached proposed language and the recycle content studies.

A typical Recycling News Bulletin and example of the educational flyer is attached for Council review. Lastly, an update from the California Department of Resources and Recycling and Recover has been provided.

Cal Sierra Disposal 14959 Carnage Avenue Sonora, CA 95370

May 31, 2018

Mr. Timothy Miller City Manager City of Sonora 94 North Washington Street Sonora, CA 95370

SUBJECT: REQUEST TO ADJUST AND ADD SOLID WASTE COLLECTION BASE RATES FOR CONTAMINATION

Dear Mr. Miller,

Cal Sierra Disposal, a Waste Management Company, respectfully requests this modified rate adjustment to all solid waste collection rates effective September 1, 2018 pursuant to the terms of the existing Franchise Agreement. The total rate adjustment requested for 2018-2019 is 3.34%

The Franchise Agreement per Section II., 3. COMPENSATION TO CONTRACTOR, a) and b), requires that our request be the mean average of the preceding three years, The preceding three years percentage rate of change has been: 2016; 3.02%, 2017; 3.44%, and 2018; 3.56%. The mean average of the preceding three years equals 3.34%.

We would also like to bring to the City's attention the global crisis that is disrupting the recycling industry, the impact to Cal Sierra Disposal, and a proposal to mitigate contamination in the recycling system that is fair to our customers and Sonora's constituents.

In recent years, almost 30% of all recyclables from across the globe were shipped to China, including over 50% of the world's recyclable mixed paper and plastics. On January 1, all mixed paper and mixed plastics were banned as an import into China. On March 1, China began enforcing a new 0.5% contamination limit on imported recyclables, then later in March implemented Operation Blue Sky, a screening effort at their ports to enforce their new policies. China's new policies have been implemented in response to their aggressive new environmental goals, which include creating their own recycling collection programs. China has announced a plan to eliminate imports of all post-consumer recyclables by 2021, and they appear to be taking steps to move down this path.

Commodity pricing

The reduction of China's markets means an oversupply of commodities across the globe which has led to depressed commodity pricing. Supply is high and commodity pricing is low for the material that cannot achieve China's 0.5% contamination limits.

Cardboard pricing is at its lowest in nine years

Mixed paper pricing is at zero, or even negative (we are paying to move it) in some regions.

Material quality

- Recycling facilities across the country are adding labor and slowing down processing lines to try to achieve the 0.5% contamination threshold. This increases the cost of recycling at the same time commodity values are low.
- Magnitude of contamination reduction effort. Globally, inbound contamination currently averages 25%. That means
 that 500 pounds of every 2000 pounds of inbound material is trash. But in today's world, contamination cannot
 exceed 10 pounds for every 2000 lbs.

How has Cal Sierra Disposal been impacted?

- A) Increased labor:
 - Q4 2017 Lodi Materials Recycling Facility (MRF) increased labor headcount by 7 dedicated to paper sorting lines for quality control, specifically due to China's policies.
 - 60 hrs of labor overtime per week.
- B) Slower production:
 - 20.72 tons per hour June 2017
 - 15 tons per hour June 2018
- Stockpiling of unmarketable material:
 - May 2018: 0/56 paper bates sold (six truckloads). Projecting an additional 5 truckloads of material will sit indefinitely.

RESOLUTION NO. 07-02-2018-B

A RESOLUTION OF THE SONORA CITY COUNCIL APPROVING A REFUSE COLLECTION RATE INCREASE

WHEREAS, all City of Sonora refuse collection rate increases are to be approved by the City Council, by resolution, in accordance with the City's Amended and Restated Franchise Agreement dated October 1st, 2010, with the term of said Agreement expiring August 31, 2020; and

WHEREAS, Waste Management, the City Franchise Operator, is requesting the City Council to approve refuse collection rate increases in accordance with the Franchise Agreement, due to increased costs associated with solid waste collection; and

WHEREAS, Waste Management, is requesting a Consumer Price Index (CPI) increase using the mean average percent change for the proceeding three years, equating to a 3.34% increase in accordance with the aforementioned Franchise Agreement.

WHEREAS, Waste Management, is requesting a recyclable contamination fee of twenty dollars (\$20.00) for residential customers and fifty dollars (\$50.00) for commercial customers that can be levied after the customer receives a second notice.

NOW THEREFORE BE IT RESOLVED, the Sonora City Council, effective September 1st, 2018, approves the rate increases, as shown in Exhibit A, which is hereby made a part hereto of this aforementioned Resolution.

Proposed Contamination Language:

Garbage Waste. If, by visual inspection, Recyclable Materials are commingled with ten percent (10%) by volume of Garbage, then CONTRACTOR Contamination: CONTRACTOR shall only be required to collect Recyclable Materials if they have been separated by the Service Recipient from may take the following steps:

One or Two Occurrences Per Agreement Year. CONTRACTOR shall collect the contaminated Container at no charge to Service Recipient and provide Notice that contains instructions on the proper procedures for setting out Recyclable Materials.

Three or Four Occurrences Per Agreement Year . CONTRACTOR shall provide Notice that contains instructions on the proper procedures for setting out Recyclable Materials and CONTRACTOR shall collect the contaminated Container and may charge the Service Recipient a contamination fee as set forth in rates section.

one (1) year. CONTRACTOR shall notify CITY within five (5) Work Days of removal of Recyclable Materials Container for excessive contamination. Recyclable Materials Container, as applicable, and discontinue providing the Recyclable Materials Collection Services for a period not to exceed may charge the Service a contamination fee as set forth in rates section. CONTRACTOR may also, after notifying Service Recipient, remove the Five Occurrences Per Agreement Year. On the 5th occurrence of contamination, CONTRACTOR shall collect the contaminated Container and

Service Re-start. After one (1) year, or a shorter time-period if appropriate, the Service Recipient may request CONTRACTOR and the CITY to reinstate the discontinued service, and CONTRACTOR may charge a Container re-delivery fee as specified in rates section, for restarting the Recyclable Materials Collection Service.

RECYCLING NEWS BULLETIN May 2018

As valued customers committed to recycling, we are providing this important recycling update.

Overview

In recent years, almost 30% of all recyclables from across the globe were shipped to China, including over 50% of the world's recyclable mixed paper and plastics. On January 1, all mixed paper and mixed plastics were banned as an import into China. On March 1, China began enforcing a new 0.5% contamination limit on imported recyclables, then later in March implemented Operation Blue Sky, a screening effort at their ports to enforce their new policies.

China's new policies have been implemented in response to their aggressive new environmental goals, which include creating their own recycling collection programs. China has announced a plan to eliminate imports of all post-consumer recyclables by 2021, and they appear to be taking steps to move down this path.

May 3, 2018 Update: Chinese Government Announces 30-day Inspection Suspension On May 3, the Chinese Government announced that it has suspended inspections/certificates for all recyclables from the U.S. through June 4, 2018. Because all loads shipped to China must be certified, recyclables will not be able to be shipped from the U.S. to China during this time. In other words, regardless of the material bans and the 0.5% contamination limit, no recyclables will ship from the U.S. to China for at least the next month. It is apparent that China will not be easing up on their import restrictions soon.

Impact of this Latest Announcement

The suspension of U.S. imports into China adds additional pressure on global markets, which ultimately impacts recycling programs in communities across the U.S. Some of the material that was being shipped to China (cardboard, some newspaper, sorted office paper) will now compete for the same markets that have been established for lower value mixed paper. Inevitably, some paper will likely be left without a market.

With this latest news, commodity pricing continues to fall. We have seen a 50% reduction in commodity values in the past several months, while processing costs have increased. Every community and every recycler is impacted.

Keeping the Focus on Quality

Alternative markets - domestic and export - require high quality recyclable materials with little to no contamination. Waste Management (WM) is focused on reducing contamination to help move materials to end markets. Given continued market volatility, we must all work together on solutions. We all have a role - and a responsibility - to make recycling successful.

THE BATTLE TO REDUCE RECYCLING CONTAMINATION

The sustainability of all recycling programs is dependent upon collecting high quality recyclable materials free of unacceptable materials. From an environmental, economic and safety perspective, addressing the quality of recycling is imperative and we must tackle this together. Here is what WM is doing, and how you can help:

- Waste Management's education and outreach program, <u>Recycle Often. Recycle Right</u> * website has tips and tools to help customers reduce and eliminate contamination. Practice and share these tips!
- We continue to invest in technology to process cleaner material, more efficiently. Send us clean materials!
- As allowable, WM will enforce contact provisions related to contamination to the fullest extent. We will also work
 closely with our customers to adjust the current recycling business model to reflect today's marketplace. We are
 seeking cost recovery as allowed, charging for contamination and amending contract language. Let's work
 together to eliminate contamination and make recycling work!

DEPARTMENT OF RESOURCES RECYCLING AND RECOVERY

1001 I Street, Sacramento, California 95814 • www.CalRecycle.ca.gov • (916) 322-4027 P.O. Box 4025, Sacramento, California 95812

May 8, 2018

In light of recent changes to China's import policies, I'm writing to share an update on California's recycling markets, answer questions regarding jurisdiction compliance, emphasize the importance of health and safety at solid waste facilities, and discuss what lies ahead. On May 4th, China stopped accepting any imports of recyclable materials from the United States for one month. This decision follows China's implementation of its National Sword policy on March 1st, banning the imports of 24 categories of scrap materials including low grade plastics and unsorted mixed paper, and setting strict contamination standards for allowable bales of recyclable material. The exporting of recyclable commodities to China, primarily our traditional curbside materials, has historically been a key component of California's recycling infrastructure. Approximately two thirds of curbside collected material is exported to foreign markets. In 2016, 62 percent of the exported recyclable materials were sent to China. However, China's implementation of National Sword is a major disruption in recycling commodities markets, a signal that California can no longer be primarily reliant on exports to manage our recyclable materials.

These new policies provide California with an opportunity to take a couple of important steps: first, to reduce our waste, and second, to work together to build infrastructure and domestic markets to successfully and responsibly manage our recyclable materials. Each of these will take investment and collaboration across state and local governments, the solid waste industry, manufacturers, and rate-payers. These are critical steps to improve the environment and economy here in California and beyond, although they will take time.

We're already witnessing the effect of China's new policy. Material flow is significantly disrupted and the economics of recycling are unfavorable for many recyclable commodities, challenging what recycling means to Californians.

This letter is intended to address concerns I have been hearing from local governments and industry about the impacts of China's import policies. I would like to reassure local governments that we have existing statutory policies to address the impact of markets when determining whether or not a jurisdiction has made a good faith effort to implement its diversion programs for compliance with AB 939. I am aware that facilities are having a hard time moving recyclable materials and are keeping them on site in significant quantities. If facilities are temporarily storing materials for longer periods, public health and safety should be their number one priority. Finally, looking toward the long-term, we will need more domestic infrastructure to manufacture products using California's recycled content feedstock. This valuable infrastructure will not only support the domestic recyclable commodities market but also support SB 1383's goal to reduce disposal of organic waste by 75 percent.

programs. If a jurisdiction has not been able to implement a commercial recycling program that is appropriate for the jurisdiction and meets the needs of its businesses, CalRecycle looks at a number of factors in assessing whether the jurisdiction has made a good faith effort to implement these programs. These factors include the impact of markets and the efforts the jurisdiction has made to investigate local and regional marketing options and recycling opportunities with the private sector. More specifics can be found in the CIWMP Enforcement Policy Part II, page 22 re: MCR and 28-29 re: MORe, and PRC 42649.3(i)(5) and 42649.82(h)(6) and 14 California Code of Regulations §18839.

Health and Safety Considerations Associated with Storage

We understand that National Sword is causing back-ups and longer storage times of processed recycled materials at solid waste facilities and recycling centers. Solid waste facility operators can <u>discuss potential permitting options</u> or request a Solid Waste Local Enforcement Agency to grant a temporary waiver of storage restrictions. The waiver would allow additional amounts of recyclables and longer timeframes to store recyclables at the solid waste site as long as the additional storage does not create public health and safety or environmental issues. The <u>process for requesting and processing a temporary waiver</u> is found in state solid waste regulations. In addition, public health and safety is a priority at solid waste facilities and recycling centers. Several industry sources have published best management practices for the storage of baled recyclable materials. We've provided a synopsis of these practices below:

Have a Storage Management Operations Plan describing procedures for receiving, storing, and shipping baled recyclables.

- Unload baled recyclables by forklift and stack in a specific storage area in a configuration
 that provides for long-term stability. If applicable, stacked bales may be overlapped or
 staggered to improve the stability of the stacks. Height of the bales should be no greater
 than four bales high.
- The bale storage area should allow forklift operators to safely move materials and allow for the safe loading of trailers that are picking up bales of materials.

To prevent contact with storm water, and to control vectors and nuisance, the following may be employed:

- Limit bale contact with the ground (e.g., on pallets and/or tarps)
- Maintain facility cleaning, housekeeping and litter control
- · Remove putrescible material, if observed
- Maintain heavy equipment to ensure no oil or fuel leakage occurs; clean up spills or leaks immediately
- Establish a first in/first out material handling process
- Where necessary, place berms or other structures to divert storm water from coming into contact with bales

Fire Hazard Mitigations:

- Consult with your local fire district to employ fire hazard mitigations
- Keep adequate heavy equipment available on-site: (e.g., front loaders, bulldozers, water trucks, bobcats), fire hoses, dedicated fire pump and water tanks, and fire extinguishers.
- · Identify a maximum size of the storage area including length/width/height.
- Maintain appropriate spacing between piles and the perimeter, maintain fire lanes
- Inspect piles daily for potential fire hazards
- Monitor pile temperatures at least once a week

Coordinate with the Local Enforcement Agency and any local or state authorities responsible for the regulatory oversight of the facility.

Next Steps

CalRecycle will host a workshop in Sacramento in early June to encourage dialogue and share information about the impacts of China's import policies. Workshop details will be posted on our National Sword website. We will use this convening as an opportunity to discuss changing market dynamics, impacts on facilities, domestic capacity for processing and manufacturing using recycled content, and to identify other short and long-term solutions to the current recycling challenges. This is not the first time the international recycling commodities market has faced a major disruption and it won't be the last. California must capitalize on these disruptions and turn them into an opportunity to strengthen our environmental resilience and our economy. This will require us to reassess product design, materials collection, and processing systems. I look forward to working with you to build a more sustainable recycling infrastructure in California.

Vision Sonora is like a face tattoo for the city. It sounded like a cool idea when someone suggested it. But it's permanent and something you'll regret doing further down the line.

I'm Elena Linehan, property owner in downtown Sonora. I first came to Sonora as your Main Street Manager to help revitalize the downtown.

During our time we hosted monthly retail events, established the farmers market, purchased our Christmas decorations and saw the downtown go from 27 vacant store fronts to two. So I know of whence I speak.

Here we are on another holiday week discussing vast changes to our downtown. You typically hold this on a Tuesday night after a three day weekend when few are in town to see the notice on late-Friday afternoon or early-Saturday.

Under Connie Williams' leadership, the Vision Sonora program has been designed to discourage disagreement. I hear from business owners who tell me the city's approach to include them consists of e-mails twice a month announcing meetings that they can't attend while their shops are open.

Matt Hawkins made a campaign promise that he would convene a workshop for the people supporting Vision Sonora to meet with those who oppose it. That hasn't happened yet.

Jim Garaventa says these downtown design issue need greater discussion, but here we are again, with a looming deadline to submit a grant and no discussion of the greater impact.

Because you should discuss how the turning radius for large trucks, school buses and recreational vehicle will force these vehicles to drive into oncoming traffic.

The proposal before you says that this will have to be resolved in the final design.

Gee that's swell! Why create a greater danger while trying to solve another?

Why wait? Why not find a solution <u>first?</u> Let this grant cycle pass by until we can find the answer. There will be other grants available.

Some people have unkindly said that this is the city's "quest to garner money."

Or as one person said to me, "Something happens to people spending someone else's money. They just go nuts."

It's hard to argue with their thoughts when we see how the City Council's approaches the problem.

I've brought pictures. Here are the bulb-outs in Jamestown. I've reported to you in the past on the high number to tire marks on their bulb-outs. Now I bring you pictures of great chunks of concrete knocked off the bulb-outs by vehicles. This is the future that Vision Sonora promises the city residents.

If you don't believe me, take a look at the landscaping that you have trouble maintaining across from the High School.

But you are not alone is seeking this grant funding. There was an interesting editorial in Sunday's Modesto Bee discussing the same issues you are considering here tonight.

Their comment was that what they called "pregnant sidewalks" seemed more gimmick than necessity. And they questioned whether the city was trying to make it harder to drive downtown.

Don't do this. Take more time and have more open and honest discussion.

Wait for a time when you have agreement on what you really want to see downtown and not piecemeal at an urgent pace to meet a grant deadline.

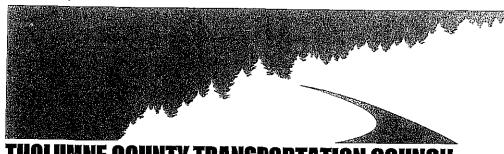

Hold a special session where these concepts can be discussed with the larger view of what needs to happen downtown. Don't be surprised if you hear more about sidewalk and road repairs than the Disneyland approach.

To those of us who have sought out a life in rural California, the proposed changes of Vision Sonora smack of urban strip mall design and we don't like it.

I'll leave a copy of my comments with the City Clerk to include with the minutes of the meeting.

Michael Ayala Chairman

Darin Grossi
Executive Director

TUOLUMNE COUNTY TRANSPORTATION COUNCIL

June 25, 2018

City Council Members City of Sonora 94 North Washington Street Sonora, CA 95370

Subject: Consider signing a Letter of Intent to partner with the Tuolumne County Transportation Council to submit a joint Active Transportation Program Grant application for Cycle Four for the Washington Street Improvements Project based upon the conceptual design presented.

Dear City Council Members,

After an extensive community outreach effort, in December and January, TCTC staff has worked with our consultant Wood Rodgers Inc. to draft a preferred concept based upon the community and City Council input. Our consultant Wood Rodgers has drafted a corner bulb-out design with Caltrans input for the SR 49-Washington Street/Bradford Street Intersection (Attachment 1).

This draft bulb-out proposal for the intersection of Bradford/Washington Street would similar design to the other 5 crosswalk intersections in the project area boundaries including Theall Street, Linoberg Street, Jackson Street, Dodge Street, and City Hall Crosswalk. This bulb-out will extend the sidewalk and curb along Washington Street and will shorten the distance pedestrians will have to walk in the crosswalk. The extended sidewalk and curb will improve sight distance for automobile drivers so they can see pedestrians who are about to cross the intersection. The Active Transportation Program (ATP) Grant Application provides points to projects that provided safety countermeasures.

Regarding, the proposed in-roadway lights in the crosswalk, Caltrans is requiring TCTC to follow the California Manual on Uniform Traffic Control Devices (CA-MUTCD) in order to justify the lights. The CA MUTCD states that a pedestrian count must be performed with 40 people crossing per hour for at least two hours per day. On Friday April 27th and Saturday April 28th Wood Rodgers performed six pedestrian and bicycle counts at the six intersection/crosswalk in Downtown Sonora that are within the project area boundaries. All six intersections met the warrant for the Saturday counts and four of the six intersections met the warrants for the Friday counts. TCTC will propose all six in-roadway lights in the ATP application.

Mailing: 2 South Green Street Sonora, CA 95370

Phone: 209/533-Fax: 209/533-5698 Wood Rodgers has created a bus/truck turning movement diagram, which shows that 40 foot trucks/bus cannot legally make right turns from Bradford Street onto Washington Street without crossing into the adjacent lane (Attachment 2) under existing conditions. The narrow streets are part of the charm of Downtown Sonora and help provide a walkable environment for pedestrians. In order to accommodate 40 foot wide turning radius for trucks, a significant amount of right of way would be required including removing buildings. Accommodating 40 foot trucks/buses is not a Context Sensitive Solution for the Downtown Sonora intersections within the Project Area Boundaries. Caltrans understands the predicament and has stated that the local agency will need to apply for a design exception to avoid having to accommodate 40° school buses in the final design.

The California Transportation Commission (CTC) released the call for projects for Active Transportation Program (ATP) Cycle Four on May 18th and the deadline to submit projects would be on July 31st.

On March 22, the TCTC and the consultant presented the proposed conceptual design to Caltrans functional units at District 10. It should be noted, Caltrans representatives gave 100% support for the project at the meeting. A Letter of Support from Caltrans District 10 is included as an attachment. On May 31, the TCTC staff met with the Police Chief and the Fire Chief and presented the proposed conceptual design. It should be noted, the chiefs supported the project.

At the April meeting, the Visions Sonora Committee unanimously recommended directing the consultant to submit an Active Transportation Program Grant Application for Cycle Four.

Sincerely,

Darin Grossi
Executive Director

April 18, 2018

APR 2 5 2018

Mr. Darin Grossi
Executive Director
Tuolumne County Transportation Council
2 South Green Street
Sonora, CA 95370

Dear Mr. Grossi:

The California Department of Transportation (Caltrans), District 10, is in support of Tuolumne County Transportation Council (TCTC) application for the Active Transportation Program (ATP) Cycle 4 on Washington Street, State Route 49 in downtown Sonora. Caltrans supports the conceptual design for pedestrian improvements presented by TCTC and Wood Rodgers Consultant on March 22, 2018. The project would support Caltrans goals of promoting transportation safety for all road users and community health within the State Highway System through active transportation. We understand that the scope of the project is still in the conceptual stage, subject to further studies and review in the project development and design phase. We look forward to continuous collaboration and cooperation between Caltrans, TCTC, and City of Sonora in developing the project that meets the community needs.

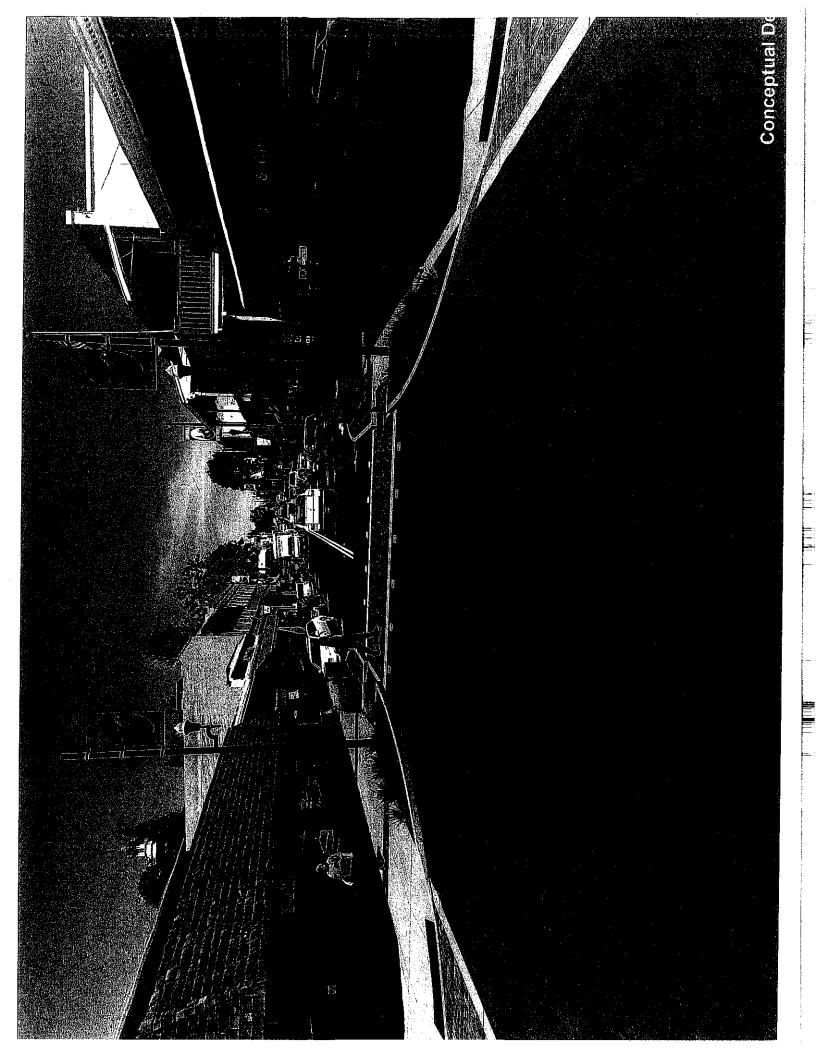

If you have any questions, you may contact Samuel Jordan, Deputy District Director, at (209) 948-7883 or by email at samuel.jordan@dot.ca.gov.

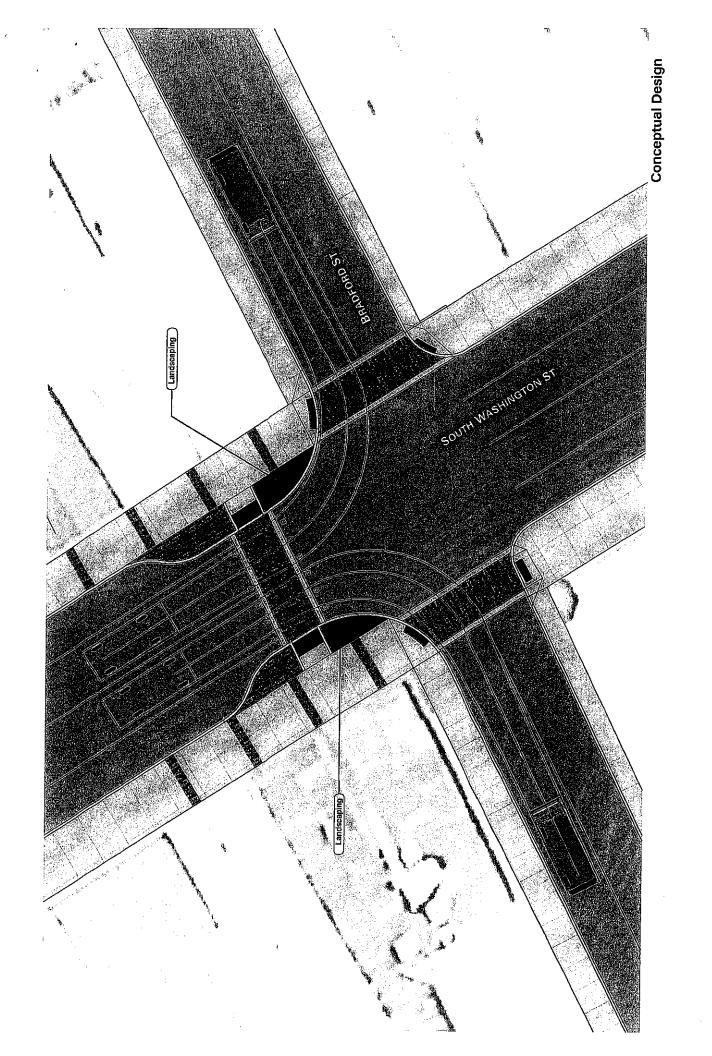

Sincerely.

DENNIS T. AĞAR

NOTES

A Collection of Community Trends from the Community Design and Mobility Workshop December 14, 2017

Community Input Trends:

#1) Improve Cross Walks

- 100% of comments in support of (approx. 15 comments received)
- Add runway lights (almost all comments in favor of, few comments about maintenance issues)
- Add colored pavers or brick to cross walks
- Improve lighting

#2) Corner bulb-outs

- 75% of comments in support of (approx. 16 comments received)
- Opposition (concerned about street width and bulb outs too large)
- Use historic brick
- Comments regarding sizing the bulb-outs correctly
- · Use to shorten cross walk length by the Red Church

#3) Mid-Block Bulb-outs

- 60% of comments in support of, 40% opposed (approx. 14 comments received)
- · Opposition was mainly concerns of losing parking

#4) More Parking

- 90% of comments in support of (approx. 12 comments received)
- Comments supported the following:
 - One-way street with parking (4 out of 5 comments in favor of)
 - Build new parking garage or off-street lot (3 comments)
 - Increase parking off-street before removing parking on main street (4 Comments)

#5) Improve Pedestrian/Street Furniture

- 100% of Comments in support of (approx. 8 comments received)
- Fix placement of street furniture
- Need more street furniture
- Add more outdoor seating for restaurants

#6) Add Landscaping

- 80% of comments in support of (approx. 6 comments received)
- Type of landscape is important
 - Olive Tree (Evergreen)
 - Roots could damage utilities
 - Ongoing maintenance

#7) Improve Sidewalks

- 100% of comments in support of (approx. 5 comments received)
- Improve damaged sections
- Create uniform sidewalk with current brick/concrete to keep historic feel

Other Trends with less than 5 Comments

- Keep historic feel of main street/Sonora (4 comments)
- Improve pedestrian safety near high school (3 comments)
- Implement a truck route to remove the truck traffic from main street (2 comments)

Elena Linehan, downtown property owner of the historic Burnham home of Linoberg Street.

I read in the Union Democrat that there's been another vehicle / pedestrian collision on the Elkin Street crosswalk.

It reminded me that our previous Police Chief pointed to that crosswalk as one that needs to be addressed for safety sake.

The city is currently using tax payer's hard earned money to pay a design firm to redo the Red Church intersection.

Unfortunately, the favored design addressed every crosswalk at that intersection *expect* for the Elkin Street where the danger lies.

This City Council is so in love with the Vision Sonora plan that they are willing to put a park out in the middle of the street while turning a blind eye to what must be addressed at the Elkin Street crosswalk.

We are often told that Vision Sonora is not the City Council's plan, but one that sprang from the people. Yet decisions are made by a small group. They point to input at a workshop of 100 to 200 people (the number varies depending on who you talk to), while the city ignores a petition with signatures of 385 people stating that they do <u>not</u> want Vision Sonora with the loss of parking and street closures.

Collette is new to the council, so I brought her her own copy of that petition. You'll likely to see some familiar names in the listing.

Please remember as you making plans to Disney-fy the downtown,

Pretty pink sidewalks do not increase safety.

Petunias won't protect you.

I'll leave a copy of my comments with the City Clerk to include with the minutes of the council meeting.

June 30, 2018

To: Connie Williams, George Segarini, Jim Garaventa, Mark Plummer, Matt Hawkins

From: Barbara Dresslar

Re: Grand Jury report on TCEDA

The report from the Grand Jury on TCEDA is damning for your irresponsible oversite of city funds and permitting no transparency of TCEDA procedures.

- Connie Williams and George Segarini, for years you voted funding for TCEDA despite
 your representing the City of Sonora on the TCEDA board with foreknowledge of Larry
 Cope's unethical management of TCEDA. In addition, you voted funding for TCEDA in
 the current budget despite Cope's refusal to provide documentation, and now maintain
 you are absolved of your responsibility as a TCEDA board member to protect city funds.
 TCEDA's misuse of funds makes your focus at your last meeting on finding \$27k for a
 Resource Officer a farce.
- 2. TCEDA had not been reviewed since 2009 during which time you ignored your duties as custodians of community funds.
- 3. George, last Monday you stated Larry Cope 'did a good job', knowing you had no evidence to support that, and now a 183 page Grand Jury report confirms you approved how poorly Cope managed TCEDA.
- 4. Larry Cope must be removed immediately as charges are investigated against him for misuse of city funds and a long list of illegal practices. It is criminal, and I mean that in the sense you are complicit, that you allowed him to approve his own travel and expense reports, paid him for a month he spent in England and allowed him to accrue and then paid him for 720 hours of vacation time, and permitted him to refuse to provide documentation of his work when it is required for government transparency and best practices by all other agencies. He is likely in violation of the Brown Act, likely in collusion with government staff.
- TCEDA must be suspended until an audit of expenditures, investigation of misappropriation of funds, and actual operating procedures are confirmed.
- 6. The City of Sonora should not use city funds or attorneys of any kind to fight Ken Perkins's lawsuit requesting documentation by TCEDA of operations. The Grand Jury report provides ample evidence that the lawsuit requiring Larry Cope and TCEDA to provide documentation is valid, so the information requested by Ken Perkins' lawsuit should be provided to the public immediately.
